Rise Of Cable Programming In The United States:

The Rise of Cable Programming in the United States Megan Mullen, 2009-06-23 Winner McGannon Communications Research Award 2004 In 1971 the Sloan Commission on Cable Communications likened the ongoing developments in cable television to the first uses of movable type and the invention of the telephone Cable s proponents in the late 1960s and early 1970s hoped it would eventually remedy all the perceived ills of broadcast television including lowest common denominator programming inability to serve the needs of local audiences and failure to recognize the needs of cultural minorities Yet a quarter century after the blue sky era cable television programming closely resembled and indeed depended upon broadcast television programming Whatever happened to the Sloan Commission s revolution now in sight In this book Megan Mullen examines the first half century of cable television to understand why cable never achieved its promise as a radically different means of communication Using textual analysis and oral archival and regulatory history she chronicles and analyzes cable programming developments in the United States during three critical stages of the medium s history the early community antenna CATV years 1948 1967 the optimistic blue sky years 1968 1975 and the early satellite years 1976 1995 This history clearly reveals how cable s roots as a retransmitter of broadcast signals the regulatory constraints that stymied innovation and the economic success of cable as an outlet for broadcast or broadcast type programs all combined to defeat most utopian visions for cable programming **FCC Record** United States. The Rise of the Hispanic Market in the United States Louis E. V. Nevaer, 2015-06-03 Not only are Hispanics the largest minority group in the United States but Mexico is fast becoming our major trading partner surpassing even Japan In fact the U S now has the fourth largest Spanish speaking population in the world after Mexico Spain and Argentina How has this demographic group transformed the U S into a bi lingual nation within the span of a generation Why do Hispanics resist assimilation and insist on speaking Spanish in public life And how can businesses effectively reach the emerging Hispanic consumer market with its estimated purchasing power of USD1 trillion by 2010 These questions constitute the single most important marketing challenge for corporate America in the twenty first century This book examines the Hispanic worldview and how it informs people s economic decisions both in the United States and across North America It challenges the viewpoint that American culture will soon dominate its NAFTA trading partners looks carefully at the market for Hispanic goods in the U S and the market for our goods throughout the Spanish speaking world and shows how marketeers are now reaching the Hispanic community domestically The information and insights found here are essential for teachers students and professionals in the fields of international finance and world trade as well as almost all areas of business marketing and strategic planning
