Risk Environment And Modernity Vol 4 Towards A New Ecology:

Engaging the Public with Climate Change Lorraine Whitmarsh, Irene Lorenzoni, Saffron O'Neill, 2012-06-25 Despite increasing public awareness of climate change our behaviours relating to consumption and energy use remain largely unchanged This book answers the urgent call for effective engagement methods to foster sustainable lifestyles community action and social change Written by practitioners and academics the chapters combine theoretical perspectives with case studies and practical guidance examining what works and what doesn't and providing transferable lessons for future engagement approaches Showcasing innovative thought and approaches from around the world this book is essential reading for anyone working to foster real and lasting behavioural and social change *Explaining Environmentalism* Philip W. Sutton, 2019-06-04 This title was first published in 2000 The author examines those current theories which purport to explain the emergence and character of new social movements in the advanced industrial societies since the 1960s In particular it sets out to test the efficacy of these explanations in relation to the history of the environmental movement in Britain The book breaks new ground in bringing together both short term and the more historically orientated long term explanations into a single volume thus providing an invaluable resource for students of social movements Its critical exposition of major theories also points to the need for a more developmental approach which seeks to connect old and new movement forms thus allowing for a more balanced evaluation of the potential of the environmental movement to bring about significant social change **Terrorism, Risk and the City** Jon Coaffee, 2017-10-24 The development of defensive strategies encompassing the fortification and privatization of the city has attracted significant attention during recent years and has become particularly relevant in the aftermath of September 11th Dealing with issues of risk security and the spatial restructuring of contemporary western cities this book examines how the perceived risk of terrorist attack led to changes in the physical form and institutional infrastructure of the city of London during the 1990s when the city was a prime terrorist target The book analyses how the various formal and informal strategies adopted in the City attempted to reduce both the physical and financial risk of terrorism This was undertaken through a series of place specific security initiatives and risk management policies which led to increased fortification a substantial rise in terrorism insurance premiums and changing institutional relations at a variety of spatial scales It also argues that the security measures deployed were developed not in terms of an anti terrorist effort but in relation to the unintended by products of these approaches such as crime reduction and enhanced traffic management capabilities *Geographies of Rural Cultures and Societies* Moya Kneafsey, 2017-09-08 The last decade or so has witnessed a flourishing of research in rural geography in particular approaches which have developed socio cultural perspectives on rural issues This book brings together well established and newer researchers to examine the position of rural social and cultural geography at the beginning of the 21st century and to suggest new research agendas It offers critical evaluations of theoretical positions and advances introduces new conceptual and methodological tools and

reports on recent empirical work on a variety of topical issues in a number of countries With diverse theoretical and empirical content the book makes a valuable contribution to the development of research into changing social and cultural geographies of rurality in developed or Western countries Rationality and the Environment Bo Elling,2012 Environmental assessment and management involve the production of scientific knowledge and its use in decision making processes The result is that within these essentially rational political assessment frameworks experts are creating and applying scientific knowledge for decision and management purposes that actually have strong ethical and aesthetic dimensions Yet these rational political frameworks lack the tools to provide guidance on ethical and aesthetic issues that affect the wider public This revolutionary work argues that ethical and aesthetic dimensions can only be brought into environmental politics and policies by citizens actively taking a stand on the specific matters in question The author draws on Habermas trisection of rationality as cognitive instrumental moral practical and aesthetic expressive to suggest that truly effective environmental policy needs to activate all three approaches and not favour only the rational To achieve this objective the author argues that public participation in environmental policy and assessment is necessary to counteract the dictatorship of technical and economic instrumentality in environmental policy the failure to take ethical and aesthetic rationalities into account and more importantly how such policy is applied on the ground to shape our natural and material world **Security and Climate**

Change Mark Lacy,2012-09-10 This new book explains why the international community has responded with a sense of fatalistic passivity to climate change It presents a distinct critique of realism through the study of this topic commonly overlooked in international relations The author argues that the realist view rests on a dangerous contradiction far from delivering security it serves to limit the way we think about the new generation of risks we face The book also provides a detailed case study evaluating US climate politics under the Clinton and Bush administrations *Environment and Global Modernity* Gert Spaargaren,Arthur P J Mol,Frederick H Buttel,2000-06-02 This accomplished book argues that we can only make sense of environmental issues if we consider them as part of a more encompassing process of social transformation It asks whether there is an emerging consensus between social scientists on the central issues in the debate on environmental change and if concerns about the environment constitute a major prop to the process of globalization The book provides a thorough discussion of the central themes in environmental sociology identifying two traditions ecological modernization theory and risk society theory **Handbook of Archaeological Theories** R. Alexander Bentley,Herbert D. G.

Maschner,Christopher Chippindale,2007-11-09 This handbook gathers original authoritative articles from leading archaeologists to compile the latest thinking about archaeological theory The authors provide a comprehensive picture of the theoretical foundations by which archaeologists contextualize and analyze their archaeological data Student readers will also gain a sense of the immense power that theory has for building interpretations of the past while recognizing the wonderful archaeological traditions that created it An extensive bibliography is included This volume is the single most important

reference for current information on contemporary archaeological theories

Biological Economies Richard Le Heron, Hugh Campbell, Nick Lewis, Michael Carolan, 2016-01-22 Recent agri food studies including commodity systems the political economy of agriculture regional development and wider examinations of the rural dimension in economic geography and rural sociology have been confronted by three challenges These can be summarized as more than human approaches to economic life a post structural political economy of food and agriculture and calls for more enactive performative research approaches This volume describes the genealogy of such approaches drawing on the reflective insights of more than five years of international engagement and research It demonstrates the kinds of new work being generated under these approaches and provides a means for exploring how they should be all understood as part of the same broader need to review theory and methods in the study of food agriculture rural development and economic geography This radical collective approach is elaborated as the Biological Economies approach The authors break out from traditional categories of analysis reconceptualising materialities and reframing economic assemblages as biological economies based on the notion of all research being enactive or performative

The Culture of Enterprise in Neoliberalism Tomas Marttila, 2013 This book provides an empirical study of the increasing importance of the concept of the entrepreneur in the context of the neoliberal cultural paradigm Using the theoretical framework of the post structural discourse theory and methods of qualitative discourse analysis the book describes the changes in political discourse that resulted in the increasing dominance of the figure of the entrepreneur after the late 1980s

Nuclear Power in Britain and Germany: Trust, Democracy, and Futures Christian Götter, 2025-07-28 Split into two volumes volume 2 is a cultural history of technology that provides new insights into the international history of nuclear energy by examining the perspectives of six nuclear power plants host communities in Britain and Germany from the 1950s to the late 1980s Based upon a continuous qualitative analysis of the public debates in these communities this book demonstrates that the societal conflicts about atomic power were never confined to the risks of one exceptional energy technology Instead they were shaped by larger societal issues which they in turn heavily influenced Therefore the local discourses about nuclear energy provide an insight into transformations the British and German societies underwent during the Cold War The book will be of value for scholars and students interested in the history of technology environmental political and contemporary history as well as science and technology studies It will be of interest to researchers and members of the public interested in the local history of Biblis Hinkley Point Lingens Oldbury on Severn Stade and Torness as well as the wider public interested in the ongoing debates about nuclear power as a source of energy and a potential answer to the challenges of climate change

Masons, Tricksters and Cartographers David Turnbull, 2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge

thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist perspectives have led us to believe rather they are complex and heterogeneous motleys

Handbook of Global Environmental Policy and Administration Dennis Soden,Brent R. Steel,1999-07-16 Presenting case studies involving Rwanda Nepal Australia Japan and Mexico including real time policy and administrative questions this versatile reference text provides a wide perspective on national and international environmental problems and policies featuring discussions with a regional emphasis as well as global significance Pooling the work of over 60 international contributors in disciplines ranging from anthropology to political science the Handbook of Global Environmental Policy and Administration illustrates how environmental concerns are incorporated into administrative functions and policy processes

The SAGE Handbook of Environment and Society Jules Pretty,Andy Ball,Ted Benton,Julia Guivant,David R Lee,David Orr,Max Pfeffer,Professor Hugh Ward,2007-10-30 A monumental and timely contribution to scholarship on society and environments The handbook makes it easy and compelling for anyone to learn about that scholarship in its full manifestations and as represented by some of the most highly respected researchers and thinkers in the English speaking world It is wide reaching in scope and far reaching in its implications for public and private action a definite must for serious researchers and their libraries Bonnie J McCay Rutgers University This is the desert island book for anyone interested in the relationship between society and the environment The editors have assembled a masterful collection of contributions on every conceivable dimension of environmental thinking in the social sciences and humanities No library should be without it Robyn Eckersley University of Melbourne The SAGE Handbook of Environment and Society focuses on the interactions between people societies and economies and the state of nature and the environment Editorially integrated but written from multi disciplinary perspectives it is organised in seven sections Environmental thought past and present Valuing the environment Knowledges and knowing Political economy of environmental change Environmental technologies Redesigning natures Institutions and policies for influencing the environment Key themes include locations where the environment society relation is most acute where for example there are few natural resources or where industrialization is unregulated the discussion of these issues at different scales local regional national and global the cost of damage to resources and the relation between principal actors in the environment society nexus Aimed at an international audience of academics research students researchers practitioners and policy makers The SAGE Handbook of Environment and Society presents readers in social science and natural science with a manual of the past present and future of environment society links

Playing with Fire John W. Sutherlin,Daniel Elliot Gonzalez,2021-04-15 Playing with Fire chronicles the ongoing struggle facing Louisiana families trying to live and work against the backdrop of corrupt politicians and corporate greed However the story presented here is relevant wherever low income disenfranchised people are not included in decisions about their health and environment This book examines the tale of Marine Shale Processors the world s

largest hazardous waste company and the women who fought to protect their community and their children The lesson here is that a dedicated group of people fighting for what is right can win and it serves as an example for any community that wants to determine what their own environmental future Playing with Fire is a well documented account that provides lessons for communities government agencies and corporations It dispels the narrative that low income communities must settle for jobs at the expense of clean air and water and politicians and demonstrates that corporations that further trample on the rights of people will ultimately pay the price *The Routledge Handbook of Environmental Justice* Ryan

Holifield, Jayajit Chakraborty, Gordon Walker, 2017-09-14 The Routledge Handbook of Environmental Justice presents an extensive and cutting edge introduction to the diverse rapidly growing body of research on pressing issues of environmental justice and injustice With wide ranging discussion of current debates controversies and questions in the history theory and methods of environmental justice research contributed by over 90 leading social scientists natural scientists humanists and scholars from professional disciplines from six continents it is an essential resource both for newcomers to this research and for experienced scholars and practitioners The chapters of this volume examine the roots of environmental justice activism lay out and assess key theories and approaches and consider the many different substantive issues that have been the subject of activism empirical research and policy development throughout the world The Handbook features critical reviews of quantitative qualitative and mixed methodological approaches and explicitly addresses interdisciplinarity transdisciplinarity and engaged research Instead of adopting a narrow regional focus it tackles substantive issues and presents perspectives from political and cultural systems across the world as well as addressing activism for environmental justice at the global scale Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research policy and practice Providing detailed but accessible overviews of the complex varied dimensions of environmental justice and injustice the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists **Land Abandoned to the**

Sea Stuart Oliver, 2021-04-08 Significant changes are affecting coastlines around the world due to economic pressures and climate change This book addresses the social cultural and political context of the process of managed coastal realignment the strategic abandonment of the coast as a means of coping with these changes With a specific focus on the Blackwater Estuary in Essex Stuart Oliver analyses the cultural and social implications of managed retreat and proposes managed realignment as a practical way in which society can rethink itself addressing the new realities of the environment and a move towards developing a more sustainable relationship with it **Recording in Social Work** Liz O'Rourke, 2010-05-05 The

topic of recording is certainly one for which there exists little current literature and this book makes an original and prominent contribution Suzy Braye University of Sussex **Fall-out from Fukushima** Giulia de Togni, 2021-11-24 This book shows how the Fukushima plaintiffs have challenged narratives of safety and risk containment produced by TEPCO and the

Japanese government through offering new empirical data on risk perceptions and life choices of some nuclear evacuees Considering the Fukushima evacuees disappearance from public discourse in Japan the book engages with theoretical writings on risk neoliberal governmentality and citizen science Chapters draw on a wide range of anthropologically related methodologies including socio linguistics participant observation and qualitative interviews Themes of self governance resistance gender kinship class and social change surface throughout setting the Fukushima experience in a broad historical social and comparative context This is the first ethnographic account of the Fukushima litigation and the first extensive qualitative study documenting the worldviews and living conditions of nuclear evacuees who moved outside Fukushima Prefecture with a particular focus on underrepresented groups single mothers elderly and disabled evacuees The history of industrial disasters and the role of citizens in shaping environmental policy in Japan is also evaluated Fall out from Fukushima sets out to be a manifesto for understanding and supporting post nuclear disaster societies and will appeal to students and scholars of social legal and linguistic anthropology science and technology studies as well as Japanese studies
