Rethinking Educational Change With Heart And Mind:

Rethinking Educational Change with Heart and Mind Andy Hargreaves, 1997 *Rethinking Educational Change with Heart and Mind* Andy Hargreaves, 1997 Why does successful enduring change beyond a few isolated schools continue to elude us The fundamental problem says editor Hargreaves is that educational change is more complex and controversial than the change literature has recognized In this book Hargreaves and the other contributors move the dialogue about change beyond the technical aspects to three essential areas of teaching learning and leadership that have received only limited attention the passion purpose and politics of change Each chapter looks realistically but also optimistically at many of the complexities of change In the first chapter editor Hargreaves discusses the need for greater depth and breadth in our educational change efforts In the next few chapters authors explore the vital role of parents and communities in educational change efforts Subsequent chapters stress the value of involving students in school improvement suggest practical ideas for managing time differently and discuss the importance of clear measurable goals Other authors look at alternative assessment practices with a corresponding view of accountability Additional topics include collaborative action research among teachers in their own schools around issues of professional interest to them as well as ways that even wider collaborations or networks foster positive change In another chapter the authors ask whether what we know about school improvement applies to schools that are failing or seriously troubled They examine the political as well as technical issues involved in designating a school as failing or troubled arguing for more sophisticated ways of designation The closing chapter expands on a theme of the opening one the place of emotion in educational change by discussing a second theme that of hope without which there is no commitment or optimism that children s lives can be made better [Rethinking Educational Change with Heart and Mind](#) ,1997

Teachers Matter Christopher Day, Pam Sammons, Gordon

Stobart, Alison Kingdon, Qing Gu, 2007-03-16 *Teachers Matter* offers the most definitive portrait of teachers' lives and work to date. At a time when teaching standards are high on the political and social agenda, the quality and commitment of teaching staff is seen as paramount and they are viewed as pivotal to the economic and social well-being of society. But what are the influences that help or hinder teachers' commitment? Is there an association between commitment and pupil attainment? Why are teachers' identities important? What are teachers' needs and concerns in different professional life phases? Does school context count? Based on a DfES-funded study of 300 teachers in 100 primary and secondary schools in England, the authors identify different patterns of influence and effect between groups of teachers which provide powerful evidence of the complexities of teachers' work lives, identity and commitment in relation to their sense of agency, well-being, resilience and pupil attitudes and attainment. This in turn provides a clear message for teachers, teachers' associations, school leaders and policy makers in understanding and supporting the need to build and sustain school and classroom effectiveness. The book addresses issues such as the importance of career development, the relationships between school leadership, culture and teachers' lives, maintaining a work-life balance, identity and well-being and the connection between commitment, resilience and effectiveness in the classroom. Original and highly relevant, *Teachers Matter* is invaluable reading for teachers, head teachers, researchers and teacher educators.
