Right Makes Might Freedom And Power In The Information Age:

Right Makes Might David C. Gompert, 1998 The emergence of China begs a fresh look at power in world affairs more precisely at how the spread of freedom and the integration of the global economy due to the information revolution are affecting the nature concentration and purpose of power Chapters freedom power and the rise of China globalization and power politics knowledge and freedom knowledge and national power powers as partners and coda on U S policy Concludes that the U S need not fear a cold war with China China s own priorities economic growth and stability propel it toward legitimacy that can only come through reform and toward the dominant technology **Right Makes Might** David C. Gompert, 1998 The emergence of China begs a fresh look at power in world affairs more precisely at how the spread of freedom globalization knowledge knowledge powers as partners coda on U S policy Concludes that the U S need not fear a cold war with China China s own priorities economic growth stability propel it toward legitimacy that can only come through reform toward the dominant technology *"Right Makes Might"* Wolfgang Mieder, 2019-04-04 A powerful and timely addition to the literature of rhetoric and folklore Choice In 1860 Abraham Lincoln employed the proverb Right makes might opposite of the more aggressive Might makes right in his famed Cooper Union address While Lincoln did not originate the proverb his use of it in this critical speech indicates that the fourteenth century phrase had taken on new ethical and democratic connotations in the nineteenth century In this collection famed scholar of proverbs Wolfgang Mieder explores the multifaceted use and function of proverbs through the history of the United States from their early beginnings up through their use by such modern day politicians as Barack Obama Hillary Rodham Clinton and Bernie Sanders Building on previous publications and unpublished research Mieder explores sociopolitical aspects of the American worldview as expressed through the use of proverbs in politics women s rights and the civil rights movement and by looking at the use of proverbial phrases Mieder demonstrates how one traditional phrase can take on numerous expressive roles over time and how they continue to play a key role in our contemporary moment Nomination of David C. Gompert to be Principal Deputy Director of National Intelligence United States. Congress. Senate. Select Committee on Intelligence, 2010 **Debating Political Reform in China** Suisheng Zhao, 2014-12-18 The growing disconnect between China s market oriented economy with its emerging civil society and the brittle anachronistic and authoritarian state has given rise to intense discussion and debate about political reform not only by Western observers but also among Chinese intellectuals While some expect China s political reform to lead to democratization others have proposed to strengthen the institution of single party rule and provide it with a solid legal base This book brings the ongoing debate to life and explores the options for political reform Offering the perspectives of both Western and Chinese scholars it presents the controversial argument for building a consultative rule of law regime as an alternative to liberal democracy It provides several critiques of this thesis and then tests the thesis through empirical studies on the development of the rule of law in China **Strategic Assessment 1999** ,1999 The Information

Society Armand Mattelart, 2003-04-03 The impact of the information society are multiform and transdisciplinary There are few areas of social political and economic life that have not been affected or challenged by the new technologies of information and communication In this short introduction Armand Mattelart unpacks the notion of the information society and examines why it has become the dominant paradigm for social change in the 21st Century Critically he also asks why the notion has come to dominant in the absence of any critical examination of the conditions under which it has been produced Combining a long term historical and geopolitical perspective Mattelart questions the axioms used to legitimate the Information Society and critically assesses the ways in which it has been conceptualised as a theoretical concept as well as policy making tool This introduction will be of interest to all students of media and communication as well as social scientists in general

Sea Power and American Interests in the Western Pacific David C. Gompert, 2013-04-09 This book examines the strategic choices that American and Chinese decisionmakers face regarding sea power in the Western Pacific shaped by geography history technology and politics In particular the author explores the potential for cooperation on maritime security in the Western Pacific and how the United States might pursue such cooperation as part of a broader strategy to advance its interests in the region

Strategic Appraisal Zalmay Khalilzad, John P. White, 1999 Advances in information technology have led us to rely on easy communication and readily available information both in our personal lives and in the life of our nation For the most part we have rightly welcomed these changes But information that is readily available is available to friend and foe alike a system that relies on communication can become useless if its ability to communicate is interfered with or destroyed Because this reliance is so general attacks on the information infrastructure can have widespread effects both for the military and for society And such attacks can come from a variety of sources some difficult or impossible to identify This the third volume in the Strategic Appraisal series draws on the expertise of researchers from across RAND to explore the opportunities and vulnerabilities inherent in the increasing reliance on information technology looking both at its usefulness to the warrior and the need to protect its usefulness for everyone The Strategic Appraisal series is intended to review for a broad audience issues bearing on national security and defense planning

Strategic Assessment , Military Affairs Catalog United States. Superintendent of Documents, 2000

Battle-wise: Seeking Time-Information Superiority in Networked Warfare , **NetPolicy.com** Leslie David Simon, 2000-10-31 A panoramic view of the Internet s impact on U S and global institutions written from the perspective of the year 2000

Foreign Affairs Strategy Terry L. Deibel, 2007-07-23 This book enables readers to think strategically about American foreign policy

The Internet and Foreign Policy James F. Larson, 2004 This headline series explores the competing views and complexines of a changing relationship bet the media and foreign policy

Mind the gap promoting a transatlantic revolution in military affairs , 1999 When American defense officials meet informally with their allies and friends from other North Atlantic Treaty Organization countries the conversation often turns to the growing disparity in combat

capability between European and U S forces The problem is bemoaned but the participants are not stirred to action This is unfortunate We need a cross Atlantic debate that seeks feasible solutions to this problem Mind the Gap responds directly to that need It not only dissects the problem of a growing disparity but also rejects its inevitability Instead it lays out a multitiered strategy for its solution which is specific and practical including processes and procedures for implementation The proposed strategy is complicated and would be difficult to execute it would raise questions and even objections That is as it should be The alliance nevertheless has solved larger more complex problems We urgently need to find a way to close the gap because the problem is getting worse The United States continues to implement its vision of a globally mobile military force equipped with the latest technology The European members of NATO are not investing in similar capabilities As a result the gap will widen and be increasingly difficult to close

Hegemonic Globalisation Thanh Duong, 2017-11-22 This title was first published in 2002 This innovative work analyses how the United States has laid down the foundations for global power It reassesses and re evaluates the declinist renewal argument and challenges conventional balance of power theories demonstrating how the United States is attempting to hegemonically globalise the entire international system To evaluate the success of hegemonic globalisation the book analyses four major powers and regions Russia the People s Republic of China PRC the European Union EU and Japan and their historical political economic cultural and geopolitical relations with the United States Each study examines the tangible and intangible sources of their relationship and the possible tensions and resistance towards United States hegemony therein Providing much needed insight and a fresh perspective this book makes a worthwhile contribution to our understanding of contemporary international power

Networking the World, 1794-2000 Armand Mattelart, 2000 In the age of satellites and the Internet worldwide communication has become increasingly unified amid overblown claims about the redemptive possibilities of international networks But this rhetoric is hardly new As Armand Mattelart demonstrates in *Networking the World 1794 2000* globalization and its attendant hype have existed since road and rail were the fastest way to move information Mattelart plates contemporary global communication networks into historical context and shows that the networking of the world began much earlier than many assume in the late eighteenth century He argues that the internationalization of communication was spawned by such Enlightenment ideals as universalism and liberalism and examines how the development of global communications has been inextricably linked to the industrial revolution modern warfare and the emergence of nationalism Throughout Mattelart eloquently argues that discourses of better living through globalization often mask projects of political economic and cultural domination

Governing the Internet Marcus F. Franda, 2001 This volume explores the many complex issues and challenges that confront governments technocrats business people and others as they try to create and implement rules for a truly global interoperable Internet

The strategic implications of a nuclear-armed Iran ,
