Armed Non-State Actors in International Humanitarian and Human Rights Law Konstantinos Mastorodimos, 2017-05-15 The accountability of armed non state actors is a neglected field of international law overtaken by the regimes of state responsibility and individual criminal accountability as well as fears of legitimacy Yet armed non state actors are important players in the international arena and their activities have significant repercussions This book focuses on their obligations and accountability when they do not function as state agents regardless of the existence or extent of accountability of their individual members The author claims that their distinct features lead to their classification into three different types de facto entities armed non state actors in control of territory and common article 3 armed non state actors The mechanisms that trigger the applicability of humanitarian and human rights law regimes are examined in detail as well as the framework of obligations In both cases the author argues that armed non state actors should not be treated as entering international law and process exclusively through the state The study concludes by focussing on their accountability in international humanitarian and human rights law and more specifically to the rules of attribution remedies and reparations for violations of their primary obligations

State Responsibility, Climate Change and Human Rights under International Law Margaretha Wewerinke-Singh, 2019-03-21 The last decade has witnessed an increasing focus on the relationship between climate change and human rights Several international human rights bodies have expressed concern about the negative implications of climate change for the enjoyment of human rights and the Paris Agreement is the first multilateral climate agreement to refer explicitly to states human rights obligations in connection with climate change Yet despite this there are still significant gaps in our understanding of the role of international human rights law in enhancing accountability for climate action or inaction As the Paris Agreement has shifted the focus of the climate change regime towards voluntary action and the humanitarian impacts of climate change are increasingly being felt around the world accountability for climate change has become an increasingly salient issue This book offers a timely and comprehensive analysis of the legal issues related to accountability for the human rights impact of climate change drawing on the state responsibility regime It explains when and where state action relating to climate change may amount to a violation of human rights and evaluates various avenues of legal redress available to victims The overall analysis offers a perceptive insight into the potential of innovative rights based climate actions to shape climate and energy policies around the world

Human Rights and the Dark Side of Globalisation

Thomas Gammeltoft-Hansen, Jens Vedsted-Hansen, 2016-12-08 This edited volume examines the continued viability of international human rights law in the context of growing transnational law enforcement. With states increasingly making use of global governance modes, core exercises of public authority such as migration control, surveillance, detention and policing are increasingly conducted extraterritorially, outsourced to foreign governments or delegated to non-state actors. New forms of cooperation raise difficult questions about divided, shared and joint responsibility under international human rights law. At the same time, some governments engage in transnational law enforcement exactly to avoid such responsibilities, creatively seeking to navigate the complex, overlapping and sometimes unclear bodies of international law. As such, this volume argues that this area represents a particular dark side of globalisation, requiring both scholars and practitioners to revisit basic assumptions and legal strategies. The volume will be of great interest to students, scholars and practitioners of international relations, human rights and public international law.

Institutional Supports for the International Rule of Law Charles Sampford, Ramesh Thakur, 2014-08-27 The rule of law is widely seen as the cornerstone of any effective polity and increasingly a vital component of the international political system. If the international rule of law were to be strengthened, it would greatly contribute to trade, security, human rights and global cooperation in a range of fields. Yet in many areas, the rule of law seems almost absent in international affairs. This book explores the institutions that support the effectiveness of the rule of law domestically. It focuses on the extent to which similar institutions already exist at international level and analyses the possibility of their further development. The authors speculate on how the international rule of law might be advanced in the future, thereby suggesting potential strategies for strengthening the international rule of law. Adopting an interdisciplinary approach and combining the fields of international relations, politics and law, this book covers a range of institutions including UN Security Council, International Court of Justice, Human rights machinery, Regional human rights, International Criminal Court, World Trade Organization, International Tribunal for the Law of the Sea, UN Department of Peacekeeping Operations. It will be of strong interest to students and scholars of international relations, international organisations, global governance, international law, migration law, international peace and security, law, applied ethics, political economy, political science and sociology.

The Law of International Human Rights Protection Walter Kälin, Jörg Künzli, 2019-09-19 At a time when human rights are coming under increasing pressure, in-depth knowledge and understanding of their foundations, conceptual underpinnings and current practice remain crucial. The second edition of Walter Kälin and Jörg Künzli's authoritative book provides a concise but comprehensive legal analysis of international human rights protection at the global and regional levels. It shows that human rights are real rights, creating legal entitlements for those who are protected by them and imposing legal obligations on those bound by them. Based in particular on a wide

ranging analysis of international case law the book focuses on the sources and scope of application of human rights and a discussion of their substantive guarantees Further chapters describe the different mechanisms to monitor the implementation of human rights obligations ranging from the regional human rights courts in Africa the Americas and Europe and the UN treaty bodies to the international criminal tribunals the International Court of Justice and the UN Security Council The book is based on an understanding of human rights as legal concepts that address basic human needs and vulnerabilities and highlights the indivisibility of civil and political rights on the one and economic social and cultural rights on the other hand It also highlights the convergence of international human rights and international humanitarian law and the interlinkages with international criminal law as well as general international law in particular the law of state responsibility

The Prevention of Gross Human Rights Violations Under International Human Rights Law Nienke van der Have, 2017-12-29 This book contains a systematic assessment of the content and scope of obligations to prevent gross human rights violations There has been a great deal of attention for concepts aiming to prevent gross human rights violations such as conflict prevention and the responsibility to protect Yet despite this shift in attention towards prevention it has remained unclear what legal obligations states have to prevent gross human rights violations under international human rights law The focus in this book is on three specific types of injury prohibited under international human rights law torture arbitrary death and genocide Further distinctions are made between four temporal phases long term prevention short term prevention preventing continuation preventing recurrence and territorial and extraterritorial obligations The structure of the book allows academics and practitioners to learn about obligations to prevent gross human rights violations in a general sense as well as find targeted information on the content and scope of obligations in specific settings Nienke van der Have recently completed her Ph D at the Amsterdam Center for International Law which forms part of the University of Amsterdam s Faculty of Law and currently works as Senior legal specialist at the department of Constitutional Affairs and Legislation of the Ministry of the Interior and Kingdom Relations of The Netherlands

demonstrates how these international organizations are a driving force in establishing and operationalizing international standards for corporate environmental accountability The new edition includes a recent assessment of the Rio 20 Summit analysis of the UN Framework on Business and Human Rights and the 2012 Performance Standards It contains a discussion on the role of fair and equitable benefit sharing under the Convention on Biological Diversity and international human rights law and analysis of the monitoring practice of the UN Special Rapporteur on Indigenous Peoples Rights This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is offered as a free PDF download from OUP and selected open access locations

The EU's Human Rights Responsibility Gap Joyce De Coninck, 2024-11-14 Can the EU be held legally responsible for its contributions to human rights harms in its Integrated Border Management policy Or do systemic legal design flaws in the EU's human rights responsibility regime give rise to a significant responsibility gap This book delves into these pressing questions offering a transversal analysis of applicable legal frameworks under international and EU law Divided into three parts the book first analyses the international and EU human rights responsibility frameworks revealing both normative incongruency as well as liability incongruency Part two applies these frameworks to specific illustrations within the four tiers of the EU's Integrated Border Management exposing the critical points where responsibility falters Building on these findings and drawing from shared responsibility and relationality theories part three briefly introduces Relational Human Rights Responsibility as an alternative method to ascertaining human rights responsibility of the EU specifically and international organisations more generally
