Right Brain And Religion:

The Right Brain and Religion C. W. Dalton,1990 *Religion, Language, and the Human Mind* Paul Anthony Chilton,Monika Weronika Kopytowska,2018 Religion is a multi faceted and complex human phenomenon combining many different mental and social characteristics Among these language plays a crucial though often neglected role This volume brings together groundbreaking work from linguistics cognitive science and neuroscience as well as from religious studies in order to illuminate the origins and centrality of religion in human life *The Last Book* John Williams,2007-08-27 There have been many attempts to explain life For the most part they are variants on a religious or mystical theme These provide a purpose to life but not the purpose of life A full rational explanation of our existence based on our rapidly accumulating scientific knowledge has eluded us until now The explanation of life which is offered in this book draws on three main components evolution genetics and psychology However something exists in our mind which stops us from seeing clearly what is already before us Once this block is removed we can view life objectively and see it as a special form of information which has arisen through evolution Information is identified as the unifying entity of the universe which is inherent in the spatial arrangement of matter This book relates these findings to our world and our lives It sets out in rational terms where we came from how we got here and finally reveals our destiny www.thelastbook.co.uk *Religion, Language, and the Human Mind* Paul Chilton,Monika Kopytowska,2018-04-03 What is religion How does it work Many natural abilities of the human mind are involved and crucial among them is the ability to use language This volume brings together research from linguistics cognitive science and neuroscience as well as from religious studies to understand the phenomena of religion as a distinctly human enterprise The book is divided into three parts each part preceded by a full introductory chapter by the editors that discusses modern scientific approaches to religion and the application of modern linguistics particularly cognitive linguistics and pragmatics Part I surveys the development of modern studies of religious language and the diverse disciplinary strands that have emerged Beginning with descriptive approaches to religious language and the problem of describing religious concepts across languages chapters introduce the turn to cognition in linguistics and also in theology and explore the brain s contrasting capacities in particular its capacity for language and metaphor Part II continues the discussion of metaphor the natural ability by which humans draw on basic knowledge of the world in order to explore abstractions and intangibles Specialists in particular religions apply conceptual metaphor theory in various ways covering several major religious traditions Buddhism Christianity Hinduism Islam and Judaism Part III seeks to open up new horizons for cognitive linguistic research on religion looking beyond written texts to the ways in which language is integrated with other modalities including ritual religious art and religious electronic media Chapters in Part III introduce readers to a range of technical instruments that have been developed within cognitive linguistics and discourse analysis in recent years What unfolds ultimately is the idea that the embodied cognition of humans is the basis not only of their languages but also of their

Anthropology and Religion Robert L. Winzeler, 2012-04-12 Drawing from ethnographic examples found throughout the world this revised and updated text offers an introduction to what anthropologists know or think about religion how they have studied it and how they have interpreted or explained it since the late nineteenth century Robert Winzeler's balanced consideration of classic topics basic concepts and new developments in the anthropological study of religion moves beyond cultural anthropology and ethnography to gather information from physical anthropology prehistory and archaeology Written as a sophisticated but accessible treatment of the issues Anthropology and Religion is a key text for upper division courses

Psychology and Religion Michael Argyle, 2005-10-25 Michael Argyle's new book is an introduction to the psychology of religion from one of the world's most famous experimental psychologists Explorations in Neuroscience, Psychology and Religion Kevin S. Seybold, 2016-04-15 In the 1990s great strides were taken in clarifying how the brain is involved in behaviors that in the past had seldom been studied by neuroscientists or psychologists This book explores the progress begun during that momentous decade in understanding why we behave think and feel the way we do especially in those areas that interface with religion What is happening in the brain when we have a religious experience Is the soul a product of the mind which is in turn a product of the brain If so what are the implications for the Christian belief in an afterlife If God created humans for the purpose of having a relationship with him should we expect to find that our spirituality is a biologically evolved human trait What effect might a disease such as Alzheimer's have on a person's spirituality and relationship with God Neuroscience and psychology are providing information relevant to each of these questions and many Christians are worried that their religious beliefs are being threatened by this research Kevin Seybold attempts to put their concerns to rest by presenting some of the scientific findings coming from these disciplines in a way that is understandable yet non threatening to Christian belief **The Wiley Blackwell Companion to Religion and Ecology** John

Hart, 2017-03-24 In the face of the current environmental crisis which clearly has moral and spiritual dimensions members of all the world's faiths have come to recognize the critical importance of religion's relationship to ecology The Wiley Blackwell Companion to Religion and Ecology offers a comprehensive overview of the history and the latest developments in religious engagement with environmental issues throughout the world Newly commissioned essays from noted scholars of diverse faiths and scientific traditions present the most cutting edge thinking on religion's relationship to the environment Initial readings explore the ways traditional concepts of nature in Christianity Judaism Islam Buddhism and other religious traditions have been shaped by the environmental crisis Readings then address the changing nature of theology and religious thought in response to the challenges of protecting the environment Various conceptual issues and themes that transcend

individual traditions climate change bio ethics social justice ecofeminism and more are then analyzed before a final section examines some of the immediate challenges we face in caring for the Earth while looking to the future of religious environmentalism Timely and thought provoking Companion to Religion and Ecology offers illuminating insights into the role of religion in the ongoing struggle to secure the future well being of our natural world With a foreword by Ecumenical Patriarch Bartholomew I and an Afterword by John Cobb

The Meanings of Genealogy for Science and Religion James S. Tomes, 2014-08-14 This book is a refreshingly unique approach to genealogy and its relationships with Science and Religion It is the author's answer to the questions posed artistically by the painter Paul Gauguin's masterpiece Where Do We Come From What Are We Made Of Where Are We Going as reproduced on the book cover Most religions and cultures make important reference to their genealogies Science also since the advent of Darwin's Theory of Evolution and its subsequent development and culmination in DNA and brain science research has its own genealogy telling the story of the pre history and history of mankind our migrations and the evolution of our behavior and cultures The author trained as both a biologist and lawyer writing as an independent scholar examines these questions through the various lenses of genealogy biology evidence religion and philosophy He considers first some basic but little known facts of genealogy then our common mortality and heritage and brother sisterhood with all mankind then the variety of world views then the different evidentiary bases for science and religion then a condensed but comprehensive view of comparative religion and humanism then the history of Biblical interpretation and Biblical genealogies and finally the history of mankind as seen by science including the remarkable recent discoveries of prehistoric man and brain science The poetry prose metaphor is illustrated by insightful examples of both poetry and prose and brief introductions to some remarkable religious and scientific personalities The dark side of religion is explored with contemporary critiques by renowned scholars and some exemplary poets are referred to with examples of their poetry This book avoids the combative rhetoric of both religious and scientific extremists and points the way toward and enriching language and life of religious humanism This new dualism of poetry and prose reflects the biological facts of our simultaneously emotional and rational selves Thus religious humanism provides a natural bridge between religion and science accessible to everyone The poetry prose metaphor can provide a thoughtful rationale for people to keep their religious beliefs and traditions make peace between religions and also understand and appreciate the modern scientific world without conflict Thus genealogy has taken us on a long journey through the history of science and religion illustrating the mysteries complexities and beauties of humanity's existence The book is well researched and written clearly in an engaging style with an extensive bibliography It will be well worth reading by all people who have an interest in genealogy and its relationships with science and religion

Engaging Philosophies of Religion Gereon Kopf, Purushottama Bilimoria, Nathan R. B. Loewen, 2025-05-01 How can philosophy of religion become more diverse in content and method How can we take a multiplicity of stories into account and teach a truly inclusive philosophy of religion It is now openly acknowledged that if we do not change the underlying framework of the way we do philosophy of religion we will always create subalterns Here is an invitation to rethink Philosophy of Religion Engaging with texts and thinkers from multiple traditions this book offers 18 distinct approaches to doing Philosophy of Religion and presents an opportunity to change Philosophy of Religion at a fundamental level Drawing on religions and philosophies from across history and around the world each chapter outlines a framework for approaching religion from a different standpoint monotheism in Christianity Qi in Daoism embodiment in neuroscience naturalism in the atheism debates and non territorialism in 19th century debates on cartography Contributors identify the many philosophical systems that guide metaphysical and moral truths and adhere to the principle that traditions are not monolithic but diverse They recognise that categories such as indigenous religions are political rather than descriptive in nature Innovative and forward looking this collection constructs a new method and terminology that promotes active interaction It is essential reading for students and teachers looking for a new way of doing Philosophy of Religion

Can Scientists Believe Sir Nevill Mott, 2013-11-05 In this collection of thought provoking essays a range of distinguished scientists and theologians men and women young and old all with strong scientific training and deeply held religious beliefs in the Judeo Christian tradition give their personal answers They do not always agree the views of each

contributor being informed both by their particular scientific expertise and religious affiliation They address a wide range of problems that will interest all concerned to reconcile their own religious beliefs with currently accepted scientific theory and practice The divergences of opinion are as significant as the agreements Positions are thoughtfully explained and make important often novel and illuminating contributions to debate on these great issues We Believe... Roy E.

Bourque,2021-02-24 We Believe A Journey into Christ Consciousness By Roy E Bourque After a profound spiritual experience at the age of nine the author found clarity in some of what the church was teaching while bringing into question other teachings of the church Eleven years later during a nuclear physics lecture this spiritual experience coincided with what the instructor was teaching Numerous additional spiritual experiences would soon follow We Believe A Journey into Christ Consciousness details the bridge that was formed between science and spirituality from those experiences Since that time the author has researched religious history looking for connections that would correlate modern science with what the ancient writers knew This endeavor has brought clarity to much of what the church teaches as well as serving as the basis to weed out misconceptions that have muddled up the waters This book may serve the reader who is looking for connections between science and religion

Seeking Science-Friendly Christianity Harwood Hoover,2023-11-17 This book brings together lessons from three journeys The first journey began with my acceptance of Jesus at a young age together with my growing recognition of the differences between the scriptural record and scientific understanding It continued with a young man s adventure a retreat into nature and an encounter with war War and life s darker side convinced me that even as nature brings awe and opens us to religious experience we need morality The second journey began as I inquired into the ministry When the church transferred the guide they had assigned to me Bob Wessman became my mentor Bob was an ordained pastor with a doctorate in theology For twenty years we read and discussed theology including the Catholic ideas that I had discovered while teaching with the Dominican Sisters Bob is in hospice care as I write this and my library is full of the books that he gifted to me Thank you Bob I now had many ideas from my first two journeys but they floated about in my head without an organizing form The challenge was to find a form that would allow the ideas to come together and speak in harmony Differences between Scripture and science had troubled me since my youth and I could not ignore science It was simply too good at finding truth to ignore So science would have to help me Science cannot touch all that religion touches but science and technology can be in correspondence with theology Researching and writing this book could explore that relationship The result was to have remained personal but then I

thought that a reader might find an idea or two useful A person who is literate in science might see why trusting Jesus is both good and reasonable This book is the story of the third journey an odyssey through science and Christian theology

Spiritual Intelligence and the Neuroplastic Brain Charles W. Mark Ph. D., Charles W. Mark, 2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person's life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book *Spiritual Intelligence and The Neuroplastic Brain A Contextual Interpretation of Modern History* Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com>
