Lee Ramsey, 2012-03-15 In Care full Preaching G Lee Ramsey Jr offers a new vision for how sermons can energize all members of a congregation to care for one another Using fresh images and sermons from Fred Craddock James Forbes Gina Stewart Barbara Brown Taylor and himself Ramsey demonstrates in practical ways how sermons can create a caring community *Preaching the Crusades to the Eastern Mediterranean* Constantinos Georgiou, 2018-03-05 Preaching was an integral part of the crusade movement This book focuses on the efforts of the first four Avignon popes to organize crusade preaching campaigns to the Eastern Mediterranean and on the role of the secular and regular clergy in their implementation Historians have treated the fall of Acre in 1291 as an arbitrary boundary in crusader studies for far too long The period 1305 1352 was particularly significant for crusade preaching yet it has not been studied in detail This volume thus constitutes an important addition to the flourishing field of late medieval crusade historiography The core of the book deals with two interlocking themes the liturgy for the Holy Land and the popular response to crusade preaching between the papacies of Clement V and Clement VI The book analyses the evolving use of the liturgy for the crusade in combination with preaching and it illustrates the catalytic role of these measures in driving popular pro crusade sentiments A key theme in the account is the analysis of the surviving crusade sermons of the Parisian theologians from the era Critical editions of these previously neglected propagandistic texts are a valuable addition to our corpus of papal correspondence relating to the crusades in the later Middle Ages This book will be of interest both to specialized historians and to students of late medieval crusading *Crusade Propaganda and Ideology* Christoph T. Maier, 2000-02-24 This book first published in 2000 presents an edition of seventeen ad status model sermons for the preaching of the crusades from the thirteenth and early fourteenth centuries The majority of these texts had never been printed before publication of this book They are unique sources for the content of crusade propaganda in the later Middle Ages giving a rare insight into the way in which propaganda shaped the public s view of crusading during that period Accompanying the Latin texts is an English translation which is aimed at making these sources accessible to a wider circle of

students and scholars The first part of the book consists of a study of these model sermons which focuses on their place in the pastoral reform movement of the thirteenth century their specific character as models for the use of crusade propagandists their internal structure and the image of the crusade conveyed in the texts *John of Wales* Jenny Swanson, 2002-06-20 This book examines the selected writings of John of Wales a thirteenth century Franciscan scholar Though overshadowed historically by men like Thomas Aquinas and Bonaventure John contributed significantly to the preaching explosion of the later Middle Ages devoting his scholastic energies to the production of encyclopedic preaching aids for the growing number of the devout and learned emerging from the new universities Through a detailed analysis of his world view the author establishes John's strong interest in politics and contemporary social issues and helps to explain why his writings appealed to young preachers and the popular imagination John's historic popularity and literary influence are also fully explored His works seem to have been an important source of classical material for European literary texts of the period and therefore in addition to historians and theologians this unprecedented book will appeal to those interested in the survival and transmission of Greek and Latin literature *The Preaching of the Third Crusade (1187-1192)* Alexander Marx, 2024-12-23 This book delivers the first substantial study of the preaching of the Third Crusade 1187-92 It assembles c 200 sermon texts and c 100 manuscripts to understand the explosive dynamic of mobilization in the Latin West Dealing with the essential fact that a genre called crusade sermon did not exist it develops methodological devices for identifying sermons relevant for the crusading purpose The book contests thus the modern historiography which has placed too much trust in the few chronicle reports However its fruitful blending of crusading preaching exegesis manuscript studies and intellectual history has much to offer beyond crusade studies **A History of Preaching** Otis Carl Edwards, 2004 Accompanying CD ROM contains the full text of volume one and two Volume two contains primary source material on preaching drawn from the entire scope of the church's twenty centuries Each chapter in volume two is geared to its companion chapter in volume one's narrative history *The New Interpreter's® Handbook of Preaching*, 2010-11-01 The New Interpreter's Handbook of Preaching is a major reference tool for preaching with articles on every facet of Christian sermon preparation and delivery This resource is both scholarly and practical It focuses on the most distinctive feature and greatest strength of homiletics as a discipline It is rooted in interdisciplinary scholarship and it develops theory geared to practice Its theory arises out of the study of both excellent preaching past and present and actual sermon preparation and composition When theory and practice critique each other it is possible to produce guidelines that assist greater excellence and economy in preaching the gospel Excellence in standards is an area in which homiletics needs to grow and this project will be both a means to encourage and develop it A guiding question throughout will be Will it preach The answers will be offered in the sense that here is something that works well rather than here is something to try Preachers will turn to this resource with the expectation that they will find scholarly treatment of topics brief bibliographies of relevant key books and articles along with practical

methodological suggestions for preachers to employ The contributors are homileticians preachers and writers in various disciplines who are committed to the pulpit through practice *Preacher, Sermon and Audience in the Middle Ages*, 2018-11-12 *Preacher Sermon and Audience in the Middle Ages* presents research by specialists of preaching history and literature This volume fills some of the lacunae which exists in medieval sermon studies The topics include an analysis of how oral and written cultures meet in sermon literature the function of vernacular sermons an examination of the usefulness of non sermon sources such as art in the study of preaching history sermon genres the significance of heretical preaching audience composition and its influence on sermon content and the use of rhetoric in sermon construction The study looks at preaching history and literature from a wide geographical and chronological area which includes examples from Anglo Saxon England to late medieval Italy While doing so it outlines the state of sermon studies research and points to new areas of investigation [A History of Preaching Volume 1](#) Rev.
