Rethinking Tuition And Student Aid Strategies New Directions For Higher Education:

Rethinking Tuition and Student Aid Strategies Edward P. St. John, 1995 Many institutions are encountering problems attracting and retaining students due to college costs The tuition and student aid strategies that worked so well for so many institutions in the 1980s are no longer working quite as well This volume is intended to help college and university administrators build a better understanding of alternative ways of approaching pricing decisions in this new context The first four chapters examine the experiences of two states and two institutions that have taken different paths in their tuition and student aid strategies The second four chapters suggest techniques that administrators and policy makers can use in their efforts to evaluate alternative tuition and aid strategies

Redesigning the Financial Aid System Robert B. Archibald, 2003-05-22 As the cost of higher education continues to rise students and their families find it increasingly difficult to navigate the financial aid maze In *Redesigning the Financial Aid System* economist Robert Archibald examines the history of the system and its current flaws and he makes a radical proposal for changing the structure of the system Archibald argues that one of the problems with the current model in which universities are responsible for the majority of grants while the federal government provides student loans is that a student cannot know the final price of attending a given institution until after he or she has applied been accepted and received a financial aid offer As a result students remain largely uninformed about the cost of their college educations until very late in the decision making process and so have difficulty making a timely choice In addition financial aid information is kept private creating confusion over the price of a college education and the role of financial aid Under Archibald's proposed reforms the federal government would assess a student's financial need and provide need based grants while institutions would be responsible for guaranteeing student loans Not only would this new system demystify financial aid and allow students to be better informed about the cost of college earlier in the process but it would greatly simplify the application procedure and prevent financial aid allocation from contributing to the problem of rising tuition costs Archibald's clear explanation of the current system its impact strengths and weaknesses as well as his plans for reform will be of interest to educators administrators students and parents

Asker, 2014-09-15 During the 1990s rising tuition costs and inadequate federal grant aid prevented more than a million otherwise qualified low income students from continuing their education past high school Education policy expert Edward P St John is troubled by this situation and argues that equal access to higher education is both feasible and just In *Refinancing the College Dream* he examines recent trends in public funding of education and explores alternatives to financing which would provide equal access to postsecondary education for all Americans The growing gap in the rate of participation in higher education for low income groups compared to upper income groups over the past three decades St John finds has been a direct result of the decreased availability of federal grants even after taking into account such factors as an increased emphasis on strengthening high school graduation requirements To reverse this trend he suggests that policymakers refocus the debate over the public financing of higher education from taxpayer costs to principles of social responsibility and justice along with economic theories of human capital He then shows how improved coordination between state and federal agencies expanded use of loans and better targeting of grant aid can maximize access for low income students while minimizing increases in taxes Making higher education accessible to low income students is one of the crucial challenges for citizens and policymakers in
