Rise Of Bronze Age Society Travels Transmissions And Transformations:

The Rise of Bronze Age Society Kristian Kristiansen, Thomas B. Larsson, 2005-12-08 This 2005 book presents a significant interpretation of the social transformation in Bronze Age Europe

The rise of Bronze Age society Kristian Kristiansen, 2005

Warfare in Bronze Age Society Christian Horn, Kristian Kristiansen, 2018-04-26 Warfare in Bronze Age Society takes a fresh look at warfare and its role in reshaping Bronze Age society The Bronze Age represents the global emergence of a militarized society with a martial culture materialized in a package of new efficient weapons that remained in use for millennia to come Warfare became institutionalized and professionalized during the Bronze Age and a new class of warriors made their appearance Evidence for this development is reflected in the ostentatious display of weapons in burials and hoards and in iconography from rock art to palace frescoes These new manifestations of martial culture constructed the warrior as a Hero and warfare as Heroic The case studies written by an international team of scholars discuss these and other new aspects of Bronze Age warfare Moreover the essays show that warriors also facilitated mobility and innovation as new weapons would have quickly spread from the Mediterranean to northern Europe

Bronze Age Connections Peter Clark, 2009-09-03 New and exciting discoveries on either side of the English Channel in recent years have begun to show that people living in the coastal zones of Belgium southern Britain northern France and the Netherlands shared a common material culture during the Bronze Age between three and four thousand years ago They used similar styles of pottery and metalwork lived in the same kind of houses and buried their dead in the same kind of tombs often quite different to those used by their neighbours further inland The sea did not appear to be a barrier to these people but rather a highway connecting communities in a unique cultural identity the People of La Manche Symbolic of these maritime Bronze Age Connections is the iconic Dover Bronze Age boat one of Europe's greatest prehistoric discoveries and testament to the skill and technical sophistication of our Bronze Age ancestors This monograph presents papers from a conference held in Dover in 2006 organised by the Dover Bronze Age Boat Trust which brought together scholars from many different countries to explore and celebrate these ancient seaborne contacts Twelve wide ranging chapters explore themes of travel exchange production magic and ritual that throw new light on our understanding of the seafaring peoples of the second millennium BC

The Recurring Dark Ages Sing C. Chew, 2006-12-19 In this modern era of global environmental crisis Sing Chew provides a convincing analysis of the recurring human and environmental crises identified as Dark Ages In this his second of a three volume series concerning world ecological degradation Chew reviews the past 5 000 year history of structural conditions and processes that define the relationship between nature and culture Chew's message about the coming Dark Ages as human communities continue to reorganize to meet the contingencies of ecological scarcity and climate changes is a must read for those concerned with human interactions and environmental changes including environmental anthropologists and historians world historians geographers archaeologists and environmental scientists

Bronze Age Maritime and

Warrior Dynamics in Island East Asia Mark Hudson, 2022-07-07 Recent interdisciplinary studies combining scientific techniques such as ancient DNA analysis with humanistic re evaluations of the transcultural value of bronze have presented archaeologists with a fresh view of the Bronze Age in Europe The new research emphasises long distance connectivities and political decentralisation Bronzisation is discussed as a type of proto globalisation In this Element Mark Hudson examines whether these approaches can also be applied to East Asia Focusing primarily on Island East Asia he analyses trade maritime interactions and warrior culture in a comparative Eurasian framework He argues that the international division of labour associated with Bronze Age trade provided an important stimulus to the rise of decentralised complexity in regions peripheral to alluvial states Building on James Scott's work the concept of the barbarian niche is proposed as a way to model the longue dur e of premodern Eurasian history This title is also available as open access on Cambridge Core

Gender and Society on the Margins of Bronze Age Europe Mark Haughton, 2024-11-11 This book explores and critiques the underlying assumption that a binary gender system and patriarchal norms were universal in Bronze Age Europe through a careful analysis of burial practice in Ireland and Scotland Gender and Society on the Margins of Bronze Age Europe makes a decisive and critical intervention in the debate around the nature of gender in the European Bronze Age Tacking between scales from the detail of local practice to a major analysis of recently excavated and analysed skeletons it argues that binary gender was far from universal in Bronze Age Europe and consequently questions its broader importance Unlike bronze technology shared widely between communities across Europe binary gender was an optional or negotiable part of Bronze Age life The book goes on to assess the huge implications of this evidence firstly for the history of gender as it indicates that there was no simple linear trajectory to binary gender and patriarchy and secondly by demonstrating that interconnectivity in Bronze Age Europe did not result in fundamental social and ideological agreement undermining the idea of a shared Bronze Age society At its core the book reimagines how gender archaeology can be conducted inspired by the sub discipline's radical origins and following a method rooted in the detail of local practice This book is essential reading for scholars and students of the European Bronze Age gender pre history and gender archaeology It connects with major themes in theoretical thinking across the humanities particularly relating to posthumanism assemblage theory embodiment and gender

Picturing the Bronze Age Johan Ling, Peter Skoglund, Ulf Bertilsson, 2015-02-28 Pictures from the Bronze Age are numerous vivid and complex There is no other prehistoric period that has produced such a wide range of images spanning from rock art to figurines to decoration on bronzes and gold Fourteen papers with a geographical coverage from Scandinavia to the Iberian Peninsula examine a wide range of topics reflecting the many forms and expressions of Bronze Age imagery encompassing important themes including religion materiality mobility interaction power and gender Contributors explore specific elements of rock art in some detail such as the representation of the human form images of manslaughter and gender identities The relationship between rock art imagery and its location on the one hand and metalwork and networks of trade and exchange

of both materials and ideas on the other are considered Modern and ancient perceptions of rock art are discussed in particular the changing perceptions that have developed during almost 150 years of documented research Picturing the Bronze Age is based on an international workshop with the same title held in Tanum Sweden in October 2012 *Objects of the Past in the Past: Investigating the Significance of Earlier Artefacts in Later Contexts* Matthew G. Knight, Dot Boughton, Rachel E. Wilkinson, 2019-07-31 How did past communities view understand and communicate their pasts And how can we as archaeologists understand this This volume brings together a range of case studies in which objects of the past were encountered and reappropriated **The Oxford Handbook of the European Bronze Age** Anthony Harding, Harry Fokkens, 2013-06-27 The Oxford Handbook of the European Bronze Age is a wide ranging survey of a crucial period in prehistory during which many social economic and technological changes took place Written by expert specialists in the field the book provides coverage both of the themes that characterize the period and of the specific developments that took place in the various countries of Europe After an introduction and a discussion of chronology successive chapters deal with settlement studies burial analysis hoards and hoarding monumentality rock art cosmology gender and trade as well as a series of articles on specific technologies and crafts such as transport metals glass salt textiles and weighing The second half of the book covers each country in turn From Ireland to Russia Scandinavia to Sicily every area is considered and up to date information on important recent finds is discussed in detail The book is the first to consider the whole of the European Bronze Age in both geographical and thematic terms and will be the standard book on the subject for the foreseeable future Trade and Civilisation Kristian Kristiansen, Thomas Lindkvist, Janken Myrdal, 2018-07-05 Provides the first global analysis of the relationship between trade and civilisation from the beginning of civilisation until the modern era **Modes of Production and Archaeology** Robert M. Rosenswig, Jerimy J. Cunningham, 2017-05-15 This volume challenges the historical materialistic non capitalist modes that are used by archaeologists as not all that useful and instead considers how social labor is organized to transform nature into culturally refined and useful resources and how this can either maintain or change a culture Rather than describe what a society is using the theoretical framework of Marx and materialism a mode of production approach explores what a society does in a more dynamic sense *Power from Below in Premodern Societies* T. L. Thurston, Manuel Fernández-Götz, 2021-10-21 This volume challenges traditional narratives on power moving away from elite centered models and focusing instead on the archaeology of commoners *Elevated Rock Art* Johan Ling, 2014-11-30 How may Bohuslän rock art and landscape be perceived and understood Since the Bronze Age the landscape has been transformed by shore displacement but largely due to misunderstanding and certain ideas about the character of Bronze Age society rock art research in Tanum has drawn much of its inspiration from the present agrarian landscape This perception of the landscape has not been a major issue This volume republished from the GOTAC Serie B Gothenburg Archaeological thesis 49 aims to shed light on the process of shore displacement and its social and cognitive implications for the interpretation of rock

art in the prehistoric landscape The findings clearly show that in the Bronze Age the majority of rock art sites in Bohuslän had a very close spatial connection to the sea Much rock art analysis focuses on the contemplative observer The more direct activities related to rock art are seldom fully considered Here the basic conditions for the production of rock art social theory and approaches to image communication symbolism and social action are discussed and related to palpable social forms of the reading of rock art The general location and content of the Bronze Age remains indicate a tendency towards the maritime realm which seems to have included both socio ritual and socio economic matters of production and consumption and that Bronze Age groups in Bohuslän were highly active and mobile The numerous configurations of ship images on the rocks could indicate a general transition or drift towards the maritime realm Marking or manifesting such transitions in some way may have been important and it is tempting to perceive the rock art as traces of such transitions or positions in the landscape All this points to a maritime understanding of Bronze Age rock art in northern Bohuslän The Bell Beaker Transition in Europe Maria Pilar Prieto Martínez, Laure Salanova, 2015-10-31 Could the circulation of objects or ideas and the mobility of artisans explain the unprecedented uniformity of the material culture observed throughout the whole of Europe The 17 papers presented here offer a range of new and different perspectives on the Beaker phenomenon across Europe The focus is not on Bell Beaker pottery but on social groups craft specialists warriors chiefs extended or nuclear families using technological studies and physical anthropology to understand mobility patterns during the 3rd millennium BC Chronological evolution is used to reconstruct the rhythm of Bell Beaker diffusion and the environmental background that could explain this mobility and the socioeconomic changes observed during this period of transition toward Bronze Age societies The chapters are mainly organized geographically covering Eastern Europe the Mediterranean shores and the Atlantic coast of the Iberian Peninsula includes some areas that are traditionally studied and well known such as France the British Isles or Central Europe but also others that have so far been considered peripheral such as Norway Denmark or Galicia This journey not only offers a complex and diverse image of Bell Beaker societies but also of a supra regional structure that articulated a new type of society on an unprecedented scale *New Perspectives on the Bronze Age* Sophie Bergerbrant, Anna Wessman, 2017-04-30 This collection of articles helps to explain why the Bronze Age has come to hold such a fascination within modern archaeological research By providing new theoretical and analytical perspectives on the evidence new interpretative avenues have opened it situates the history of the Bronze Age in both a local and a global setting

Travelling Objects: Changing Values Benjamin Jennings, 2014-07-18 Since their initial discovery in the nineteenth century the enigmatic prehistoric lake dwellings of the Circum Alpine region have captured the imagination of the public and archaeologists alike **In the Darkest of Days** Matthew J. Walsh, Sean O'Neill, Lasse Sørensen, 2024-02-29 This book collects recent works on the subjects of sacrificial offerings ritualized violence and the relative values thereof in the contexts of Scandinavian prehistory from the Neolithic to the Viking era The volume builds on a workshop hosted at the National

Museum of Denmark in 2018 which inaugurated the beginning of the research project Human Sacrifice and Value The limits of sacred violence and was supported by the Museum of Cultural History at the University of Oslo The volume brings together research and perspectives that attempt to go beyond the who what and where of most archaeological and anthropological investigations of sacrificial violence to address both the underlying and explicit forms of value associated with such events The volume re opens investigations into notions of value relating to diverse evidence and suggested evidence for human sacrifice and related ritualized violence It covers a broad spectrum of issues relating to novel interpretations of the existing archaeological materials but with a focus on the study of value and value dynamics in these diverse ritual contexts engaging in questions of identity cosmology economics and social relations Cases span from the Scandinavian Late Neolithic and Nordic Bronze Age through to the well known wetland deposits and bog bodies of the Iron Age to Viking era executions deviant burials and contemporaneous double multiple graves exploring the implications for the transformation of sacrificial practices across Scandinavian prehistory Each contribution attempts to untangle the myriad forms of value at play in different incarnations of human offerings and provide insights into how those values were expressed e g in the selection and treatment of victims in relation to their status personhood identity and life history Local Societies in Bronze Age Northern Europe Nils Anfinset, Melanie Wigglesworth, 2014-10-14 This book aims to understand the process of the Bronze Age societies of Northern Europe which are often regarded as the periphery and a bleak contrast to the Central European Bronze Age The Bronze Age is the first globalised period with new types of societies and new modes of exchange and trade In this context there is considerable local variation and diversity within the Bronze Age societies of Northern Europe which is poorly understood although there have been advances and changes in this research Therefore this book challenges some of the mainstream opinions on the Bronze Age of Northern Europe and focus on local and regional aspects This is done by a series of articles from significant contributors that deal with these issues on theoretical and empirical levels with regards to differences cultural dualism boundaries regions and regionality in a period of increased globalisation The result is a movement away from local and regional aspects toward communications travels and contacts between northern Europe and the greater world not only towards Central Europe and the Near East but also towards the east Northern Arctic Europe is often left out in these discussions and this book will contribute to this greater picture of the Bronze Age world

Bronzization: Essays in Bronze Age Archaeology Heide W. Nørgaard, Samantha S. Reiter, 2025-02-20 A collection of state of the art articles which integrate new insights from the many advances in research on the subject into a new and up to date vision of the Bronze Age as a Europeanised or even globalised period Papers revise current understanding of bronzization and bronzification in line with a holistic view of recent scientific advances
