## **Rethinking Bank Regulation Till Angels Govern:**

**Rethinking Bank Regulation** James R. Barth, Gerard Caprio, Ross Levine, 2008-05-12 This volume presents a new database on bank regulation in over 150 countries. It offers a comprehensive cross country assessment of the impact of bank regulation on the operation of banks and assesses the validity of the Basel Committee's influential approach to bank regulation. *Bank Regulations are Changing: for Better Or Worse?* J. R. Barth, G. Caprio, Jr., & R. Levine, *Banking Regulation in Africa* Folashade Adeyemo, 2021-12-28 There is little literature on the development of banking regulation in Nigeria or the scope of powers of the Central Bank of Nigeria which is its core banking sector regulator. The critical impetus of this book is to contribute to the literature of this area with a detailed exploration of the Nigerian regulatory architecture. In addition, the book also engages in a comparative analysis with two emerging economies in Africa, South Africa and Kenya. It also considers the UK and the US as comparator jurisdictions in light of their regulatory responses to the global financial crisis of 2008. This book contributes to the ongoing discourse in this area by exploring in detail the theoretical underpinnings of regulation and supervision to determine whether there is an understanding of what constitutes effective regulation in these jurisdictions. Given that Nigeria is the core jurisdictional focus, a historical account of banking exchanges from the pre-colonial era to more recent times is provided. Offering an understanding of how political, local and economic settings in conjunction with the theories of regulation have impacted and influenced regulatory development in Nigeria, the book engages in an examination of Nigeria's historical experiences with bank failures, including the banking crisis it experienced in 2008. The newly enacted Banks and Other Financial Institutions Act 2020 is also explored as part of this discourse. Through a critical analysis of the law, the book demonstrates that the Nigerian regulator has historically adopted a reactionary strategy instead of a proactive and pragmatic approach which is imperative for an effective regulatory regime. The outcome of this analysis is that there are lessons to be learned and proposals are discussed in order to rethink the act of banking regulation.

*Bank Competition, Efficiency and Liquidity Creation in Asia Pacific* N. Genetay, Y. Lin, P. Molyneux, 2015-07-28 Banking market integration in the Asia Pacific has greatly accelerated in recent years in an environment of many other rapid advances in banking and finance. This has increased competition between domestic and foreign banks and made the measurement of bank efficiency, competition and liquidity creation a critical issue for both policy makers and bank managers. This book investigates important policy-related issues in Asia Pacific banking. It analyses the link between competition and stability, examining the cases of fourteen Asia Pacific countries between 2003 and 2010 and goes on to discuss whether bank shareholder value is influenced by cost and profit efficiency changes over time. The authors explore the different ways in which banks in Asia Pacific create liquidity and whether this is linked to capital generation. This book provides valuable insight for researchers, policy makers and bank managers with an interest in financial rationalization, restructuring and consolidation. *Corruption as a Last Resort* Kelly M. McMann, 2015-02-06 Why do ordinary people engage in corruption?

Kelly M McMann contends that bureaucrats poverty and culture do not force individuals in Central Asia to pay bribes use connections or sell political support Rather corruption is a last resort when relatives groups in society the market and formal government programs cannot provide essential goods and services Using evidence from her long term research in Kazakhstan and Kyrgyzstan McMann shows that Islamic institutions secular charities entrepreneurs and banks cannot provide the jobs and credit people need This drives individuals to illicitly seek employment and loans from government officials A leading cause of this resource scarcity is market reform as demonstrated by McMann s analysis of these countries as well as of Uzbekistan and global data Market reform without supporting institutions such as credit registries and antimonopoly measures limits the resources available from the market and societal groups McMann finds that in these circumstances only those individuals who have affluent relatives have an alternative to corruption By focusing on ordinary people McMann offers a new understanding of corruption Previously our knowledge was largely restricted to government officials role in illicit exchanges From her novel approach comes a useful policy insight supplying ordinary people with alternatives to corruption is a fundamental and important anticorruption strategy

*Bank Lobbying: Regulatory Capture and Beyond* Ms.Deniz O Igan,Thomas Lambert,2019-08-09 In this paper we discuss whether and how bank lobbying can lead to regulatory capture and have real consequences through an overview of the motivations behind bank lobbying and of recent empirical evidence on the subject Overall the findings are consistent with regulatory capture which lessens the support for tighter rules and enforcement This in turn allows riskier practices and worse economic outcomes The evidence provides insights into how the rising political power of banks in the early 2000s propelled the financial system and the economy into crisis While these findings should not be interpreted as a call for an outright ban of lobbying they point in the direction of a need for rethinking the framework governing interactions between regulators and banks Enhanced transparency of regulatory decisions as well as strengthened checks and balances within the decision making process would go in this direction

Breaking the Bank? A Probabilistic Assessment of Euro Area Bank Profitability Selim Elekdag, Sheheryar Malik, Ms. Srobona Mitra, 2019-11-22 This paper explores the determinants of profitability across large euro area banks using a novel approach based on conditional profitability distributions Real GDP growth and the NPL ratio are shown to be the most reliable determinants of bank profitability However the estimated conditional distributions reveal that while higher growth would raise profits on average a large swath of banks would most likely continue to struggle even amid a strong economic recovery Therefore for some banks a determined reduction in NPLs combined with cost efficiency improvements and customized changes to their business models appears to be the most promising strategy for durably raising profitability
