Black Ranching Frontiers Andrew Sluyter, 2012-11-27 In this volume Andrew Sluyter demonstrates that Africans played significant creative roles in establishing open range cattle ranching in the Americas In so doing he provides a new way of looking at and studying the history of land labour property and commerce in the Atlantic world French Colonial Louisiana and the Atlantic World Bradley G. Bond, 2005-07-01 French colonial Louisiana has failed to occupy a place in the historic consciousness of the United States perhaps owing to its short duration 1699 1762 and its standing outside the dominant narrative of the British colonies in North America This anthology seeks to locate early Louisiana in its proper place bringing together a broad range of scholarship that depicts a complex and vibrant sphere Colonial Louisiana comprised the vast center of what would become the United States It lay between Spanish British and French colonies in North America and the Caribbean and between woodland and eastern plains Indians As such it provided a meeting place for Europeans Africans and native Americans functioning as a crossroads between the New World and other worlds While acknowledging colonial Louisiana s peripheral position in U S and Atlantic World history this volume demonstrates that the colony stands at the thematic center of the shared narratives and historiographies of diverse places Through its twelve essays French Colonial Louisiana and the Atlantic World tells a whole story the story of a place that belongs to the historic narrative of the Atlantic World *Across the Continent* Jeffrey L. Hantman, Douglas Seefeldt, Peter S. Onuf, 2006 Arriving as the country commemorates the expedition s bicentennial *Across the Continent* is an examination of the explorers world and the complicated ways in which it relates to our own The essays collected here look at the global geopolitics that provided the context for the expedition Finally the discussion considers the various legacies of the expedition in particular its impact on Native Americans and the current struggle over who will control the narrative of the expansion of the American Empire from publisher description *Came Men on Horses* Stan Hoig, 2012-10-15 Hoig tells this story with a sharp eye for human details sometimes gruesome but nonetheless compelling details that bring Coronado O ate and other Spanish soldiers and priests alive in ways that I have never read After examining Hoig s account I will never see the Spanish entrada or conquest in the same way Parts of this manuscript left me stunned Durwood Ball University of New Mexico Guided by myths of golden cities and worldly rewards policy makers conquistador leaders and expeditionary aspirants alike came to the new world in the sixteenth century and left it a changed land *Came Men on Horses* follows two conquistadors Francisco V squez de Coronado and Don Juan de O ate on their journey across the southwest Driven by their search for gold and silver both Coronado and O ate committed atrocious acts of violence against the Native Americans and fell out of favor with the Spanish monarchy Examining the legacy of these two conquistadors Hoig attempts to balance their brutal acts and selfish motivations with the historical significance and personal sacrifice of their expeditions Rich human details and superb story telling make *Came Men on Horses* a captivating narrative scholars and general readers alike will appreciate Spain in the Southwest John L.

Kessell,2013-02-27 John L Kessell s *Spain in the Southwest* presents a fast paced abundantly illustrated history of the Spanish colonies that became the states of New Mexico Arizona Texas and California With an eye for human interest Kessell tells the story of New Spain s vast frontier today s American Southwest and Mexican North which for two centuries served as a dynamic yet disjointed periphery of the Spanish empire Chronicling the period of Hispanic activity from the time of Columbus to Mexico s independence from Spain in 1821 Kessell traces the three great swells of Hispanic exploration encounter and influence that rolled north from Mexico across the coasts and high deserts of the western borderlands Throughout this sprawling historical landscape Kessell treats grand themes through the lives of individuals He explains the frequent cultural clashes and accommodations in remarkably balanced terms Stereotypes the author writes are of no help Indians could be arrogant and brutal Spaniards caring and vice versa If we select the facts to fit preconceived notions we can make the story come out the way we want but if the peoples of the colonial Southwest are seen as they really were more alike than diverse sharing similar inconstant natures then we need have no favorites

Quivira William Brandon,1990 New Mexico was a frontier to the wilderness for Europeans for almost three hundred years No other frontier history in the area of what is now the United States can support such continuity or even come close It was the outside edge of the northern borderlands of New Spain that later became the northern borderlands of Mexico It was the western rim of the world for the French explorers and fur traders in the Mississippi valley and for the English who followed them there It was lastly the frontier for the newly minted Americans who came with the opening of the nineteenth century to Missouri the sill of the great plains across which lay fabled Santa Fe for Santa Fe New Mexico s capital was in effect another name for the entire province The route between the Missouri River and New Mexico that eventually became known as the Santa Fe Trail was a road not for would be settlers but for exploration trade adventure and as such it was more an extension of the frontier itself than a road leading to a frontier And it remained so throughout a very long sweep of time from before from long before the founding of Santa Fe or the earliest Spanish exploration in the Southwest Quivira provides a closely written synthesis of Spanish exploration eastward from New Mexico and French exploration westward from Louisiana and the Illinois in the sixteenth seventeenth and eighteenth centuries Archaeological and ethnological evidence is presented to show that the country between these regions had been a frontier between east and west from time immemorial William Brandon ably demonstrates that European efforts to penetrate this ancient frontier were predominately motivated by illusion misconceptions or outright fictions dealing with supposed riches someplace ahead Brandon explores the question of whether the pursuit of illusion is a distinctive activity of all people or only of certain societies who possess an overwhelming interest in gain profit and money Brandon concludes by asking whether or not a world established by Europe in America continues this bent for self delusion

River Basin Trajectories François Molle,Philippus Wester,2009 This book contains 11 papers which cover a range of vital topics in the areas of water agriculture food security and ecosystems the entire spectrum of developing and managing water

in agriculture from fully irrigated to fully rainfed lands They are about people and society why they decide to adopt certain practices and not others and in particular how water management can help poor people They are about ecosystems how agriculture affects ecosystems the goods and services ecosystems provide for food security and how water can be managed to meet both food and environmental security objectives This is the eighth book in the series **Civilizations** Felipe Fernandez-Armesto, 2001-09-14 In *Civilizations* Felipe Fernandez Armesto once again proves himself a brilliantly original historian capable of large minded and comprehensive works here he redefines the subject that has fascinated historians from Thucydides to Gibbon to Spengler to Fernand Braudel the nature of civilization To Fernandez Armesto a civilization is civilized in direct proportion to its distance its difference from the unmodified natural environment by its taming and warping of climate geography and ecology The same impersonal forces that put an ocean between Africa and India a river delta in Mesopotamia or a 2 000 mile long mountain range in South America have created the mold from which humanity has fashioned its own wildly differing cultures In a grand tradition that is certain to evoke comparisons to the great historical taxonomies each chapter of *Civilizations* connects the world of the ecologist and geographer to a panorama of cultural history In *Civilizations* the medieval poem Sir Gawain and the Green Knight is not merely a Christian allegory but a testament to the thousand year long deforestation of the trees that once covered 90 percent of the European mainland The Indian Ocean has served as the world's greatest trading highway for millennia not merely because of cultural imperatives but because the regular monsoon winds blow one way in the summer and the other in the winter In the words of the author Unlike previous attempts to write the comparative history of civilizations it is arranged environment by environment rather than period by period or society by society Thus seventeen distinct habitats serve as jumping off points for a series of brilliant set piece comparisons thus tundra civilizations from Ice Age Europe are linked with the Inuit of the Pacific Northwest and the Mississippi mound builders and the deforesters of eleventh century Europe are both understood as civilizations built on woodlands Here of course are the familiar riverine civilizations of Mesopotamia and China of the Indus and the Nile but also highland civilizations from the Inca to New Guinea island cultures from Minoan Crete to Polynesia to Renaissance Venice maritime civilizations of the Indian Ocean and South China Sea even the Bushmen of Southern Africa are seen through a lens provided by the desert civilizations of Chaco Canyon More here are fascinating stories brilliantly told of the voyages of Chinese admiral Chen Ho and Portuguese commodore Vasco da Gama of the Great Khan and the Great Zimbabwe Here are Hesiod's tract on maritime trade in the early Aegean and the most up to date genetics of seed crops Erudite wide ranging a work of dazzling scholarship written with extraordinary flair *Civilizations* is a remarkable achievement a tour de force by a brilliant scholar *El Llano Estacado* John Miller Morris, 1997 Using historical writings of early explorers the author captures the mystery and magic of the great Llano Estacado or Staked Plains that begin in West Texas and extend north and west Particularly amusing is the effort of early railroad surveyors to find underground water at the edge of the Llano aka the

caprock only to miss one of North America's largest aquifers the Ogalla by a matter of miles and in some cases yards
