Scates, Earl Milton McWilliams, Earl William Anderson, Grace Stevens Wright, Jane Franseth, Maury Weldon Thompson, Robert Lado, Romaine Prior Mackie, Seerley Reid, Anita Carpenter, Anna M. Engel, Kenneth E. Brown, Lloyd M. Dunn, Annie Daugherty, 1955 **Teachers of Children who are Blind** Romaine Prior Mackie, Lloyd M. Dunn, 1956 *Language Development and Social Interaction in Blind Children* Miguel Perez Pereira, Gina Conti-Ramsden, 2019-12-09 The Classic Edition of this foundational text includes a new preface from Miguel P rez Pereira examining how the field has developed since first publication The volume provides an in depth account of blind children s developing communicative abilities with particular emphasis on social cognition and language acquisition from infancy to early school age It provides insights into why the development of blind children may differ from that of sighted children and explores development of theory of mind and perspective taking in language learning It also discusses the caregiver child interaction research on early intervention and practical strategies for blind children that can assist parents and practitioners The up to date preface discusses recent neurological research and the comparison between the psychological development of visually impaired and autistic children *Language Development and Social Interaction in Blind Children* continues to facilitate dialogue between those interested in the study of typically developing children and those interested in the development of children who are blind and challenges some widely held beliefs about the development of communication in blind children *Living and Learning with Blind Children* Felicity Harrison, Mary Crow, 1993-01-01 Blind and visually impaired children experience the world in unique ways To help them learn and develop parents and teachers need to understand how such children relate to their environment The authors offer practical strategies for encouraging the blind child s development and interaction Paper edition 7700 5 17 95 Annotation copyright by Book News Inc Portland OR **Bulletin** , 1955 *The Blind Child* Rudo Moyo, 2008-06-12 The book highlights the problems and challenges encountered by disabled people especially the blind in their endeavour to climb the social ladder It is a portrayal of the negative attitude among the public at large towards disability Society associates disabled people with failure and under achievement which is of course untrue The book is indeed an autobiography of the author himself as he struggled with social prejudices and marginalisation in country where there was scarcity of resources The main character Tarutamba is Rudo himself and Mutsai is his wife Mukai The book shows how vulnerable visually impaired people are They are taken advantage of by playmates family members and other misguided members of the society It should be remembered that visual impairment is in the eyes and therefore blind people are capable of doing a lot of things which do not require sight Males can impregnant whilst females can be impregnated The account also tries to give encouragement to those members of society who are disabled and therefore render themselves useless The book is also a mirror of social practices and beliefs of the people of Belingwe in Zimbabwe Its other aspect is the manner in which the way of the natives life is disrupted by the advent of the white men **Children with Disabilities in America** Philip L. Safford, Elizabeth J. Safford, 2005-12-30 Images of disabled children are found throughout well known works of literature film and even opera

Their characters range from sweet to brave to tragic Disabled children are also a part of the reality of life either in personal ways or as poster girls and boys for drives and causes Behind these images is a historical presence that has been created by the societies in which these children live and have lived This work examines current knowledge about children s experience of physical cognitive and emotional behavioral impairments from the Colonial period to the present while revealing the social constructions of both disability and childhood throughout American history Just as disability has been advanced as an essential consideration in other historical inquiries such as that of gender this is a work intended to demonstrate the critical role of disability with respect to the history of childhood

Blindness and Children David H. Warren,1994-08-26 This study concludes that many aspects of delayed development are not the result of visual impairment itself but rather of environmental variables that tend to accompany it after summarizing and interpreting the research literature on infants and children with visual impairments
