**A Confucian-Daoist Millennium?** Reg Little, 2006 **Chinese Culture, Western Culture** Tai Ng, 2007-02 This book explores how complementary Chinese and Western cultures are how they should learn from each other to establish a dynamic balance and how institutions need constant redefinition and renewal in order to prosper By studying the history and development of thought and philosophy in these cultures it suggests lessons from our past that may shed light on current events and help us in handling future challenges The book presents answers to the following important questions Do Chinese people think differently from Westerners and if so how and why What are the key differences between Chinese and Western culture and why How did China become the most technologically advanced and sociologically sophisticated nation in the world until the seventeenth century and why did it ultimately decline What are the key characteristics of political institutions in historical China and Europe and how were they significant In this postmodern time and era of globalization what can we learn from Chinese culture and experiences As China rapidly industrializes what can it learn from the West without repeating some of the mistakes that Europeans and North Americans made in their periods of industrialization

*An Economic History of China* Richard von Glahn, 2016-03-10 The first comprehensive study of China's economic development across 3 000 years of history to be published in English *Adam Smith in Beijing* Giovanni Arrighi, 2020-05-05 In the late eighteenth century the political economist Adam Smith predicted an eventual equalization of power between the West and the territories it had conquered In this magisterial new work Giovanni Arrighi shows how China's extraordinary rise invites us to reassess radically the conventional reading of *The Wealth of Nations* He examines how recent US attempts to create the first truly global empire were conceived to counter China's spectacular economic success Now America's disastrous failure in Iraq has made the People's Republic of China the true winner in the US War on Terror China may soon become again the kind of noncapitalist market economy that Smith described an event that will reconfigure world trade and the global balance of power

### **International Relations of Asia** David

Shambaugh, 2022-05-06 A 2023 Choice Reviews Outstanding Academic Title This is the most up to date and comprehensive volume on the international relations of Asia and the Indo Pacific The Asian region has become the fulcrum of international relations globally it is the most economically vibrant geostrategically significant socially and culturally diverse and militarily dangerous region in the world The world's leading great powers the United States and China jockey for primacy and vie for influence throughout the region while middle powers India Indonesia Japan and South Korea are extending their regional reach The ten member Association of Southeast Asian Nations ASEAN is collectively important in its own right but has also become the epicenter of US China regional competition While Australia New Zealand and the Pacific Islands largely operate in their own orbits Australia has assumed growing regional impact North Korea and Taiwan are both significant actors but they are also each tinderboxes of potential conflict While the region is geographically sprawling across the Indo Pacific it is tied together economically technologically and strategically No one working in or on Asia cannot afford to read this volume

### Routledge Handbook of International Political Economy (IPE) Mark Blyth, 2009-06-02 The study of the International

Political Economy IPE like the IPE itself is plural and unbounded Despite what partisans sometimes say rather than there being one way of studying the IPE that is the right way we find across the world great variation in IPE scholarship in terms of focus questions and methods How then can we make sense of this and understand the field as a whole rather than simply learn one part of it This Handbook is designed to address precisely this concern It maps the shifting boundaries and diverse theoretical commitments of IPE around the world It engages the geographical and theoretical diversity of the different versions of IPE found in North America the UK in Asia and Australia and notes the absences of distinctive versions of IPE in Europe and Latin America The volume groups together the essential attributes and positions of each school inviting the reader to engage with and learn about IPE in all of its guises through this evolving global conversation Rather than adjudicate the one true version of IPE it argues that the intellectual diversity we see around the world is an essential and positive feature of the field With over twenty contributors from a wide range of countries Routledge Handbook of International Political Economy is an essential resource for all those with an interest in this complex and rapidly evolving field of study

**The Global in the Local** Xin Zhang, 2023-04-04 The story of globalization in the nineteenth and early twentieth centuries as experienced by ordinary people in the Chinese river town of Zhenjiang Fear swept Zhenjiang as British soldiers gathered outside the city walls in the summer of 1842 Already suspicious of foreigners locals had also heard of the suffering the British inflicted two months earlier in Zhapu A wave of suicides and mercy killings ensued rather than leave their families to the invaders hundreds of women killed themselves and their children or died at the hands of male family members British observers decried an Asian culture of ritual suicide In reality the event was sui generis a tragic result of colliding local and global forces in nineteenth century China Xin Zhang's groundbreaking history examines the intense negotiations between local societies and global changes that created modern China In the nineteenth and early twentieth centuries world historic political economic and technological developments transformed the textures of everyday life in places like Zhenjiang a midsize river town in China's prosperous Lower Yangzi region Drawing on rare primary sources including handwritten diaries and other personal writings Zhang offers a ground level view of globalization in the city We see civilians coping with the traumatic international encounters of the Opium War Zhenjiang brokers bankrolling Shanghai's ascendance as a cosmopolitan commercial hub and merchants shipping goods to market for the first time on steamships Far from passive recipients the Chinese leveraged resisted and made change for themselves Indeed The Global in the Local argues that globalization is inevitably refracted through local particularities
