The Sense of Space David Morris, 2012-02-01 The Sense of Space brings together space and body to show that space is a plastic environment charged with meaning that reflects the distinctive character of human embodiment in the full range of its moving perceptual emotional expressive developmental and social capacities Drawing on the philosophies of Merleau Ponty and Bergson as well as contemporary psychology to develop a renewed account of the moving perceiving body the book suggests that our sense of space ultimately reflects our ethical relations to other people and to the places we inhabit

Speaking the Earth's Languages Stuart Cooke, 2013 Speaking the Earth's Languages brings together for the first time critical discussions of postcolonial poetics from Australia and Chile The book crosses multiple Languages landscapes and disciplines and draws on a wide range of both oral and written poetries in order to make strong claims about the importance of a nomad poetics not only for understanding Aboriginal or Mapuche writing practices but more widely for the problems confronting contemporary literature and politics in colonized landscapes The book begins by critiquing canonical examples of non indigenous postcolonial poetics Incisive re readings of two icons of Australian and Chilean poetry Judith Wright 1915 2000 and Pablo Neruda 1904 1973 provide rich insights into non indigenous responses to colonization in the wake of modernity The second half of the book establishes compositional links between Aboriginal and Mapuche poetics and between such oral and written poetics more generally The book's final part develops an emerging synthesis of contemporary Aboriginal and Mapuche poetics with reference to the work of two of the most important avant garde Aboriginal and Mapuche poets of recent times Lionel Fogarty 1958 and Paulo Huirimilla 1973 Speaking the Earth's Languages uses these fascinating links between Aboriginal and Mapuche poetics as the basis of a deliberately nomadic open ended theory for an Australian Chilean postcolonial poetics The central argument of this book the author writes is that a nomadic poetics is essential for a genuinely postcolonial form of habitation or a habitation of colonized landscapes that doesn't continue to replicate colonialist ideologies involving indigenous dispossession and environmental exploitation Verses Against the Darkness Greg Dawes, 2006 Verses Against the Darkness offers a new assessment of Pablo Neruda's poetry by looking at the intersection of his aesthetic method and political radicalism from 1925 to 1954 It challenges the canonical view that Neruda was a gifted verse maker who in 1936 let himself be carried away by the excesses of communist politics Instead by focusing primarily on Tercera residencia 1935 1945 Greg Dawes argues for an uneven yet steady evolution and continuity in Neruda's work politics and morality Dawes relies on historical accounts biographies literary history and criticism and on Neruda's political and aesthetic theory to prove that his poetry became contrary to received critical opinion more sophisticated literarily and politically as he became more radicalized during the Spanish Civil War and World War II and as he developed

his dialectical realism or guided spontaneity Greg Dawes is Associate Professor of Latin American and World Literatures at North Carolina State University and is the editor of the on line journal *A contracorriente*

The Second Epistle to the Corinthians Murray J. Harris, 2005-01-01 The reputation of the NIGTC series is so outstanding that the appearance of each new volume is noteworthy This book on 2 Corinthians is no exception Master New Testament exegete Murray J Harris has produced a superb commentary that analyzes the Greek text verse by verse against the backdrop of Paul s tumultuous relations with his converts at Corinth Believing that Scripture cannot be understood theologically unless it has first been understood grammatically Harris provides a careful thoroughgoing reading of the text of 2 Corinthians He gives special attention to matters of translation making regular references not only to the standard modern English translations but also to influential older versions such as The Twentieth Century New Testament and those by Weymouth Moffatt and Goodspeed His close attention to matters of textual criticism and grammar leads to discussions of the theology of 2 Corinthians that show the relevance of Paul s teaching to Christian living and church ministry Other notable features of the book include a comprehensive introduction in which all the relevant literary and historical issues are discussed an expanded paraphrase of the letter that conveniently shows Harris s decisions on exegetical issues and indicates the flow of Paul s argument a chronology of the relations of Paul Timothy and Titus with the Corinthian church and an excursus on Paul s affliction in Asia 1 8 11 and its influence on his outlook and theology
