Rethinking the skyscraper : the complete architecture of Ken Yeang Robert Powell,1999

Rethinking the

Skyscraper Robert Powell,1999 A preview of the twenty first century city dweller s world is seen in the work of an architect whose visionary approach to skyscraper design sets new standards for high rise construction *The New Paradigm in Architecture* Charles Jencks,2002-01-01 This book explores the broad issue of Postmodernism and tells the story of the movement that has changed the face of architecture over the last forty years In this completely rewritten edition of his seminal work Charles Jencks brings the history of architecture up to date and shows how demands for a new and complex architecture aided by computer design have led to more convivial sensuous and articulate buildings around the world

Guide to Natural Ventilation in High Rise Office Buildings Antony Wood,Ruba Salib,2013 This guide sets out recommendations for every phase of the planning construction and operation of natural ventilation systems in these buildings including local climatic factors that need to be taken into account how to plan for seasonal variations in weather and the risks in adopting different implementation strategies All of the recommendations are based on analysis of the research findings from richly illustrated international case studies This is the first technical guide from the Council on Tall Buildings and Urban Habitat s Tall Buildings Sustainability Working Group looking in depth at a key element in the creation of tall buildings with a much reduced environmental impact while taking the industry closer to an appreciation of what constitutes a sustainable tall building and what factors affect the sustainability threshold for tall *Understanding Sustainable Architecture* Terry J. Williamson,Antony Radford,Helen Bennetts,2003 This book is a concise review of the assumptions beliefs goals and bodies of knowledge that underlie the endeavour to design environmentally sustainable buildings and other built developments *The Vertical City* K. Al-Kodmany,2018-06-25 Each century has its own unique approach toward addressing the problem of high density and the 21st century is no exception As cities try to cope with rapid population growth adding 2 5 billion dwellers by 2050 and grapple with destructive sprawl politicians planners and architects have become increasingly interested in the vertical city paradigm Unfortunately cities all over the world are grossly unprepared for integrating tall buildings as these buildings may aggravate multidimensional sustainability challenges resulting in a vertical sprawl that could have worse consequences than horizontal sprawl By using extensive data and numerous illustrations this book provides a comprehensive guide to the successful and sustainable integration of tall buildings into cities A new crop of skyscrapers that employ passive design strategies green technologies energy saving systems and innovative renewable energy offers significant architectural improvements At the urban scale the book argues that planners must integrate tall buildings with efficient mass transit walkable neighbourhoods cycling networks vibrant mixed use activities iconic transit stations attractive plazas well landscaped streets spacious parks and engaging public art Particularly it proposes the Tall Building and Transit Oriented Development TB TOD model as one of the sustainable options for large cities going forward Building on the work of leaders

in the fields of ecological and sustainable design this book will open readers eyes to a wider range of possibilities for utilizing green resilient smart and sustainable features in architecture and urban planning projects The 20 chapters offer comprehensive reading for all those interested in the planning design and construction of sustainable cities

Understanding Cities Alexander R. Cuthbert, 2011 *Understanding Cities* is richly textured complex and challenging. It creates the vital link between urban design theory and praxis and opens the required methodological gateway to a new and unified field of urban design. Using spatial political economy as his most important reference point, Alexander Cuthbert both interrogates and challenges mainstream urban design and provides an alternative and viable comprehensive framework for a new synthesis. He rejects the idea of yet another theory in urban design and chooses instead to construct the necessary intellectual and conceptual scaffolding for what he terms The New Urban Design Building both on Michel de Certeau's concept of heterology thinking about thinking and on the framework of his previous books *Designing Cities* and *The Form of Cities*. Cuthbert uses his prior adopted framework history philosophy politics culture gender environment aesthetics typologies and pragmatics to create three integrated texts. Overall the trilogy allows a new field of urban design to emerge. Pre-existing and new knowledge are integrated across all three volumes of which *Understanding Cities* is the culminating text.

New Suburbanism: Sustainable Tall Building Development Kheir Al-Kodmany, 2016-04-14 Much of the anticipated future growth in the United States will take place in suburbia. The critical challenge is how to accommodate this growth in a sustainable and resilient manner. This book explores the role of suburban tall as a viable sustainable alternative to continued suburban sprawl. It identifies 10 spatial patterns in which tall buildings have been integrated into the American suburbs. The study concludes that the Tall Building and Transit Oriented Development (TB TOD) model is the most appropriate to promote sustainable suburbanism. The findings are based on analyzing over 300 projects in 24 suburban communities within three major metropolitan areas including Washington DC, Miami, Florida and Chicago, Illinois. The book furnishes planning strategies that address the social, economic and environmental aspects of sustainable tall building development. It also discusses sustainable architectural design and site planning strategies and provides case studies of sustainable tall buildings that were successfully integrated into suburban settings.

Eco-Towers K. Al-Kodmany, 2015-05-05 *Eco Towers* introduces readers to groundbreaking designs, most progressive projects and innovative ways of thinking about a new generation of green skyscrapers that could provide solutions to the crises the world faces today including climate change, depleting resources, deteriorating ecology, population increase, decreasing food supply, urban heat island effect, pollution, deforestation and more. The book suggests that the eco tower culminates the cultural and technological evolutions of the 21st century by building and improving on the experiences of earlier designs of skyscrapers and philosophies, particularly green, sustainable and ecological. It argues that the true green skyscraper is the one that engages successfully with its larger urban context by establishing symbiotic relationships with the social, economic and environmental aspects. Since tall buildings are becoming larger and taller, serving greater numbers of people and exerting higher demand on the environment and existing infrastructure, any improvements in their design and

construction will significantly enhance urban conditions The book elucidates how green skyscrapers better serve tenants mitigate environmental impacts and improve integration with the city infrastructure It explains how skyscrapers long life cycle offers the greatest justifications for recycling precious resources and makes it a worthwhile to employ green features in constructing new skyscrapers and retrofitting existing ones Subsequently the book explores new designs that are employing cutting edge green technologies at a grand scale including water saving technologies solar panels helical wind turbines sunlight sensing LED lights rainwater catchment systems graywater and blackwater recycling systems seawater powered air conditioning and the like In the future new building materials and smart technologies will continue to offer innovative design approaches to sustainable tall buildings with new aesthetics referred to as eco iconic skyscrapers

Modern Thai House Robert Powell,2012-10-10 With rich photography and insightful commentary this Thai architecture and interior design book showcases some of the finest modern masterpieces in Southeast Asia A tremendous body of sophisticated and sensitively designed architectural work has been produced in Thailand in the first decade of the 21st century The 25 houses in The Modern Thai House illustrate the radical new ideas coming from a dynamic younger generation of architects who are producing work comparable with and sometimes even surpassing the very best architecture in the world Most of these architects were trained in the U S or U K and reflect not only American and European sensibilities but also affinities with their contemporaries in Asia including Japan China Singapore and Bali all hotbeds for innovation in modern design The houses in this book are readily accessible from Bangkok Phuket and Chiangmai They reflect a wide variety of concerns and solutions such as sustainability responses to climate strategies for cooling with minimal electricity openness versus security in a large metropolis such as Bangkok cultural sensitivity and responsiveness as evidenced in a three generation house built for a society in which the extended family is still prevalent and cultural memory as in the use of elements such as pilings verandahs and steeply pitched roofs with large overhangs that echo traditional Thai designs Nurtured by an increasingly knowledgeable and wealthy clientele modern architecture in Thailand is emerging with a variety of innovative architectural expressions

Precedented Environmental Futures Colin Porteous,2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from

psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment **Ecopolis** Paul F. Downton, 2008-11-19 From 2008 for the first time in human history half of the world's population now live in cities Yet despite a wealth of literature on green architecture and planning there is to date no single book which draws together theory from the full range of disciplines from architecture planning and ecology which we must come to grips with if we are to design future cities which are genuinely sustainable Paul Downton's Ecopolis takes a major step along this path It highlights the urgent need to understand the role of cities as both agents of change and means of survival at a time when climate change has finally grabbed world attention and it provides a framework for designing cities that integrates knowledge both academic and practical from a range of relevant disciplines Identifying key theorists practitioners places and philosophies the book provides a solid theoretical context which introduces the concept of urban fractals and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development SHED Combining knowledge from diverse fields to present a synthesis of urban ecology the book will provide a valuable resource for students researchers and practitioners in architecture construction planning geography and the traditional life sciences **The City in Southeast Asia** Peter James Rimmer, Howard W. Dick, 2009 The extended metropolitan regions of Southeast Asia are the dynamic cores of their national economies and societies and the frontiers of accelerating globalization This title explores ways of moving beyond outmoded paradigms of the Third World City or a Southeast Asian city type
