

The Emergence of Resource-Based Learning

RBL demands that students *actively* engage with multiple learning resources with well-articulated educational purpose (Lavery in Armatas et al, 2003). This type of learning environment does not exclude group interactions in the classroom and/or mediated through some computer-based communication environment.

Digital age has influenced in adapting resources and has changed nature of a resource.

Gijselaers, Richard G. Milter, John E. Stinson, 2005-12-17 The workplace is changing drastically these days As a consequence of the Information and Communication Technology ICT revolution new economic activities emerge the production process changes people use different communication tools and organizational structures are adjusted All these changes relate to the heart of business and economics and there is no doubt that they will also influence education in these areas Of course ICT provides new technologies to facilitate learning but a changing workplace also requires a renewed focus within the curriculum of economics and business education If ICT is leading to profound change in the workplace is innovation then only a matter of introducing more technology in education Unfortunately this is not necessarily true The translation of changes in the workplace into an improved curriculum requires serious analysis of the essence of the changes at the work place and the way technology may enable student learning For example relevant knowledge is changing faster and faster Does this mean that we have to adopt the curriculum faster and faster Perhaps not as students will have a labor market career of 30 or 40 years Focusing on today's knowledge even if it is very up to date loses more and more value if the life cycle of knowledge becomes shorter Increased speed of change also implies a decrease in the value of knowing all these things *The Research Student's Guide to Success* Pat Cryer, 2006-09-16 A must read for all research students The core material in Professor Cryer's previous editions is classic I welcome this new edition setting it into current contexts PhD supervisor When I was doing my own PhD Pat Cryer's book was my constant reference companion Now I am recommending her latest edition to my own students PhD supervisor Insightful wide ranging and accessible this is an invaluable tool for postgraduate research students and for students at all levels working on research projects irrespective of their field of study This edition has been thoroughly revised to accommodate the changes in postgraduate education over recent years Additional material and new emphases take into account the QAA Code of Practice for Postgraduate Research Programmes recommendations of the Roberts Review the needs of the growing number of overseas research students employment issues including undergraduate teaching the Internet as a resource for research There are new chapters on developing the research proposal succeeding as an overseas research student ethics in research personal development planning PDP **Encyclopedia of Library and Information Science, Second Edition** - Miriam Drake, 2003-05-20 A revitalized version of the popular classic the Encyclopedia of Library and Information Science Second Edition targets new and dynamic movements in the distribution acquisition and development of print and online media compiling articles from more than 450 information specialists on topics including program planning in the digital era recruitment information management advances in digital technology and encoding intellectual property and hardware software database selection and design competitive intelligence electronic records preservation decision support systems ethical issues in information online library instruction telecommuting and digital
