Parliament, the Constitution, and Property in the United Kingdom Tom Allen, 2025-01-02 This book considers whether Parliament recognises a constitutional right to property Parliament is supreme in theory there is nothing to stop it from passing laws to confiscate property Nevertheless MPs often argue that a proposed law would be unconstitutional What does this mean in a system without a written constitution What counts as a sound argument about constitutional rights And what influence do constitutional arguments have on the legislative process The book takes a close look at these questions It reviews legislation and debates from the Middle Ages through to more recent legislation and covers a wide range of topics such as land reform nationalisation taxation regulatory laws and retrospection It also looks at the most recent debates and considers the relevance of constitutional thinking to election manifestos of the main political parties

Kommers,John E. Finn,Gary J. Jacobsohn,2010 American Constitutional Law Essays Cases and Comparative Notes

is a unique casebook that encourages citizens and students of the Constitution to think critically about the fundamental principles and policies of the American constitutional order. In addition to its distinguished authorship, the book has two prominent features that set it apart from other books in the field: an emphasis on the social, political, and moral theory that provides meaning to constitutional law and interpretation, and a comparative perspective that situates the American experience within a world context that serves as an invaluable prism through which to illuminate the special features of our own constitutional order. While the focus of the book is entirely on American constitutional law, the book asks students to consider what, if anything, is unique in American constitutional life and what we share with other constitutional democracies. Each chapter is preceded by an introductory essay that highlights these major themes and also situates the cases in their proper historical and political contexts. This new edition offers updated and expanded treatment of a number of important and timely topics, including the death penalty, privacy, affirmative action, and school segregation. Volume 2 of this text focuses on civil rights and basic freedoms and includes separate chapters on race and gender.

Procedural Requirements for Administrative Limits to Property Rights Martina Conticelli, Thomas Perroud, 2022-09-01. Through a comparative survey spanning twelve legal systems and a transnational regime, the fourth volume in this series aims to shed light on the core of administrative activity that exemplifies the negative State. Within the vast field of adjudication, the book addresses one of the most traditional sets of procedures: namely, the exercise of public powers affecting property rights. Following the method adopted in the CoCEAL project, this volume takes the fundamentals of expropriation in a given legal order as its starting point and examines various cases. The main requirements for property rights deprivations and restrictions are presented through national reports and discussed through hypotheticals, while the comparative analysis focuses on procedural propriety and fairness. This book is divided into three parts. The first part introduces the project and the topic. The second part covers the legal systems chosen for this study. The third goes on to present a synchronic comparison across systems, highlighting the relationship between shared and distinctive traits with a view to the way supranational and international rules increasingly supplement municipal regimes. The concluding chapter discusses the current regime on public regulation of property in contemporary administrative systems.

Property and The Human Rights Act 1998 Tom Allen, 2005-10-01 By giving further effect to the European Convention on Human Rights the Human Rights Act 1998 has had a significant effect on property law Article 1 of the First Protocol to the Convention is particularly important as it protects against the interference with the enjoyment of possessions Compulsory acquisition insolvency planning taxation environmental regulation and landlord and tenant laws are just some of the fields where the British and European courts have already had to assess the impact of the Protocol on private property The Human Rights Act 1998 also restricts the scope of property rights as some Convention rights conflict with rights of private property For example the Article 8 right to respect for the home has been used to protect against environmental harm in some cases at the expense of property and economic rights This book seeks to provide a structured approach to the extensive case law of the European Court of Human Rights and the UK courts on these issues and to provide guidance on the direction the law is likely to take in future Chapters cover the history and drafting of the relevant Convention rights the scope and structure of the rights especially Article 1 of the First Protocol and how through the Human Rights Act 1998 the Convention rights have already affected and are likely to affect developments in selected areas of English law
