The Restless Earth Set, 6-Volumes Chelsea House Publishers,2009-05-01 The Earth is a dynamic entity continually shifting and moving Though it supports life the Earth is a restless planet capable of powerful destruction The new colorfully illustrated set The Restless Earth introduces essential geology topics such as plate tectonics erosion and deposition to readers and details the forces that are both powerful and potentially destructive on the third planet from the sun Each highly readable title features full color photographs and illustrations that lend visual interest to understanding these topics This essential set for young readers was developed in collaboration with the Franklin Institute Science Museum in Philadelphia a leader in science learning **Hope for the Earth** Ernst M. Conradie,2005-05-18 Hope for the Earth explores the viability of an eschatological approach to an ecological theology spirituality and praxis in the South African context The basic intuition of such an eschatological approach is that an environmental praxis can only be empowered on the basis of an adequate understanding of Christian hope Despair in the face of environmental destruction will inevitably lead to a spirit of resignation Where then can a vision of hope that includes hope for the earth be found The author proposes a road map for eschatology based on the observation that eschatology has traditionally responded to three aspects of the human predicament namely 1 the evil effects of sin 2 the problem of finitude and transience and 3 the limitations of human power and knowledge in space Part A This analysis is used to fathom the depths of despair as a result of environmental destruction Part B The Biblical roots and subsequent history of Christian eschatology are discussed briefly Part C Recent contributions in Christian eschatology ecological theology cosmology and South African expressions of hope are explored in depth in search of a vision of hope that includes hope for the earth itself Part D The eschatological road map is used to develop a vision of hope for the earth on the basis of a theology of life life amidst death and destruction life beyond death and eternal life in the presence of God Part E Finally the implications of this vision for an ecological ethos spirituality and praxis in the South African context are indicated Part F Earth Connor Dayton,2014-07-15 There is no denying that the earth is a beautiful place with its oceans mountains deserts and plains but there is even more to discover and appreciate when we take a closer look at it Earth s composition resources and other stimulating topics are discussed with clear language and kid friendly illustrations that will help readers see the world around them in a scientific light Earth Frank Townshend,1929 *Earth* Stuart Clark,2007-07-17 What does the Earth look like from space How was the Earth made When did life begin on Earth Find the answers in this book Learn how Earth is still being formed today Discover that our solid Earth is not completely solid deep inside See evidence

that Earth has been touched by asteroids from outer space **Earth** John Malam,2001-02-15 Want to know all about Earth from how it was formed to how its climate varies Look at our small blue planet s position in space and the solar system its amazing structure what is it made of and how it is changing and it s marvelous geographical features volcanoes rivers mountains and its life giving gifts of water and air Facts and figures complete a perfect planetary picture *Here on Earth* Tim Flannery,2011-04-05 From the internationally acclaimed scientist explorer and conservationist comes an awe inspiring account of earth s evolution Beginning at the moment of creation with the Big Bang Here on Earth explores the evolution of Earth from a galactic cloud of dust and gas to a planet with a metallic core and early signs of life within a billion years of being created In a compelling narrative Flannery describes the formation of the Earth s crust and atmosphere as well as the transformation of the planet s oceans from toxic brews of metals such as iron copper and lead to life sustaining bodies covering seventy percent of the planet s surface Life Flannery shows first appeared in these oceans in the form of microscopic plants and bacteria and these metals served as catalysts for the earliest biological processes known to exist From this starting point Flannery tells the fascinating story of the evolution of our own species exploring several early human species from the diminutive creatures the famed hobbits who lived in Africa around two million years ago to Homo erectus before turning his attention to Homo sapiens Drawing on Charles Darwin s and Alfred Russel Wallace s theories of evolution and Lovelock s Gaia hypothesis Here on Earth is a dazzling account of life on our planet You ll discover why Tim Flannery s books have made him the rock star of modern science Jared Diamond Pulitzer Prize winning author of Guns Germs and Steel
