Resin Transfer Moulding for Aerospace Structures T. Kruckenberg, R. Paton, 2012-12-06 Resin Transfer Moulding and other similar liquid moulding manufacturing methods have been used to make non structural composites for the last 35 years. However in the last eight years these methods have become the subject of enormous interest by aerospace manufacturing companies. *Resin Transfer Moulding for Aerospace Structures* describes all aspects of Resin Transfer Moulding (RTM) for aerospace structures. Written by an international team of experts from both industry and academia it is a comprehensive work providing complete and detailed information on the process of RTM from theoretical modelling to practical experience. With subjects including manufacturing tooling, fabric design and flow modelling all covered, this book is an invaluable up to the minute reference source which provides the reader with a good understanding of RTM and its possible uses, especially for high performance applications. *Resin Transfer Moulding for Aerospace Structures* is an ideal guide for those in the aerospace and related industries who want to understand and utilize RTM as well as those directly involved in the RTM industry.

Composites and Their Properties Ning Hu, 2012-08-22 Composites are a class of material which receives much attention not only because it is on the cutting edge of active material research fields due to appearance of many new types of composites e.g. nanocomposites and bio medical composites but also because there are a great deal of promises for their potential applications in various industries ranging from aerospace to construction due to their various outstanding properties. This book mainly deals with fabrication and property characterization of various composites by focusing on the following topics: functional and structural nanocomposites; numerical and theoretical modelling of various damages in long fiber reinforced composites and textile composites; design, processing and manufacturing technologies and their effects on mechanical properties of composites; characterization of mechanical and physical properties of various composites and metal and ceramic matrix composites. This book has been divided into five sections to cover the above contents. *Advancement of Braiding/resin Transfer Molding from Commercial to Aerospace Applications* Garrett C.
