Risky Business Private Management Of Public Schools:

Risky Business Craig E. Richards, Rima Shore, 1996 **The Risky Business of Education Policy** Christopher H. Tienken, Carol A. Mullen, 2021-09-09 The Risky Business of Education Policy focuses commentary and analysis on some of the most pressing policy challenges facing public school educators and those invested in a healthy vibrant public school system. The book shares insights and makes recommendations from leading scholar practitioners namely from educational leadership and science education on ways to ponder navigate and challenge serious policy issues. The chapters present important policy topics and critical analysis of the topics from the authorial perspective of experienced educators leading the preparation of future school leaders and teachers. Through fast paced user friendly chapters contributors grapple with an education reform policy issue of the day reflecting what is contentious territory while wading through it. These educational researchers also make evidence informed practical recommendations for educators and policymakers on how to better approach the policy challenges presented so public education can be improved for all children. Each chapter contains stimulating ideas useful information and practical tips for school practitioners higher education faculty and constituent groups. *Mastering the Risky Business of Public-Private Partnerships in Infrastructure* Manal Fouad, 2021-05-10 Investment in infrastructure can be a driving force of the economic recovery in the aftermath of the COVID 19 pandemic in the context of shrinking fiscal space. Public private partnerships PPP bring a promise of efficiency when carefully designed and managed to avoid creating unnecessary fiscal risks. But fiscal illusions prevent an understanding the sources of fiscal risks which arise in all infrastructure projects and that in PPPs present specific characteristics that need to be addressed. PPP contracts are also affected by implicit fiscal risks when they are poorly designed particularly when a government signs a PPP contract for a project with no financial sustainability. This paper reviews the advantages and inconveniences of PPPs discusses the fiscal illusions affecting them identifies a diversity of fiscal risks and presents the essentials of PPP fiscal risk management.

School Choice Policies and Outcomes Walter Feinberg, Christopher Lubienski, 2008-10-16 Perhaps no school reform has generated as much interest and controversy in recent years as the proposal to have parents select their children's schools. Opponents of school choice fear that rolling back the government's role will lead to profit driven financial scandals sectarianism and increased class and racial isolation. School choice advocates believe that state provision oversight and regulation stifle entrepreneurial creativity. The contributors to this volume not only provide a clear assessment of the logic and evidence supporting the different sides of the debate but also unmask the assumptions about the relationship between markets government and educational achievement. Their message is that neither markets nor government alone will guarantee freedom equality achievement or community. If choice is to improve education and advance equality then educational policy cannot be placed on automatic and left to the free market. Rather choice policy must be deliberately directed toward meeting these goals and this book shows how that could be accomplished. *Handbook of Research in*

Education Finance and Policy Helen F. Ladd, Edward B. Fiske, 2012-08-21 Sponsored by the Association for Education Finance and Policy AEFPP this groundbreaking new handbook assembles in one place the existing research based knowledge in education finance and policy thereby helping to define this evolving field of research and practice It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them It shows how the current decision making context in school finance inevitably interacts with those of governance accountability equity privatization and other areas of education policy Because a full understanding of the important contemporary issues requires input from a variety of perspectives the Handbook draws on contributors from a variety of disciplines While many of the chapters cover complex state of the art empirical research the authors explain key concepts in language that non specialists can understand

Key Legal Issues for Schools Charles J. Russo, 2013-01-04 School business officials SBOs must in many respects serve as all things to all people in their workplaces Put another way SBOs must be knowledgeable about a wide range of legal issues ranging from contracts to setting policy to state bidding laws let alone constitutional matters involving the rights of students and teachers Aware of the fact that issues involving the law are at the heart of many of a SBO s duties the chapters in this edited book have been written by a diverse array of individuals with experience as educational leaders in schools and or who possess significant expertise in the School Law In light of the need to keep SBOs up to date on many issues in the ever changing world of Education Law this volume is divided into two parts The first section deals with issues that primarily impact on the management of schools while the second deals with the rights of students and teachers More specifically each of the chapters is designed to examine a specific area about which SBOs need information While no single book can ever hope to cover all of the myriad of legal topics that SBOs and other educational leaders must master in their professional lives this book will serve as an up to date and ready source of information to help keep them abreast of the many changes in the ever evolving area of School Law

No Child Left Behind and other Federal Programs for Urban School Districts Frank Brown, Richard C. Hunter, 2006-07-04 The No Child Left Behind NCLB Act is designed to close the achievement gap between disadvantaged and disadvantaged children through its Title I program This book explores models to achieve equity in Title I schools and defines what is required of states in Title I schools It examines how each state implements NCLB accountability standards

Black Social Capital Marion Orr, 1999 Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore s African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where

social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools Black Social Capital offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change

A Free Market Approach to Federal Contracting United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on Oversight of Government Management, Restructuring, and the District of Columbia, 1998

The End of Welfare? Max B. Sawicky, 2016-07-01 Exploring the consequences of federal devolution on state budgets this work deals with three major areas of concern the effect of moving large numbers of welfare recipients into labour markets the planned federal reforms in the health care field and trends in federal aid

Governing by Contract Phillip J. Cooper, Phillip Cooper, 2002-07-01 Is the public getting a good deal when the government contracts out the delivery of goods and services Phillip Cooper attempts to get at the heart of this question by exploring what happens when public sector organizations at the federal state and local levels form working relationships with other agencies communities non profit organizations and private firms through contracts Rather than focus on the ongoing debate over privatization the book emphasizes the tools managers need to form operate terminate or transform these contracts amidst a complex web of intergovernmental relations Cooper frames the issues of public contract management by showing how managers are caught in between governance by authority and government by contract By looking at cases ranging from the management of Baltimore schools to the contracting of senior citizen programs in Kansas he offers practical information to students and practitioners and a theoretical context for their work At every turn the author avoids bogging readers down in technical jargon Instead the book sheds light on a crucial part of any public manager's job with lively case material and no nonsense guidance for making the most of taxpayer dollars

Resources in Education, 1998

School Reform, Corporate Style Dorothy Shipps, 2006 Like other big city school

systems Chicago's has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipps chronicles how Chicago's corporate actors led abetted or restrained nearly every attempt to transform the city's school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago's reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880-1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipps concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipps makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership The People Shall Rule Robert Fisher, 2009-10-16 With the election of a community organizer as president of the United States the time is right to evaluate the current state of community organizing and the effectiveness of ACORN Association of Community Organizations for Reform Now Since 2002 ACORN has been dramatically expanding and raising its national profile it has also been weathering controversy over its voter registration campaigns and an internal financial scandal The twelve chapters in this volume present the perspectives of insiders like founder Wade Rathke and leading outside practitioners and academics The result is a thorough detailing of ACORN's founding and its changing strategies including vivid accounts and analyses of its campaigns on the living wage voter turnout predatory lending redlining school reform and community redevelopment as well as a critical perspective on ACORN's place in the community organizing landscape *Education Finance in the New Millennium* Stephen Chaikind, William J. Fowler, 2013-09-05 The 2001 Yearbook of the AEFA reaffirms the connections between the field of education finance and the wider education community Among the topics it examines are curricula reform

outcome assessment accountability community control and privatization 2001 **The Color of School Reform** Jeffrey R. Henig, Richard C. Hula, Marion Orr, Desiree S. Pedescleaux, 2001-01-22 Why is it so difficult to design and implement fundamental educational reform in large city schools in spite of broad popular support for change How does the politics of race complicate the challenge of building and sustaining coalitions for improving urban schools These questions have provoked a great deal of theorizing but this is the first book to explore the issues on the basis of extensive solid evidence Here a group of political scientists examines education reform in Atlanta Baltimore Detroit and Washington D C where local governmental authority has passed from white to black leaders The authors show that black administrative control of big city school systems has not translated into broad improvements in the quality of public education within black led cities Race can be crucial however in fostering the broad civic involvement perhaps most needed for school reform In each city examined reform efforts often arise but collapse partly because leaders are unable to craft effective political coalitions that would commit community resources to a concrete policy agenda What undermines the leadership according to the authors is the complex role of race in each city First public authority does not guarantee access to private resources usually still controlled by white economic elites Second local authorities must interact with external actors at the state and national levels who remain predominantly white Finally issues of race divide the African American community itself and often place limits on what leaders can and cannot do Filled with insightful explanations together with recommendations for policy change this book is an important component of the debate now being waged among researchers education activists and the community as a whole **Surmounting All Odds - Vol. 1** Carol Camp Yeakey, Ronald D. Henderson, 2000-09-01 Volume 1 in the two volume set about overcoming the odds in African American Education **Learning on the Job** Steven F. Wilson, 2006 The organizations Business models School designs School culture Execution School leaders Politics and schools Academic results Business results Changing Urban Education Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas

they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future

Homeschooling in America Joseph Murphy, 2014-02-04 This revealing and balanced portrait of homeschooling today provides a full history of the movement demographic insights and extensive research on how homeschooled children fare in the United States Delving into a movement that impacts more students nationwide than the entire charter school movement this book explores The history of homeschooling in America How this movement has grown in credibility and enrollment exponentially The current state of homeschooling including questions about who gets homeschooled why and what is the success academically and in life of students who are homeschooled The impact of homeschooling on the student and on American society In 2010 more than two million students were homeschooled In the most extensive survey and analysis of research on homeschooling spanning the birth of the movement in the 1970s to today Homeschooling in America shines a light on one of the most important yet least understood social movements of the last forty years and explores what it means for education today
