US China and Japan **Poverty and Social Impact Analysis by the IMF** Mr. Robert Gillingham, 2008-03-17 The Poverty Reduction and Growth Facility PRGF is used by the IMF to provide support for countries implementation of their poverty reduction and growth strategies A key requirement in the design of PRGF programs is understanding the effects of reform program measures on vulnerable groups particularly the poor and how to devise measures to mitigate any negative effects Poverty and social impact analysis PSIA is a critical instrument for pursuing this goal The IMF has therefore established a small group of staff economists to facilitate the integration of PSIA into PRGF supported programs In this book the group s members review analytical techniques used in PSIA as well as several important topics to which PSIA can make valuable contributions These reviews should prove useful and interesting to readers interested in PSIA in general and the IMF s PSIA efforts in particular Research in Asian Economic Studies ,1989* China's Employment Challenges and Strategies After the WTO Accession Douglas Zhihua Zeng, 2005 Although China has made impressive progress in economic development and improving social well being it is facing many daunting challenges while transforming toward a knowledge and service based economy and further opening up to international competition after its WTO accession in the context of knowledge revolution One of the biggest challenges is how to create 100 300 million new jobs in the coming decade to absorb the millions of laid offs rural emigrants and newly added labor force China has been successful in building high technology parks and information and communications technology ICT industries but they are limited in terms of employment generation while most of the traditional labor intensive industries are losing competitiveness due to low productivity To combat the unprecedented employment challenge China must implement a systemic and sustained strategy Cover verso **The Contribution of Human Capital towards Economic Growth in China** John Joshua, 2015-06-30 This book develops a human capital model to explain transformational growth within different stages of economic development which will induce technological changes and consequently will require a change in human capital China is a case study in transition and can provide useful lessons to other emerging economies **Methodology for Impact Assessment of Free Trade Agreements** Asian Development Bank, 2011-02-01 This publication displays the menu for choice of available methods to evaluate the impact of Free Trade Agreements FTAs It caters mainly to policy makers from developing countries and aims to equip them with some economic knowledge and techniques that will enable them to conduct their own economic evaluation studies on existing or future FTAs or to critically re examine the results of impact assessment studies conducted by others at the very least *South Asian Economic Development* Moazzem Hossain, Rajat Kathuria, Iyanatul Islam, 2010 South Asia s developing nations have been enjoying moderate to high growth over the past decade before the global recession began This new edition provides an up to date guide to the growing markets in South Asia It offers an analysis of the changes and consequences of high sustainable growth investigating what has been achieved in the region during the last ten years from a macroeconomic viewpoint identifying new challenges and clearly defining what has driven the boom The first part of the

Crisis and Predation The Research Unit for Political Economy, 2020-11-15 How India's COVID 19 lockdown is creating an unprecedented humanitarian disaster With the advent of COVID 19 India's rulers imposed the world's most stringent lockdown on an already depressed economy dealing a body blow to the majority of India's billion plus population Yet the Indian government's spending to cushion the lockdown's economic impact ranked among the world's lowest in GDP terms resulting in unprecedented unemployment and hardship Crisis and

Predation shows how this tight fistness stems from the fact that global financial interests oppose any sizable expansion of public spending by India and that Indian rulers readily adhere to their guidance. The authors reveal that global investors and a handful of top Indian corporate groups actually benefit from the resulting demand depression armed with funds they are picking up valuable assets at distress prices. Meanwhile under the banner of reviving private investment India's rulers have planned giant privatizations and drastically revised laws concerning industrial labor the peasantry and the environment in favor of large capital. And yet this book contends India could defy the pressures of global finance in order to address the basic needs of its people. But this would require shedding reliance on foreign capital flows and taking a course of democratic national development. This then is a pursuit not for India's ruling classes but a course of struggle for India's people. *The Rise and Decline of the Asian Century* Christopher Lingle, 2019-03-25 First published in 1997 this volume reflects an attempt to put order in the place of what appears to be chaos amidst East Asia's rapid dash toward economic development. With experiences of Turkey during and after martial law Italy during the Red Brigade England during the Winter of Discontent post Franco Spain's stumbling embrace of democracy Poland in the beginning of the solidarity movement South Africa in the crumbling of apartheid China during the early student protests and Europe when the Iron Curtain was lifted Christopher Lingle applies these ideas to modern developments in East Asia providing an intriguing counter intuitive refreshing take on its economies. *Crisis and Innovation in Asian Technology* William W. Keller, Richard J. Samuels, 2003-02-03 In mid May 1997 a financial crisis erupted in Asia after an attack by private investors on the baht the Thai currency. The crisis spread quickly across the region where investor confidence plummeted resulting in massive capital outflows stock market collapses high unemployment and even insurrection. The Asian economic miracle that had stimulated so much awe and even dread now invoked pity and apprehension in greater measure. The contributors to this volume investigated change in the innovation and production systems of Asian states in response to economic and political upheaval. They conducted empirical studies of several regional industries autos semiconductors and hard disk drives and seven different national economies China Malaysia Japan Singapore South Korea Thailand and Taiwan. In the face of crisis and global competition the Asian states superimposed change at the margins seeking unique technohybrid solutions to build capabilities to compete in local regional and even global markets. *Economic Development of Emerging East Asia* Frank S.T. Hsiao, Mei-Chu Wang Hsiao, 2017-09-27 *Economic Development of Emerging East Asia* presents economic studies of Taiwan and South Korea compares them chiefly with Japan and the United States and finds that these East Asian countries are still in the process of emerging in the world economy. A timely quantitative and econometric analysis of the regional economies of emerging East Asia the volume examines development indicators effects of the 1997 Asian financial crisis productivity growth catching up and convergence of long run real GDP per capita growth the time required for a country to catch up colonialism and economic development in Taiwan and India. Arranged in increasing complexity of economic analyses the chapters in this book provide a comprehensive

understanding of emerging East Asian economies In addition to serving as a handy reference for regional economists policy analysts and researchers *Economic Development of Emerging East Asia* can also be used as a textbook on economics and business

China's Economy Into the New Century John Wong, 2002 In the last two decades of the 20th century China stood out as the world's star performer in economic growth thanks to the market oriented reform that started in 1978 At the turn of the century the Chinese economy faces a series of challenges to sustain its growth and stability The two decade long rapid growth has effectively strengthened China's economic power and raised its people's standard of living It has also transformed China from a centrally planned command economy into a socialist market economy which operates increasingly in line with capitalist norms Major structural problems however remain and are growing acute Weakness in the fiscal system breeds rent seeking at the local level and causes tension in the state budget The flawed financial institutions and the biased ownership structure continue to distort resource allocation and cause huge efficiency losses Inter provincial and inter regional disparity is reaching a level that threatens national unity and social stability As China joins the World Trade Organization and becomes more integrated into the world economy it urgently needs to improve the domestic business environment and to beef up indigenous industries for foreign competition This volume is a collection of papers written by scholars at the East Asian Institute to address those problems during the period 1999-2001 The authors with their knowledge and experience in China studies provide in depth observations and professional analyses of some of the most important issues for the Chinese economy at the turn of the century Some of the observations and analyses lead to enlightening policy recommendations The solid scholarship combined with the policy orientation of these papers will appeal greatly to researchers in academia governments and other institutions The policy oriented and fact based analyses will also be of interest to practitioners in business including business consultants
