Responding To Drinking Problems:

Responding to Drinking Problems Stan Shaw, Alan Cartwright, Terry Spratley, Judith Harwin, 2023-12-01 In the 1970s family doctors social workers researchers and administrators had been aware of the inadequacy of the response to drinking problems for some time However there had been no systematic examination of why such agents felt negatively about drinkers and disinclined to respond to them Originally published in 1978 this book develops a radical new perspective on the prevalence and causes of drinking problems combining reviews of historical and contemporary literature with the authors own research studies This perspective is then linked to the need for an integrated response from both medical and social services with a particular accent on the need for a community response By focusing on the relationship between helper and helped a solution is sought to the question which has troubled the field for many years why are agents like family doctors and social workers so inadequate in recognising and responding to people with drinking problems The crucial aspects within the therapeutic relationship are pinpointed and experimental studies are described which show how training casework supervision and the redeployment of expertise can help improve recognition rates and responses to individual drinkers This book thus expresses the need for major changes both in our attitudes and understanding of people with drinking problems and the difficulties of agents who try to help them It should still be of historical interest to social scientists and those involved in helping people with drinking problems *Responding to Drinking Problems* Stan Shaw, 1978

Responding to the Homeless Russell K. Schutt, Gerald R. Garrett, 2013-11-21 *Responding to the Homeless Policy and Practice* is largely a product of a unique collaboration between Russell K Schutt and Gerald R Garrett and their Boston community As such it offers a rich perspective on the problem of homelessness that is derived from the authors shared experience with researchers academics students providers policymakers and homeless persons themselves Schutt and Garrett take the reader into the shelters and acquaint him or her with the philosophical and practical dilemmas facing line workers as well as policymakers They also take the reader into the community to better understand the housing market and the dysfunctional continuities among shelter housing treatment and social supports There are sensitive discussions of the salient health problems that too commonly touch the lives of homeless individuals such as substance abuse and AIDS The volume also includes clear descriptions of the sometimes elusive processes of counseling and case management for homeless individuals The sidebars of what to do and what not to do contain useful information that will both inform and empower individuals who are working on the front lines and inspire and prepare future caregivers While the eminently readable organization and style of the book are suggestive of a highly practical handbook on the basics of homelessness the authors and their contributors have also produced a scholarly volume that is replete with current research findings programs descriptions case studies and vignettes

Gay Men, Drinking, and Alcoholism Thomas S. Weinberg, 1994 Alcohol use is an integral part of the gay world According to some estimates the rate of problem drinking is about three times higher among gays than in mainstream society but few researchers have examined this phenomenon in depth Thomas S Weinberg's ethnographic study provides new insight into the role of drinking in the gay male community Weinberg utilizes interviewing and participant observation techniques in a variety of drinking related settings in the gay subculture of Paradise City the fictitious name of a large western city where he carried out his research Emphasizing drinking as social behavior Weinberg explores the ways social contexts such as bars love relationships and reference groups affect individual drinking patterns and concludes that drinking is intimately entwined with friendship networks and extended families in the gay world Weinberg is concerned not only with

alcoholism but with variation in alcohol use and changes in alcohol use over time He employs the concept of career to explain why and how an individual's drinking might either increase or decrease over the course of his lifetime Letting his informants speak for themselves Weinberg directs attention to their own perspectives on the meaning of their drinking behavior After creating a typology of drinkers including self defined as well as researcher defined alcoholics Weinberg considers alternative explanations for gay problem drinking He thoroughly explores the gay bar scene its importance in gay life and the way that interactions within the bar environment affect drinking and risk taking specifically as they relate to HIV Weinberg also looks closely at self defined gay alcoholics and considers three alternative explanations for gay problem drinking the alienation thesis the influence of parental role models and reference group theory He rejects the alienation thesis and the influence of parental role models because these causal factors were not borne out by his statistical correlations Instead Weinberg finds the most powerful explanation in reference group theory which links individuals behavior to the norms of the social groups they identify with Finally he arrives at a processual model of gay problem drinking based on his data analysis By comparing alcohol use in the homosexual and heterosexual communities Weinberg provides a new perspective on gay problem drinking that will interest sociologists psychologists and clinicians as well as concerned lay readers in the gay community He cites examinations of large scale survey research on tavern attendance and drinking ethnographic studies of bar behavior literature on special groups and studies of marital interaction in alcoholic families concluding that gay drinking is a special situation that only reference group theory and a processual model adequately address The closing chapter contains policy recommendations for reducing alcohol use in the gay community

Community Response to Alcohol-related Problems

I. Rootman, 1985 *Helping the Problem Drinker* Tim Stockwell, Sue Clement, 2023-12-01 Originally published in 1987 *Helping the Problem Drinker* addressed the realisation that only a small proportion of problem drinkers ever contacted existing treatment agencies and that therefore a more comprehensive community oriented approach should be developed This included training of primary care health workers and the development of multidisciplinary Community Alcohol Teams At the time other community based initiatives such as self help groups for early problem drinkers and early intervention programmes in general practice and general hospitals had been implemented This book draws together what had been learned about these new developments a number of which had now been evaluated The book will still be of interest to all planners and professional staff concerned with alcohol problems both specialists and non specialists in general medicine psychiatry psychology and the social services
