Responsibility First Facts:

Blame D. Justin Coates, Neal A. Tognazzini, 2012-12-27 One mark of interpersonal relationships is a tendency to blame But what precise evaluations and responses constitute blame Is it most centrally a judgment or is it an emotion or something else Does blame express a demand or embody a protest or does it simply mark an impaired relationship What accounts for its force or sting and how similar is it to punishment The essays in this volume explore answers to these and other questions about the nature of blame but they also explore the various norms that govern the propriety of blame The traditional question is whether anyone ever deserves to be blamed but the essays here provide a fresh perspective by focusing on blame from the blamer's perspective instead Is our tendency to blame a vice something we should work to replace with more humane ways of relating or does it rather lie at the very heart of a commitment to morality What can we legitimately expect of each other and in general what sort of attitude do blamers need to have in order to have the standing to blame Hypocritical or self-righteous blame seems objectionable but why The contributions to this volume aim to give us a fuller picture of the nature and norms of blame and more generally of the promises and perils of membership in the human moral community

Consideration Sarah L. Schuette, 2007-12 Introduces consideration through examples of everyday situations where this character trait can be used Politics and Metaphysics in Kant Sorin Baiasu, Sami Pihlström, Howard Williams, 2011-05-15 The past three decades have witnessed the emergence of several Kantian theories Both the critical reaction to consequentialism inspired by Rawlsian constructivism and the universalism of more recent theories informed by Habermasian discourse ethics trace their main sources of inspiration back to Kant's writings *Evidence in European Asylum Procedures* Ida Staffans, 2012-04-19 This book focuses on three European asylum procedures and the evidentiary assessment carried out in these The interrelationship between these procedures and legal systems influencing them is explored and questions in relation to the harmonizing strivings of EU are posed *The Death and Resurrection of Jesus* Donald J. Goergen, 2003-09-04 **The Oxford Handbook of International Trade Law** Daniel Bethlehem, Donald McRae, Rodney Neufeld, Isabelle Van Damme, 2009-01-08 Over the past 10 years the content and application of international trade law has grown dramatically The WTO created a binding dispute settlement process and in resolving disputes the judicial organs of the WTO have built up a substantial amount of new international trade law Emerging from this new WTO process is an international trade law system that is in some respects self-contained and in other respects overlapping and linked to other international legal economic and political regimes The boundaries of trade law are now generating enormous interest and controversy which at a broader level is subsumed within the debate over globalisation The detailed development of the rules of international trade is being examined with increasing frequency by scholars government officials and trade law practitioners But how does it fit with existing systems How it is modified by them How does the international trade law system affect and modify other regimes This Handbook places international trade law within its broader context providing

comment and critique on contemporary thinking on a range of questions both related specifically to the discipline of international trade law itself and to the outside face of international trade law and its intersection with States and other aspects of the international system. It examines the economic and institutional context of the world trading system, its substantive law including regional trade regimes and the settlement of disputes. The final part of the book explores the wider framework of the world trading system considering issues including the relationship of the WTO to civil society, the use of economic sanctions, state responsibility and the regulation of multinational corporations. Oxford Handbooks offer authoritative and up to date surveys of original research in a particular subject area. Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates. Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences.

Facts and Evidence Baosheng Zhang, Shijun Tong, Jing Cao, Chuanming Fan, 2021-01-04. This book presents an in depth discussion on two concepts from the field of philosophy and law in order to improve our understanding of the relation between fact and evidence in judicial process. Since fact finding is a difficult task for judges, proof by evidence has been devised to help them access the truth. However, in the process of judicial fact finding, there is always a gap between fact and truth. This book covers a wide range of topics from reflections on the concept of fact, evidence and fact finding in the field of philosophy and law to individual case studies. As such, it is a useful reference resource on the continuing research on the judicial proof process for students and scholars.

Praxiology and the Reasons for Action Piotr Makowski, 2017-07-05. This volume explores two traditions in practical philosophy: action theory, which concerns the nature of motivation for human action, and praxiology, the study of human action. By bringing different perspectives together, the volume strives to contribute to the international debate on theories of reasons for action as a philosophy of action. The volume consists of three main parts. The first part, *Reasons for Action*, bridges the gap between reasons for action theories and praxiology. The second part of the volume, titled *Theories of Action*, explores philosophical approaches to action. Finally, in the third part, *Applications*, the contributors show several ways of applying praxiological ways of thinking and acting to the problems of reflection, assessment, solving action incompleteness and knowledge management. The ultimate goal of this volume is to broaden the scientific view of action, to establish a perspective on action that is permeated by moral theories on the one hand and accounts focused on efficiency and economy of action on the other hand. This work is the newest volume in the Transaction's Praxiology series.
