Keith Elliot Greenberg,1997 Profiles the training and career of Major Rex Bailey who tests military airplanes for the United States Air Force at Edwards Air Force Base in California **The P-38 Lightning and the Men Who Flew It** Wolfgang W. E. Samuel,2025-04-15 The P 38 Lightning was one of the fastest operational fighters of World War II famous for its successes in North Africa and the Pacific In **The P 38 Lightning and the Men Who Flew It** Wolfgang W E Samuel shares the stories of the young men who climbed into the cockpits of the P 38 to fight for freedom and of those who created tested and deployed these fearsome machines The P 38 was the product of the Lockheed Corporation the first fighter they ever built principally conceptualized by Kelly Johnson whose design was to meet Air Corps specifications To do that he came up with a twin engine aircraft with a tricycle landing gear unlike any other military aircraft of the time But it was no easy plane to fly Many pilots died in training and routine flying before ever meeting an opponent in combat P 38 units were formed quickly once the United States entered World War II in December 1941 Training was rushed to get pilots and planes to Europe as quickly as possible to serve as bomber escorts Although the P 38 could fly at the high altitudes the bombers flew it was not the right aircraft for the mission Without an engine in front of the cockpit to keep the pilot warm the plane was frigid Pilots suffered and were sometimes so weakened by the brutal cold that they had to be lifted out of the cockpit upon landing and the bombers suffered severe losses In North Africa s warmer air however the P 38 came into its own With four 50 caliber machine guns and a 20mm cannon in its nose the P 38 was a formidable adversary With proven success in the Mediterranean P 38 squadrons were transferred to the Pacific Theater where they flourished Focusing on the men who flew this challenging aircraft and the men who designed and decided how to deploy it Samuel shares stories of bravery and ingenuity alongside an aviation history long neglected The P 38 s deployment is covered in some detail including the actions of Richard Bong who became the US forces ace of aces In the Pacific skies the P 38 its pilots and designers made the heroic history captured here

G-Force: Flying the World's Greatest Aircraft James Bennet, 2016-10 Read what military pilots have to say about flying some of the most incredible fighting aircraft ever built It's like a 20 million strap on carnival ride AH 64 Apache Pilot I had high expectations and it's beat every one of those The whole jet is awesome F A 18F Super Hornet pilot The role of the pilot has changed hugely in the last sixty years of military aviation Jet pilots in the 1960s flying types such as the Harrier and F 102 would have spent a huge portion of their concentration just keeping the aircraft under control That left little spare mental capacity to locate and engage the enemy Today the opposite is true Computers have made flying so simple that it is now considered very easy to fly the SAAB Gripen or Lockheed Martin F 35 Lightning II allowing the pilot to focus fully on his or her mission G Force Flying the World's Greatest Aircraft is a celebration of the experience of flying some of aviation's most spectacular powerful and dangerous machines from early jet fighters such as the F 86 Sabre and MiG 15 to today's F 22 Raptor and Eurofighter Typhoon Packed with first hand interviews with test and combat pilots from the world's air forces and

Contrails over the Mojave George Marrett, 2014-07-15 In *Contrails over the Mojave* George Marrett takes off where Tom Wolfe's *The Right Stuff* ended in 1963. Marrett started the Air Force Test Pilot School at Edwards AFB only two weeks after the school's commander Col Chuck Yeager ejected from a Lockheed NF 104 trying to set a world altitude record. He describes life as a space cadet experiencing 15 Gs in a human centrifuge, zero G maneuvers in a KC 135 Vomit Comet and a flight to 80 000 feet in the F 104A Starfighter. After graduating from Yeager's Charm School, he was assigned to the Fighter Branch of Flight Test Operations where he flew the latest fighter aircraft and chased other test aircraft as they set world speed and altitude records. Marrett takes readers into the cockpit as he goes vertical in a T 38 Talon, completes high G maneuvers in an F 4C Phantom and conducts wet runway landing tests in the accident prone F 111A Aardvark. He writes about Col Silver Fox Stephens setting a world speed record in the YF 12 Blackbird and Bob Gilliland testing speed stalls in the SR 71 spy plane, but he also relives stories of crashes that killed test pilot friends. He recounts dead sticking a T 38 to a landing on Rogers Dry Lake after a twin engine failure and conducting dangerous tail hook barrier testing in a fighter jet without a canopy. A mysterious UFO sighting in the night sky above the Mojave Desert, known as The Edwards Encounter, also receives Marrett's attention. Whether the author is assessing a new aircraft's performance or describing the experiences of test pilots as they routinely faced the possibility of death, this look at the golden age of flight testing both thrills and informs.

Selecting the Mercury Seven Colin Burgess, 2011-08-17 The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism. This work provides biographical details of all thirty-two finalists for the seven coveted places as America's pioneering astronauts. All of the candidates were among the nation's elite pilots involved in testing new supersonic aircraft capabilities. Most had served as wartime fighter and bomber pilots, some were test pilots on top secret and sophisticated aviation projects, while others were fleet admirals, prisoners of war and proposed pilots for spaceflight programs such as the Dyna Soar X 20. The names of all 32 finalists have been kept secret until very recently. *Selecting the Mercury Seven* also relates the history and difficulties behind the initial choice of candidates. The lives, motivations, military careers and achievements of the unsuccessful twenty-five finalists are explored first in fully authorized biographies. Test pilots for the U S Navy, Air Force and Marine Corps, each man has a fascinating and very different story to tell. All thirty-two men had to endure meticulous, demeaning and brutal week-long medical examinations at the Lovelace Clinic in New Mexico. This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio where they were subjected to extreme fitness and physiological testing, the sole purpose of which was to sort out the Supermen from the near supermen. The final part of the book examines the accomplishments and

spaceflights of the seven successful candidates bringing their amazing stories right up to date *Falling to Earth* Al Worden, Francis French, 2012-07-24 As command module pilot for the Apollo 15 mission to the moon in 1971 Al Worden flew on what is widely regarded as the greatest exploration mission that humans have ever attempted He spent six days orbiting the moon including three days completely alone the most isolated human in existence During the return from the moon to earth he also conducted the first spacewalk in deep space becoming the first human ever to see both the entire earth and moon simply by turning his head The Apollo 15 flight capped an already impressive career as an astronaut including important work on the pioneering Apollo 9 and Apollo 12 missions as well as the perilous flight of Apollo 13 Nine months after his return from the moon Worden received a phone call telling him he was fired and ordering him out of his office by the end of the week He refused to leave What happened in those nine months from being honored with parades and meetings with world leaders to being unceremoniously fired has been a source of much speculation for four decades Worden has never before told the full story around the dramatic events that shook NASA and ended his spaceflight career Readers will learn them here for the first time along with the exhilarating account of what it is like to journey to the moon and back It's an unprecedentedly candid account of what it was like to be an Apollo astronaut with all its glory but also its pitfalls

E. Samuel assembles from official Air Force records and survivors interviews the largely untold stories of the disarmament of the once mighty Luftwaffe and of Operation Lusty the hunt for Nazi technologies In April 1945 American armies were on the brink of winning their greatest military victory yet America's technological backwardness was shocking when measured against that of the retreating enemy Senior officers including the Commanding General of the Army Air Forces Henry Harley Hap Arnold knew all too well the seemingly overwhelming victory was less than it appeared There was just too much luck involved in its outcome Two intrepid American Army Air Forces colonels set out to regain America's technological edge One Harold E. Watson went after the German jets the other Donald L. Putt went after the Nazis' intellectual capital their world class scientists With the help of German and American pilots Watson brought the jets to America Putt persevered as well and succeeded in bringing the
