Crop Production Science in Horticulture** Harvey K Hall,Richard C Funt,2017-10-31 This practical book provides a comprehensive and accessible overview of all aspects of the commercial production of blackberries and their hybrids covering plant growth and development cultivar description and selection propagation pruning soil and water management postharvest management economics and marketing and pest identification and management Cultivated blackberries are a relatively new crop but with new cultivars and cultural practices they are now grown and available worldwide Production regions have expanded internationally due to innovative methods showing much promise and evidence of human health benefits Plant Evolution under Domestication Gideon Ladizinsky,2012-12-06 This book emerged from a series of lectures on crop evolution at the Faculty of Agriculture of The Hebrew University of Jerusalem While many textbooks are available on general evolution only a few deal with evolution under domestication This book is a modest attempt to bridge this gap It was written for advanced undergraduate and graduate students in the fields of crop evolution ethnobotany plant breeding and related subjects Evolution under domestication is unique in the general field of plant evolution for three main reasons a it is recent having started not much more than 10 000 years ago with the emergence of agri culture b the original plant material i e the wild progenitors of many important crop plants still grow in their natural habitats c man played in this process These factors enable a more reliable a major role assessment of the impact of different evolutionary forces such as hybridization migration selection and drift under new circumstances Interestingly a great part of evolution under domestication has been unconscious and a result of agricultural practices which have created a new selection criteria mostly against characters favored by natural selec tion Introducing crop plants to new territories exposed them to different ecological conditions enhancing selection for new characters Diversity in characters associated with crop plants evolution is virtually absent in theit wild progenitors and most of it has evolved under domestication **Forest Trees** National Research Council,Board on Agriculture,Committee on Managing Global Genetic Resources: Agricultural Imperatives,1991-02-01 News reports concerning decline of the world s forests are becoming sadly familiar Most losses are measured in square kilometers but a more profound loss cannot be measured As forests disappear so do their genetic resources The genes they possess can no longer aid in their adaptation to a changing environment nor can they be used to develop improved varieties or products This

book assesses the status of the world's tree genetic resources and management efforts. Strategies for meeting future needs and alternatives to harvesting natural forests are presented. The book also outlines methods and technologies for management, evaluates activities now under way, and makes specific recommendations for a global strategy for forest management. **Horticultural Reviews, Volume 45** Ian Warrington, 2018-03-27 Horticultural Reviews presents state of the art reviews on topics in horticultural science and technology covering both basic and applied research. Topics covered include the horticulture of fruits, vegetables, nut crops, and ornamentals.
