Course offers a field guide to the state of the art in teaching and learning and is packed with insights to help students learn in any discipline Wary of the folk wisdom of the faculty lounge David Gooblar builds his lessons on the newest findings and years of experience From active learning strategies to ways of designing courses to get students talking The Missing Course walks you through the fundamentals of the student centered classroom one in which the measure of success is not how well you lecture but how much your students actually learn Warm and empirically based comprehensive but accessible student centered and also scientific We re so lucky to have Gooblar as a guide Sarah Rose Cavanagh author of The Spark of Learning Goes beyond critique offering a series of activities approaches and strategies that instructors can implement His wise and necessary book is a long defense of the idea that a university can be a site of the transformation of self and society Los Angeles Review of Books An invaluable source of insight and wisdom on what it means to work with students We ve needed this book for a long time John Warner author of Why They Can t Write [Expanding Resources for College Teaching](#) American Council on Education. Committee on College Teaching,1956 *Teaching Strategies for the College Classroom* JAMES. DAVIS,2020-06-30 Another book on college teaching you may ask Surely too many have been written already Dr Davis hopes that professors will find this to be a different book on college teaching because it explores in depth some viable teaching strategies for the college classroom This book has grown out of a course on college teaching offered regularly at the University of Denver *The Amateur Hour* Jonathan Zimmerman,2020-10-27 The first full length history of college teaching in the United States from the nineteenth century to the present this book sheds new light on the ongoing tension between the modern scholarly ideal scientific objective and dispassionate and the inevitably subjective nature of day to day instruction American college teaching is in crisis or so we are told But we ve heard that complaint for the past 150 years as critics have denounced the poor quality of instruction in undergraduate classrooms Students daydream in gigantic lecture halls while a professor drones on or they meet with a teaching assistant for an hour of aimless discussion The modern university does not reward teaching so faculty members at every level neglect it in favor of research and publication In the first book length history of American college teaching Jonathan Zimmerman confirms but also contradicts these perennial complaints Drawing upon a wide range of previously unexamined sources The Amateur Hour shows how generations of undergraduates indicted the weak instruction they received But Zimmerman also chronicles institutional efforts to improve it especially by making teaching more personal As higher education grew into a gigantic industry he writes American colleges and universities introduced small group activities and other reforms designed to counter the anonymity of mass instruction They also experimented with new technologies like television and computers which promised to personalize teaching by tailoring it to the individual interests and abilities of each student But Zimmerman reveals the emphasis on the personal inhibited the professionalization of college teaching which remains ultimately an amateur enterprise The more that Americans treated teaching as a highly personal endeavor dependent on the idiosyncrasies of the instructor the less they could develop shared

standards for it Nor have they rigorously documented college instruction a highly public activity which has taken place mostly in private Pushing open the classroom door The Amateur Hour illuminates American college teaching and frames a fresh case for restoring intimate learning communities especially for America s least privileged students Anyone who wants to change college teaching will have to start here      **Effective College Teaching** William H. Morris, 1970 This book is a collection of papers by college professors representing the humanities physics biology mathematics the social sciences psychology education and administration These reveal a great deal about college and teaching methods while only indirectly addressing the question of relevance In total these essays to illustrate why colleges might need to examine their organization curricula and value propositions
