Rethinking Leadership for a Green World Andrew Taylor, 2022-03-20 First James Lovelock and recently Prince William and David Attenborough believe that we have reached a tipping point in the process of climate change Whether they are right or not it is certainly true that the impact of humankind upon the ecology of the earth has reached a point where real changes in human behaviour are required If managers are to be enablers of planetary survival then we need to develop a new approach to risk which explicitly includes ecological limits upon economic behaviour This implies a fundamental reorientation of their role in allocating resources to minimise risk and maximise reward This book brings together some of the brightest contemporary thinkers on leadership complexity and sustainability to consider the big ideas that we will need to make the changes required and to outline the major themes that can inform a new approach to constructing a green world It looks at how to ensure that local models of sustainability are able to flourish in the context of global networks and presents specific case studies of markets and organisations that offer insights into the development integrated solutions and the leadership lessons we can learn Combining both theory and practice this book serves to guide

business managers and provides deeper insight and critical perspectives on some of the key issues facing leaders moving towards the green economy It also provides useful supplementary reading for students in business and environmental studies

Learning Russ Vince, 2004-04-22 Russ Vince examines learning as both a social and a strategic process invariably linked to emotions and politics that are mobilized by attempts at learning and organizing. He makes a substantial contribution to theories of organizational learning and develops new ideas about critical reflection and collective leadership. The author outlines a critical perspective on HRD, arguing that staff responsible for learning and change in organizations have put too much effort into the development of individuals and not enough into understanding and engaging with organizational dynamics that limit and shape individuals' opportunities and abilities to learn and change. HRD is explained as an intervention within a political system and practice of management and leadership with all the difficulties and contradictions that attempting to manage and to lead are likely to contain and reveal. This means that the focus of HRD is on action on developing the capacity to act on generating credibility through action and on influencing and working with others in situations loaded with emotion and politics. *The Oxford Handbook of Public Management* Ewan Ferlie, Laurence E.
