Clarke, Mark Doffman, 2017-11-15 Creative practice in music particularly in traditional concert culture is commonly understood in terms of a rather stark division of labour between composer and performer But this overlooks the distributed and interactive nature of the creative processes on which so much contemporary music depends The incorporation of two features improvisation and collaboration into much contemporary music suggests that the received view of the relationship between composition and performance requires reassessment Improvisation and collaborative working practices blur the composition performance divide and in doing so provide important new perspectives on the forms of distributed creativity that play a central part in much contemporary music Distributed Creativity Collaboration and Improvisation in Contemporary Music explores the different ways in which collaboration and improvisation enable and constrain creative processes Thirteen chapters and twelve shorter Interventions offer a range of perspectives on distributed creativity in music on composer performer collaborations and on contemporary improvisation practices The chapters provide substantial discussions of a variety of conceptual frameworks and particular projects while the Interventions present more informal contributions from a variety of practitioners performers composers improvisers giving insights into the pleasures and perils of working creatively in collaborative and improvised ways **Latin Jazz** Christopher Washburne, 2020 Jazz has always been a genre built on the blending of disparate musical cultures Latin jazz illustrates this perhaps better than any other style in this rich tradition yet its cultural heritage has been all but erased from narratives of jazz history Told from the perspective of a long time jazz insider *Latin Jazz The Other Jazz* corrects the record providing a historical account that embraces the genre's international nature and explores the dynamic interplay of economics race ethnicity and nationalism that shaped it *The New York Schools of Music and the Visual Arts* Steven Johnson, 2012-11-12 Musicians and artists have always shared mutual interests and exchanged theories of art and creativity This exchange climaxed just after World War II when a group of New York based musicians including John Cage Morton Feldman Earle Brown and David Tudor formed friendships with a group of painters The latter group now known collectively as either the New York School or the Abstract Expressionists included Jackson Pollock Willem deKooning Robert Motherwell Mark Rothko Barnett Newman Clyfford Still Franz Kline Phillip Guston and William Baziotes The group also included a younger generation of artists particularly Robert Rauschenberg and Jasper Johns that stood somewhat apart from the Abstract Expressionists This group of painters created what is arguably the first significant American movement in the visual arts Inspired by the artists the New York School

composers accomplished a similar feat By the beginning of the 1960s the New York Schools of art and music had assumed a position of leadership in the world of art For anyone interested in the development of 20th century art music and culture The New York Schools of Music and Art will make for illuminating reading

Hating Jazz Andrew S. Berish, 2025-03-12 A deep dive into the meaning behind the hatred of jazz A rock guitarist plays four notes in front of one thousand people while a jazz guitarist plays one thousand notes in front of four people You might laugh or groan at this jazz joke but what is it about jazz that makes people want to disparage it in the first place Andrew S Berish's Hating Jazz listens to the voices who have denounced disparaged and mocked the music By focusing on the rejection of the music Berish says we see more holistically jazz's complicated place in American cultural life Jazz is a display of Black creativity and genius an art form that is deeply embedded in African American life Though the explicit racial tenor of jazz jokes has become muted over time making fun of jazz either in a lighthearted or aggressive way is also an engagement with the place of

Blackness in America An individual's taste in music may seem personal but Berish's analysis of jazz hatred demonstrates that musical preferences and trends are a social phenomenon Criticism of jazz has become inextricable from the ways we understand race in America past and present In addition to this form of criticism Berish also considers jazz hate as a form of taste discrimination and as a conflict over genre boundaries within different jazz cultures Both enlightening and original Hating Jazz shows that our response to music can be a social act unique to our historical moment and cultural context we react to music in certain ways because of who we are where we are and when we are

Audio Culture, Revised Edition
Christoph Cox, Daniel Warner, 2017-07-27 The groundbreaking Audio Culture Readings in Modern Music Continuum
September 2004 paperback original maps the aural and discursive terrain of vanguard music today Rather than offering a history of contemporary music Audio Culture traces the genealogy of current musical practices and theoretical concerns drawing lines of connection between recent musical production and earlier moments of sonic experimentation It aims to foreground the various rewirings of musical composition and performance that have taken place in the past few decades and to provide a critical and theoretical language for this new audio culture This new and expanded edition of the Audio Culture contains twenty five additional essays including four newly commissioned pieces Taken as a whole the book explores the interconnections among such forms as minimalism indeterminacy musique concrète free improvisation experimental music avant rock dub reggae ambient music hip hop and techno via writings by philosophers cultural theorists and composers Instead of focusing on some crossover between high art and popular culture Audio Culture takes all these musics as experimental practices on par with and linked to one another While cultural studies has tended to look at music primarily popular music from a sociological perspective the concern here is philosophical musical and historical Audio Culture includes writing by some of the most important musical thinkers of the past half century among them John Cage Brian Eno Ornette Coleman Pauline Oliveros Maryanne Amacher Glenn Gould Umberto Eco Jacques Attali Simon Reynolds Eliane Radigue David Toop John Zorn Karlheinz Stockhausen and many others Each essay has its own short introduction helping the reader to place the essay within musical historical and conceptual contexts and the volume concludes with a glossary a timeline and an extensive discography
