corporate treasurers who are usually involved in the risk management strategies of their organisation and who have responsibility for implementing those strategies in practice The research is the first comprehensive UK study on this area Relevant to the imminent arrival of IAS 39 the International Accounting Standard for Derivatives that will be in force by January 2005 for all EU companies The findings of the book have implications for government policy and regulators *Risk Management* Michael Frenkel, Ulrich Hommel, Markus Rudolf, 2013-06-29 Michael Frenkel Ulrich Hommel Markus Rudolf This volume has been written in honor of Gunter Dufey who has dedicated his professional career to the advancement of international business education around the globe and who has done much to improve our understanding of risk management as a challenge as well as an opportunity for shareholder value driven enterprises The editors have used his 60th birthday at the beginning of the new millenium as a welcome opportunity to honor his lifelong commitment to research university teaching and executive training We have done so by bringing together a select group of individuals who have joined us in an effort to highlight the most recent developments as well as the immediate challenges in the field of risk management The contributors have all been influenced by Gunter Dufey s work as students co authors faculty colleagues and fellow researchers The collection of papers contained in this volume bears witness to his mentoring role and builds on his own research agenda Throughout his professional career Gunter Dufey has been regarded as the prototype of the global citizen by his friends and colleagues Financial Risk Management - Management of Interest Risk from a Corporate Treasury Perspective in a Service Enterprise Jana Schönborn, 2010-03-15 Inhaltsangabe Introduction The importance of a systematic risk identification measurement and management as a management duty has increased in recent years After risk management and interest risk management in particular was primarily relevant for banks in the past it is a crucial competition factor for all enterprises today Especially since the recent financial crisis treasurers are far more risk conscious and companies are reassessing their financial risk management procedures The most important parameter for the cost of financing and the return of capital investments is the interest rate However the interest rate is subject to fluctuations what constitute the interest rate risk the company is exposed to With increasing volatile financial markets and global competition CFOs are focusing more and more on an efficient measurement and management of interest rate risk In this context this academic paper aims to point out the risks of an adverse change in interest rates for a corporate portfolio of interest bearing positions and show possibilities to measure and manage these risks The 2nd and 3rd sections set the scene for interest risk management in a corporate treasury of a service enterprise by providing essential knowledge about financial risk management and giving an insight into the characteristics of a service enterprise as well as the responsibilities of a corporate treasury and the factors that influence the treasury risk management approach In section 4 and 5 respectively follows a process oriented instruction of how to quantify interest rate risk and how to manage it Besides the risk measures duration and convexity 4.2 two different approaches to value at risk the historical simulation 4.3.2 and the variance covariance
