The Oxford Handbook of Sociology, Social Theory, and Organization Studies Paul S. Adler, Paul Du Gay, Glenn Morgan, Michael I. Reed, 2014 Sociology and social theory has always been a major source of new perspectives for organization studies Access to a series of authoritative accounts of theorists and research themes in sociology and social theory which have influenced developments in organization studies is essential for those wishing to deepen and extend their

knowledge of the intersection of sociology and organization studies This goal is achieved by drawing on a group of internationally renowned scholars committed in their own work to strengthening these links and asking them to provide critical accounts of particular theorists and research themes which have straddled this divide This volume aims to strengthen ties between organization studies and contemporary sociological work at a time when there are increasing institutional barriers to such cooperation potentially generating a myopia that constricts new developments Used in conjunction with its companion volume The Oxford Handbook of Sociology and Organization Studies Classical Foundations the reader is provided with a comprehensive account of the productive and critical interaction between sociology and organization studies over many decades Highly international in scope theorists and themes are drawn from both the USA and Europe in equal measure Similarly the authors of the chapters are drawn from both sides of the Atlantic The result is a series of chapters on individuals and key research themes and debates which will provide faculty and post graduate researchers with appreciative authoritative and critical accounts that can be drawn on to design courses or provided guided reading to the field

Risk Analysis and Society Timothy McDaniels, Mitchell Small, 2004 This new book views risk analysis as one important basis for informed debate policy decisions and governance regarding risk issues within societies Its twelve chapters provide interdisciplinary insights about the fundamental issues in risk analysis for the beginning of a new century The chapter authors are some of the leading researchers in the broad fields that provide the basis for the risk analysis including the social natural medical engineering and physical sciences They address a wide range of issues including new perspectives on uncertainty and variability analysis exposure analysis and the role of precaution environmental risk and justice risk valuation and citizen involvement extreme events the role of efficiency in risk management and the assessment and governance of transboundary and global risks The book will be used as a starting point for discussions at the 2003 First World Congress on Risk to be held in Brussels

Civil Society Organization and Disaster Risk Reduction Rajib Shaw, Takako Izumi, 2014-04-10 Civil society organizations CSOs have played important roles over the years in the disaster field Starting from the traditional approach of response and relief the emphasis has gradually shifted to disaster risk reduction From international nongovernmental organizations NGOs to national and local NGOs all stakeholders have recognized the significance of and need for community based risk reduction In their different capacities they have endeavored to establish links to the policy options at the local and national levels There still are many issues that remain untouched by CSOs however and local CSOs face special challenges in resources in terms of human financial and technical issues Drawing examples from Asia this book is structured on the roles of CSOs according to the Hyogo Framework for Action priority areas policy making risk assessment education and training underlying risk factors and response recovery The primary target groups for this book are students and researchers in the fields of environment disaster risk reduction and climate change studies The book provides a clear view of the current trends of research in the field and furnishes basic knowledge on these important topics

Another target group comprises practitioners and policy makers who will be able to apply the knowledge collected here to policy and decision making

The Routledge International Handbook of Valuation and Society Anne Krüger, Thorsten Peetz, Hilmar Schaefer, 2024-10-15 The Routledge International Handbook of Valuation and Society builds on the growing research interest in practices of valuation throughout contemporary society providing an up to date overview of the different facets of research in the sociology of valuation The handbook is divided into five major sections with attention to the treatment of valuation in major areas of sociological theory as well as its key concepts discourses and approaches Part I Theoretical perspectives Part II Central valuation practices in societal spheres Part III Cross cutting valuation practices Part IV Valuation and societal change Part V Reflections Together the chapters in this book characterize distinctive practices of valuation across different societal spheres such as education and science arts and culture economic life the environment or digital culture and social media They also examine the role of valuation in contemporary society and consider the ways it effects social change This seminal handbook aims at taking stock of the development of the study of valuation with a selection of topics that are important for understanding core perspectives and developments as well as anticipating its future orientation It will appeal to scholars across the social sciences with interest in the ubiquity of the valuation practices and its effects on social life

Society and Social Movements in Small States Lino Briguglio, Michael Briguglio, Sheila Bunwaree, Claire Slatter, 2023-02-22 This volume is unique because of its focus on small states There are many studies on civil society and social movements but none that specifically deal with this category of countries As is well known small states have particular characteristics including a limited ability to reap the benefits of economies of scale a high degree of exposure to forces outside their control and the proximity of politicians to the voters often leading to clientelistic relationships and patronage networks The small island developing states have the additional problem of high environmental vulnerability with some also dealing with disproportionate ecological footprints These factors have a bearing on the organization and performance of civil society organizations and social movements as explained in several chapters of this book The volume is organized in three parts dealing with aspects of civil society and social moments in small states in the political social and environmental spheres respectively Various definitions of civil society are proposed in the chapters but most authors associate the term with organized groups operating in the interest of citizens independently of government and commercial business including various forms of non governmental organizations NGOs Civil society also encompasses social movements which are considered to be loosely organized collective campaigns in pursuit of social goals These two terms are sometimes used interchangeably however some authors argue that social movements tend to engage in contentious politics including protests while NGOs engage through more organized and institutional routes [The SAGE Encyclopedia of Business Ethics and Society](#) Robert W. Nexus of Resilience and Public Policy in a Modern Risk Society Mika Shimizu,Allen L. Clark,2019-02-01 This is the first book to articulate resilience based public policy for a constantly changing complex and uncertain risk society Its primary focus is on operationalizing resilience i e on incorporating elements of resilience in public policy in the context of our modern

risk society While there is a wealth of literature on resilience and disaster risk management there are few publications that focus on the nexus of resilience and public policy resulting in gaps between various fields and public policy for resilient societies and disaster risk management In response this book integrates the latest theoretical insights on public policy and resilience and the latest practical analyses of case studies such as the Tohoku Disaster Great East Japan Earthquake in 2011 and Hurricane Sandy on the North American East Coast in 2012 to provide policy tools for future resilient societies and disaster risk management The recent disaster cases illustrate that our changing complex and uncertain risk environment requires far more resilience based public policy through co production of knowledge than is normally required for conventional disasters By linking various fields and public policy the book articulates a resilience based public policy i e the incorporation of resilience into various entities by designing and implementing linkages These include national to local linkages linkages between different entities such as scientific communities and decision makers and linkages between financial human and information resources Thus the nexus of resilience and public policy presented in this book aims at better public policy to face a changing and complex risk society together with fundamental uncertainties at regional national and local levels around the world
