Rethinking Socialist Economics A New Agenda For Britain:

Rethinking Socialist Economics Peter Nolan, Suzanne Paine, 1986-01-01 The Market Revolution and its Limits Alan Shipman, 2002-01-22 The Market Revolution and its limits summarises why many economists believe that markets are best It explores how even market failures can be given market solutions and asks why market ideas seem to have taken such a firm hold Non polemical in its approach this book provides a comprehensive appraisal of the market and its alternatives backed up with empirical international illustrations Shipman concludes that the revolution lies in redefining the market process rather than the market outcome **Knowledge, Networks and Policy** James Hopkins, 2015-05-08 The region has been used to understand and propose solutions to phenomena and problems outside the dominant spatial scale of the twentieth century the nation state Its influence can be seen in multiple social science disciplines and in public policy across the globe But how was this knowledge organised and how were its concepts transmuted into public policy This book charts the development of the academic field of Regional Studies and the application of its concepts in public policy through its learned society the Regional Studies Association In their modern form learned societies often play a complementary role to universities offering networks that operate in the spaces between and beyond universities connecting specialised academics and knowledge and making it possible for them to have impact outside the academy In contrast to the geographically tangible and popularly understood role of the university contemporary learned societies are nebulous networks that transcend barriers and whose contribution is difficult to discern However the production and dissemination of knowledge would be stunted were it not for the learned society connecting scholars through a network of publications and events This book traces the intellectual history of regional studies and regional science from the 1960s into the 2000s and the impact of the regional concept in public policy through the changing priorities of government in the UK and Europe By approaching the history through the Regional Studies Association it interrogates the role and function of the learned society model of organisation in contemporary academia and importance as a knowledge exchange vehicle for public policy influence

Work Incentives and Welfare Provision Doris Schroeder, 2018-02-06 This title was first published in 2000 Over the past decade the welfare state has come under sustained attack not only from quarters which never approved of its policies but also from political theorists who used to support it With the collapse of communism the policy of comprehensive welfare provision came under renewed scrutiny It was argued that its impact on work incentives is most detrimental Examining in detail current unemployment debates within Western welfare states this book seeks to verify or refute the view that non work is increasingly chosen by work shy individuals the pathological theory of unemployment Drawing from a range of disciplinary perspectives from social philosophy and the history of philosophy to occupational psychology and feminist economics this interdisciplinary analysis reveals that the pathological theory of unemployment with its reliance on a deficient depiction of human nature and its disregard of non pecuniary work incentives and empirical evidence on benefit fraud cannot be upheld

Schroeder presents an alternative explanation for the phenomenon of widespread Western unemployment through new insights into an external barrier theory of unemployment namely technological displacement combined with a refusal to return to a two tiered Victorian society By effectively combining empirical data with philosophical deliberations the book provides an important contribution to the welfare state debate *Journal of Economic Literature* ,1987 **Index of Conference Proceedings Received** British Library. Lending Division,1987 **Discussion Paper** ,1997 **Economica** ,1987 **Critical Choices for South Africa** Robert A. Schrire,1990 South Africans are increasingly realizing that the conventional paradigms that have guided the formulation and execution of public policy are now inadequate to meet the challenges of the coming years The turmoil in both black and white politics is testimony to this At the same time the debate on alternatives has been at such a high level of abstraction that it has failed to provide policymakers with guidance on what the alternatives are This important book looks at the real options behind the rhetoric surveying choices rather than stating solutions It deals with the key issues facing South Africa during this new decade issues to which any future government minority or majority will have to respond The book is the result of a major research project undertaken by the Institute for the Study of Public Policy at the University of Cape Town and involves more than fifty scholars from South Africa Europe Australia and North America A London Bibliography of the Social Sciences ,1931 Vols 1 4 include material to June 1 1929

The Labour Party's Economic Strategy, 1979-1997 R. Hill,2001-09-26 The book considers Labour s economic strategy as it developed through the party s long period of opposition between 1979 and 1997 This history argues strongly that accounts of Labour s recent past which claim that the Party was driven by a combination of Thatcherism and opinion polls are flawed It offers an alternative account which stresses the importance of debates within and around the Party about how the economy should be understood the role of markets and the state and British industrial decline **Bibliographic Guide to Conference Publications** New York Public Library. Research Libraries,1987 Vols for 1975 include publications cataloged by the Research Libraries of the New York Public Library with additional entries from the Library of Congress MARC tapes British Regionalism and Devolution Jonathan Bradbury,John Mawson,2014-02-04 This contributors provide a range of perspectives on the increasingly central issues of state reform European integration and British regionalism in the 1990s Using case material the contributors examine the effects of state reform and European integration on British regionalism and the devolution debate and the nature of recent central responses to the re emergence of regional and devolution issues with a particular focus on the recent policies of the Major governments and the policies of the Opposition parties They also present some evidence which suggests that state reform and EC EU developments have determined and accentuated important new trends in British regionalism and underpin the plausibility of far reaching regional and devolution reforms **Free to Choose?** Peter Ingram,J.
