Established in the belief that imperialism as a cultural phenomenon had as significant an effect on the dominant as it did on the subordinate societies the Studies in Imperialism series seeks to develop the new socio cultural approach which has emerged through cross disciplinary work on popular culture media studies art history the study of education and religion sports history and children s literature The cultural emphasis embraces studies of migration and race while the older political and constitutional economic and military concerns are never far away It incorporates comparative work on European and American empire building with the chronological focus primarily though not exclusively on the 19th and 20th centuries when these cultural exchanges were most powerfully at work This work explores the sexual attitudes and activities of those who ran the British Empire The study explains the pervasive importance of sexuality in the Victorian Empire both for individuals and as a general dynamic in the working of the system Among the topics included in the book are prostitution the manners and mores of missionaries and aspects of race in sexual behaviour The Future of the U.S.-Soviet Nuclear Relationship National Academy of Sciences,Committee on International Security and Arms Control,1991-02-01 The United States and the Soviet Union could drastically reduce their nuclear arsenals below the levels prescribed by the new Strategic Arms Reduction Treaty START The end of the Cold War and the transformation of international security now under way present the United States with opportunities to develop new policies based on greater international cooperation with the Soviet Union and other major powers This new book describes two lower levels of nuclear forces that could be achieved as well as other related measures to improve international security **The Arms Race in an Era of Negotiations** David Carlton,Carlo Schaerf,1991-08-05 The countries of NATO and the Warsaw Pact have begun to negotiate for nuclear and conventional arms reductions The world is no longer bipolar as the arsenals of China France and Britain become more significant This book looks at strategic realities and current global and European problems *Professional Journal of the United States Army* ,1990 German Security Policy Peter Goebel,1999 *Soviet Military Power In A Changing World* Susan L Clark,2019-06-04 Many people have been instrumental in helping see this book through to completion First I want to thank Robbin Laird not only for his professional encouragement over the years but especially for his suggestion to do this book in the first place Nor would this effort have been possible or nearly as enjoyable without the support and friendship of Susan McEachern I would also like to thank Jackie Evans for her assistance in helping to prepare the manuscript *Problems and Perspectives of Conventional Disarmament in Europe* United Nations Institute for Disarmament Research UNIDIR,2021-01-26 This book first published in 1989 explores the ideas proposals and counterproposals surrounding the thorny issue of Cold War conventional force disarmament in Europe European nations acknowledged the need to reduce military tensions but divergences remained as to the concrete ways and means for the attainment of the security objectives on the basis of mutually acceptable reductions of their respective forces A UNIDIR organized conference examined these issues and presented here are the conference reports and findings together with speaker responses *Conventional Arms*

Control and East-West Security Institute for East-West Security Studies,1989 This important and timely work prepared by the leading researchers planners and policymakers from both Eastern and Western alliances analyzes the major issues in the Vienna talks on conventional forces in Europe involving NATO and Warsaw Pact nations It is likely to have a significant influence on the course of these negotiations and on emerging debate on conventional arms control The contributors met in Moscow prior to the Vienna conference to review and compare their analyses and revised them thereafter for publication in this work

The New Germany and the New Europe Paul B. Stares,2010-12-01 Since the first heroic and largely spontaneous acts precipitated the end of the Cold War Europe has been transformed in a truly remarkable and wholly unforeseen manner Germany has been unified the Warsaw Pact has collapsed and the Soviet Union has disintegrated leaving in its wake many new independent states These momentous events have taken place so rapidly and often in such confused circumstances that their full meaning has barely been comprehended let alone assimilated A clearer and deeper appreciation of the forces and processes unleashed by the recent changes is vitally important however to meet the challenges and exploit the opportunities that now present themselves in Europe This volume therefore is intended to promote wider understanding of the key issues and it represents the most comprehensive assessment to date of the new Germany and the new Europe The volume begins with detailed accounts by U S and German scholars of how unification came about and the resulting changes to the political economy security policy and foreign relations A complementary section discusses the implications for the rest of Europe as well as Japan While the focus of the book is on the new Germany two separate chapters provide specific designs for a new adoption of a general system of cooperative security

Military R&D after the Cold War Philip Gummett,Mikhail Boutoussov,Janos Farkas,Arie Rip,2012-12-06 Countries establish defence industries for various reasons Chief among these are usually a concern with national security and a desire to be as independent as possible in the supply of the armaments which they believe they need But defence industries are different from most other industries Their customer is governments Their product is intended to safeguard the most vital interests of the state The effectiveness of these products in the real rather than the experimental sense is not normally tested at the time of purchase If or when it is tested many other factors such as the quality of political and military leadership enter into the equation so complicating judgments about the quality of the armaments and about the reliability of the promises made by the manufacturers All of these features make the defence sector an unusually political industrial sector This has been true in both the command economies of the former Soviet Union and its satellites and in the market or mixed economies of the west In both cases to speak only a little over generally the defence sector has been particularly privileged and particularly protected from the usual economic vicissitudes In both cases too its centrality to the perceived vital interests of the state has given it an unusual degree of political access and support

Bulletin of the Atomic Scientists ,1988-09 **French Security Policy** Robbin F. Laird,2019-03-11 Beginning with a look at continuity and change in French policy since de Gaulle this book presents the evolution of French

security policy in the 1970s and 1980s Dr Laird pays special attention to the French nuclear modernization process and to the trend in the last two decades toward a greater emphasis on security interdependence within the Western alliance at the expense of the classic Gaullist stance of independence He examines the major dimensions of French security policy particularly French nuclear employment policy and doctrine the Franco German relationship and France's role in Europe and in East West relations The book features the first time translation of some of the most significant recent papers by leading French analysts of security affairs

The A to Z of NATO and Other International Security Organizations Marco Rimanelli, 2009-09-14 The North Atlantic Treaty Organization NATO is a military alliance established by the signing of the North Atlantic Treaty on April 4 1949 The treaty was signed by Belgium the Netherlands Luxemburg France United Kingdom United States Canada Portugal Italy Norway Denmark and Iceland Today there are a total of 26 countries that belong to NATO The A to Z of NATO and Other International Security Organizations covers the Atlantic Alliance's origins structure and organization through a chronology an introductory essay a bibliography and over 1 000 cross referenced dictionary entries on its Secretaries Generals its Supreme Allied Commanders Europe plus all affiliated organizations created to enhance NATO's reach in a broader Euro Atlantic security architecture e g North Atlantic Consultative Council Euro Atlantic Partnership Council NATO Russia Charter NATO Ukraine Charter and NATO Mediterranean Dialogue Partners This book also covers other related regional organizations with security responsibilities in Europe and worldwide where they interact with NATO either currently e g ANZUS ASEAN European Union Organization of African Unity Organization of American States Organization on Security and Cooperation in Europe and United Nations or in the past e g CENTO European Defence Community SEATO Warsaw Pact and Western European Union

European Security in the 1990s W. Laqueur, L. Sloss, 2013-11-11 Rarely if ever have the political economic and military foundations of the Western Alliance been in such a state of flux Walter Laqueur and Leon Sloss therefore deserve credit not just for the quality of the analysis in this superb book but also for the timeliness of its appearance As Laqueur says in his chapter Touring the Western European Defense Horizon if the likely development of European defense policies is not particularly reassuring at least it gives no grounds for despair The list of problems we face is a daunting one First there is the spiralling cost of defense expenditures particularly in the absence of significant NATO or inter European cooperation This is particularly serious in light of the reluctance to increase or even maintain current expenditures in the midst of Mikhail Gorbachev's peace offensive and the extraordinary changes in Eastern Europe both of which have had a dramatic impact on Western public opinion There is also a problem in the perceived relative economic decline of the United States vis a vis Western Europe and Japan which only exacerbates calls to reduce the number of American troops in Europe Other dangers to the political cohesion and military credibility of the alliance include demographic trends that threaten current manpower levels transatlantic acrimony over the burden sharing issue and political pressures particularly in West Germany toward denuclearization and even neutralism
