Beutler,Karen M. Simon,2013-06-29 In reviewing the Contents of this Handbook edited by Freeman Simon Beutler and Arkowitz I am both impressed and gratified with the enormous strides made by cognitive behavior therapy since the late 1960s A perusal of the Contents reveals that it is used with adults children couples and families it is clinically appropriate for such problems as anxiety depression sexual dysfunctions and addictions and it is employed in conjunction with psychopharmacological and other psychotherapeutic interventions It was in the mid 1960s when Breger and McGaugh published an article in the Psychological Bulletin taking behavior therapists to task for using only classical and operant principles in devising their therapeutic interventions Breger and McGaugh argued that the field of learning was undergoing a major revolution paying considerably more attention to cognitive processes than had previously been the case In short they criticized the growing behavioral orientation for being limited in its exclusively peripheralistic orientation At the time behavior therapists were initially somewhat resistant to any allusion to cognitive metaphors Indeed my own initial reactions to the Breger and McGaugh article was quite negative Yet in rereading their critique many of their suggestions now seem most appealing No doubt I and my behavior colleagues lacked the appropriate cognitive set for incorporating such contradictory information Nonetheless the clinical evidence for the relevance of cognitive factors in the behavior change process was simply too compelling to ignore **The Counselor and the Group, Fourth Edition** James P.

EFFECTS OF SOCIAL SKILL TRAINING ON ADAPTATION ÖMER GÖKEL, Social relations are the most significant part of a human s life A person spends an important part of his daily routine communicating with others The quality of these relations plays an important role both in the life of an individual and the life of a society Among one of the most important facts determining the development of social relations comes social skills In other words having a sufficient set of social skills helps build healthy social relations with others On the other hand lack of sufficient social skills may cause negative results in the mutual interaction among individuals and adaptation to the environment and this in turn leads to incompetence in social skills Adaptation to the society is related to persons understanding and forwarding the feelings thoughts and wishes of each other While it is easy for some to forward emotions and thoughts to start and maintain a social relationship some have difficulties in establishing and maintaining healthy social relationships This study investigates the effectiveness of the social skills program applied to people who have adaptation problems and have problems in establishing and maintaining healthy relationships

Racial Sensitivity and Multicultural Training Martin Strous,2004-01-30 Offering implications for democratizing psychology on a global scale this work illustrates how professional training for mental health practitioners is often inadequate on issues pertaining to race and racism The author shows prime examples in his homeland South Africa and focuses on how those practices reflect assumptions concerning racial superiority Also addressed is how therapists may be influenced by prevailing ideologies unaware of how prejudices translate into discriminatory work practices and ignorant of the power of their own discriminatory discourses The author also investigates how positive attitudes by counselors and therapists reflect positions related to racial sensitivity He proposes a new model for multicultural and multiracial sensitivity training
