## **Respiration Calorimeter With Appliances:**

*A Respiration Calorimeter with Appliances for the Direct Determination of Oxygen* Wilbur Olin Atwater, 1905     **A**  
Respiration Calorimeter with Appliances for the Direct Determination of Oxygen Francis Gano Benedict, Wilbur Olin Atwater, 2016-05-23 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant     **A**

**Respiration calorimeter with appliances for the direct determination of oxygen** Wilbur Olin Atwater, 1905     **A**  
**Respiration Calorimeter With Appliances for the Direct Determination of Oxygen (Classic Reprint)** Wilbur Olin Atwater, 2015-07-05 Excerpt from *A Respiration Calorimeter With Appliances for the Direct Determination of Oxygen* The apparatus to be described in this report has been in process of development for twelve years During this time the resources of Wesleyan University have been supplemented by appropriations from the United States Department of Agriculture and the Connecticut Storrs Agricultural Experiment Station and by contributions from private individuals In aid of a series of experiments with the apparatus in its earlier stages grants from the Elizabeth Thompson Science Fund and the Bache Fund were obtained The addition of the apparatus for the determination of oxygen was made possible by liberal grants from the Carnegie Institution of Washington In the development of apparatus necessarily so elaborate as this the active cooperation of a skillful instrument builder is absolutely essential It has been our good fortune to have the service of Mr S C Dinsmore whose mechanical skill has insured the successful operation of many parts of the apparatus Dr Paul Murrill formerly associated with this research rendered invaluable assistance in devising the methods of computation Mr R D Milner and Mr H L Knight have assisted materially in the preparation of this report Dr E B Rosa physicist of the National Bureau of Standards but previously professor of physics at Wesleyan University was actively engaged in this investigation in its earlier stages and has subsequently from time to time given advice which has assisted greatly in the furtherance of the work The first grant of the Carnegie Institution for the development of the apparatus for the direct determination of oxygen was made to my colleague Prof W O Atwater It was then expected that the report containing the description of the apparatus would be issued under the joint authorship of Professor Atwater and the writer It has been deemed fitting therefore to retain his name

oil the title page of this report A serious illness has compelled his untimely retirement from the work and the writer who has had the personal supervision of the development of the apparatus since 1895 has continued the research Inasmuch as this report has been written some of the apparatus herein described has been developed and the experiment with man has been carried out subsequent to Professor Atwater s retirement the writer assumes full responsibility for this report as it stands and against him alone should adverse criticism be directed About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

O. Atwater, F. G. Benedict, 2017-09-13 Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing or if necessary rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original and to the maximum degree possible gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality but also providing value to every one of our readers. Generally Trieste books are purchased singly on demand; however, they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates. Respiration Calorimeters for

1844-1907, HardPress, 2013-06 Unlike some other reproductions of classic texts 1 We have not used OCR (Optical Character Recognition) as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits, maps, sketches etc. We have endeavoured to keep the quality of these images so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy. **A Respiration Calorimeter with Appliances for the Direct Determination**

**of Oxygen - Primary Source Edition** Francis Gano Benedict, Wilbur Olin Atwater, 2013-10 This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks etc. that were either part of the original artifact or were introduced by the scanning process. We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the

preservation process and hope you enjoy this valuable book      **A Respiration Calorimeter with Appliances for the Direct Determination of Oxygen** W.O.
