Rethinking Public Strategy Sean Lusk, Nick Birks, 2014-07-23 Strategy is vital to effective and efficient public service delivery as well as successful governance and leadership This new text provides a concise yet systematic overview of the achievements downfalls and complexities of public strategy in today's globalized and often market driven world It describes the place of strategy in civic societies whose citizens are more interconnected and vocal than ever It shows that successful strategic planning goes well beyond problem solving to developing adaptable plans that can evolve as requirements and circumstances change And it explains why muddling through simply won't work Emphasizing the importance of applying a variety of techniques to the process of strategy creation *Rethinking Public Strategy* reassesses the key factors that can deliver significant improvements in public services and build public value It looks at why public strategy is distinctive as well as the principles it has in common with the corporate domain This text includes numerous case studies from around the globe from South Africa to Singapore the USA to Germany and from China to the Czech Republic that ground the exposition in real experience Based on state of the art research by two expert practitioners in the field it offers an essential guide to the art of strategy in the contemporary public sector and encourages readers to evaluate critically the various approaches to strategy

Redefining the Bonds of Commonwealth, 1939-1948 F. McKenzie, 2002-06-06 This work is a path breaking study of the changing attitudes of Canada Australia New Zealand and South Africa to Britain and the Commonwealth in the 1940s and the effect of those changes on their individual and collective standing in international affairs The focus is imperial preference the largest discriminatory tariff system in the world and a potent symbol of Commonwealth unity It is based on archival research in Britain Canada Australia New Zealand and the United States

Great Power Politics in Greater Eurasia Rahman Dag, Özgür Tüfekçi, 2022-12-27 Great power politics is a practical reality of world politics and it happens on a daily basis regardless of which international system we witness This book seeks to emphasize the ways these great power politics emerge within greater Eurasia Most researchers consider China becoming powerful enough to counterbalance the US and possible power dynamics among the rising powers such as China India China Russia and China Japan In this sense the book categorizes the battlegrounds in their power politics with three aspects national regional international conflicts institutions alliances and projects

Institutions, Discourse, and Regional Development Henrik Halkier, 2006 Why are some regional development strategies adopted and others rejected Only limited systematic attention has been paid to the politics of regional policy including the role of institutions discourse and political debate in shaping this major area of public policy The book develops an institutionalist approach to the study of regional policy capable of spanning major European development paradigms and accounting for the dynamic relationship between

organisations policies and political discourse This conceptual framework is then applied to the Scottish Development Agency a development body famed across Europe for its innovative policies but surrounded by political controversy in Scotland A detailed study of corporate strategies policy implementation and the wider British environment questions existing interpretations of the organisation which tend to vilify anti interventionist Thatcherites or glorify shrewd development professionals Instead the author proposes an alternative synthesis which highlights the interplay between institutions discourse and regional development in the politics of regional policy Rethinking Ethnicity Eric P. Kaufmann,2004-08-02 The impact of liberal globalization and multiculturalism means that nations are under pressure to transform their national identities from an ethnic to a civic mode This has led in many cases to dominant ethnic decline but also to its peripheral revival in the form of far right politics At the same time the growth of mass democracy and the decline of post colonial and Cold War state unity in the developing world has opened the floodgates for assertions of ethnic dominance This book investigates both tendencies and argues forcefully for the importance of dominant ethnicity in the contemporary world

Late Roman Towns in Britain Adam Rogers,2011-03-28 In this book Adam Rogers examines the late Roman phases of towns in Britain Critically analysing the archaeological notion of decline he focuses on public buildings which played an important role administrative and symbolic within urban complexes Arguing against the interpretation that many of these monumental civic buildings were in decline or abandoned in the later Roman period he demonstrates that they remained purposeful spaces and important centres of urban life Through a detailed assessment of the archaeology of late Roman towns this book argues that the archaeological framework of decline does not permit an adequate and comprehensive understanding of the towns during this period Moving beyond the idea of decline this book emphasises a longer term perspective for understanding the importance of towns in the later Roman period *Rethinking Social History* Adrian Wilson,1993

Churchill, Chamberlain and Appeasement G. C. Peden,2022-12-01 Was Churchill correct when he claimed the Second World War could easily have been prevented if Chamberlain had not appeased Hitler How far did Churchill and Chamberlain differ on defence and foreign policy To what extent was Chamberlain responsible for military defeats in 1940 In this new account of appeasement G C Peden addresses these questions and provides a comparative analysis of Chamberlain and Churchill s views on foreign policy and strategic priorities explores what deterrence and

appeasement meant in the military economic and political context of the 1930s and where Chamberlain and Churchill agreed and disagreed on how best to deter Germany Beginning in 1931 when Chamberlain became Chancellor of the Exchequer this book explores the evolution of British policy towards Germany through to the Munich Agreement and its aftermath within the context of Britain's power to influence international affairs in the 1930s and of contemporary intelligence

Masculinity and Western Musical Practice Kirsten Gibson, 2017-07-05 How have men used art music How have they listened to and brandished the musical forms of the Western classical tradition and how has music intervened in their identity formations This collection of essays addresses these questions by examining some of the ways in which men music and masculinity have been implicated with each other since the Middle Ages Feminist musicologies have already dealt extensively with music and gender from the phallogocentric tendencies of the Western tradition to the explicit marginalization of women from that tradition This book builds on that work by turning feminist critical approaches towards the production rhetorical engagement and subversion of masculinities in twelve different musical case studies In other disciplines within the arts and humanities men's studies is a well established field Musicology has only recently begun to address critically music's engagement with masculinity and as a result has sometimes thereby failed to recognize its own discursive misogyny This book does not seek to cover the field comprehensively but rather to explore in detail some of the ways in which musical practices do the cultural work of masculinity The book is structured into three thematic sections effeminate and virile musics and masculinities national masculinities national musics and identities voices discourses Within these themes the book ranges across a number of specific topics late medieval masculinities early modern discourses of music masculinity and medicine Renaissance Italian masculinities eighteenth nineteenth and early twentieth century ideas of creativity gender and canonicity masculinity imperialist and nationalist ideologies in the nineteenth century and constructions of the masculine voice in late nineteenth and twentieth century opera and song While the case studies are methodologically disparate and located in different historical and geographical locations they all share a common concern

[The Fields of Britannia](#) Stephen Rippon, Chris Smart, Ben Pears, 2015-09-10 It has long been recognized that the landscape of Britain is one of the richest historical records we possess but just how old is it The Fields of Britannia is the first book to explore how far the countryside of Roman Britain has survived in use through to the present day shaping the character of our modern countryside Commencing with a discussion of the differing views of what happened to the landscape at the end of Roman Britain the volume then brings together the results from hundreds of archaeological excavations and palaeoenvironmental investigations in order to map patterns of land use across Roman and early medieval Britain In compiling such extensive data the volume is able to reconstruct regional variations in Romano British and early medieval land use using pollen animal bones and charred cereal grains to demonstrate that agricultural regimes varied considerably and were heavily influenced by underlying geology We are shown that in the fifth and sixth centuries there was a shift away from intensive farming but very few areas of the

landscape were abandoned completely What is revealed is a surprising degree of continuity the Roman Empire may have collapsed but British farmers carried on regardless and the result is that now across large parts of Britain many of these Roman field systems are still in use Britain and the Bomb David James Gill,2014-01-08 Drawing on primary sources from both sides of the Atlantic Britain and the Bomb explores how economic political and strategic considerations have shaped British nuclear diplomacy The book concentrates on Prime Minister Harold Wilson's first two terms of office 1964-1970 which represent a critical period in international nuclear history Wilson's commitment to the Non Proliferation Treaty and his support for continued investment in the British nuclear weapons program despite serious economic and political challenges established precedents that still influence policymakers today The continued independence of Britain's nuclear force and the enduring absence of a German or European deterrent certainly owes a debt to Wilson's handling of nuclear diplomacy more than four decades ago Beyond highlighting the importance of this period the book explains how and why British nuclear diplomacy evolved during Wilson's leadership Cabinet discussions financial crises and international tensions encouraged a degree of flexibility in the pursuit of strategic independence and the creation of a non proliferation treaty Gill shows us that British nuclear diplomacy was a series of compromises an intricate blend of political economic and strategic considerations

Ancient Rome and Victorian Masculinity Laura Eastlake,2018-11-22 Ancient Rome and Victorian Masculinity examines Victorian receptions of ancient Rome with a specific focus on how those receptions were deployed to create useable models of masculinity Romans in Victorian literature are at once pagan persecutors pious statesmen pleasure seeking decadents and heroes of empire and these manifold and often contradictory representations are used as vehicles equally to capture the martial virtue of Wellington and to condemn the deviance and degeneracy of Oscar Wilde In the works of Thomas Macaulay

Wilkie Collins Anthony Trollope H Rider Haggard and Rudyard Kipling among others Rome emerges as a contested space with an array of possible scripts and signifiers which can be used to frame masculine ideals or to vilify perceived deviance from those ideals though with a value and significance often very different to ancient Greek models Sitting at the intersection of reception studies gender studies and interdisciplinary literary and cultural studies across discourses ranging from education and politics this volume offers the first comprehensive examination of the importance of ancient Rome as a cultural touchstone for nineteenth century manliness and Victorian codifications of masculinity
