Market as Place and Space of Economic Exchange Hans Peter Hahn, Geraldine Schmitz, 2018-04-30 In the context of commodification material culture has particular properties hitherto considered irrelevant or neglected First the market is a spatial structure assigning special properties to the things offered the goods and commodities Secondly the market defines a principle of dealing with things including them in some contexts excluding them from others The contributions to Market as Place and Space address a variety of aspects of markets within the framework of archaeological and anthropological case studies and with a special focus on the indicators of practices attached to the commodities and their valuation

Anthropology and Consultancy Pamela Stewart, Andrew J. Strathern, 2004-08-01 More and more anthropologists are recruited as consultants by government departments companies or as observers of development processes in their field areas generally Although these roles can be very gratifying they can create ambiguous situations for the anthropologists who find that new pressures and responsibilities are placed upon them for which their training did not prepare them This volume explores some of the problems opportunities issues debates and dilemmas surrounding these roles The geographic focus of the studies is Papua New Guinea but the topic and its importance apply widely through the world for example Africa South America Australia and the Pacific in general as well as in relation to indigenous groups in Canada and elsewhere All the authors have first hand experience and they address these new pressures and responsibilities of anthropological research The book s chapters are written in a way that combines scholarship with a style accessible to general readers

Anthropology and Consultancy Pamela J. Stewart, Andrew Strathern, 2005 The papers collected for this book are a special issue of Social Analysis New Guinea Clive Moore, 2003-07-31 New Guinea the world s largest tropical island is a land of great contrasts ranging from small glaciers on its highest peaks to broad mangrove swamps in its lowlands and hundreds of smaller islands and coral atolls along its coasts Divided between two nations the island and its neighboring archipelagos form Indonesia s Papua Province or Irian Jaya and the independent nation of Papua New Guinea both former European colonies Most books on New Guinea have been guided by these and other divisions separating east from west prehistoric from historic precontact from postcontact colonial from postcolonial This is the first work to consider New Guinea and its 40 000 year history in its entirety The volume opens with a look at the Melanesian region and argues that interlocking exchange systems and associated human interchanges are the invisible government through which New Guinea societies operate Succeeding chapters review the history of encounters between outsiders and New Guinea s populations They consider the history of Malay involvement with New Guinea over the past two thousand years demonstrating the extent to which west New Guinea in particular was incorporated into Malay trading and raiding networks prior to Western contact The impact of colonial rule economic and social change World War II decolonization and independence are discussed in the final chapter **Return to**

Volcano Town R. Wally Johnson, Neville A. Threlfall, 2023-10-24 Wally Johnson and Neville Threlfall re examine the explosive

volcanic eruptions that in 1937 43 killed more than 500 people in the Rabaul area of East New Britain Papua New Guinea They reassess this disaster in light of the prodigious amount of new scientific and disaster management work that has been undertaken there since about 1971 when strong tectonic earthquakes shook the area Comparisons are made in particular with volcanic eruptions in 1994 2014 when half of Rabaul town was destroyed and then abandoned A striking feature of historical eruptive periods at Rabaul is the near simultaneous activity at Vulcan and Tavurvur volcanoes on either side of Rabaul Harbour Such rare twin eruptions are interpreted to be the result of a common magma reservoir beneath the harbour This interpretation has implications for ongoing hazard and risk assessments and for volcano monitoring in the area

Resurrecting Pompeii Estelle Lazer, 2009-09-10 *Resurrecting Pompeii* provides an in depth study of a unique site from antiquity with information about a population who all died from the same known cause within a short period of time Pompeii has been continuously excavated and studied since 1748 Early scholars working in Pompeii and other sites associated with the AD 79 eruption of Mount Vesuvius were seduced by the wealth of artefacts and wall paintings yielded by the site This meant that the less visually attractive evidence such as human skeletal remains were largely ignored Recognizing the important contribution of the human skeletal evidence to the archaeology of Pompeii *Resurrecting Pompeii* remedies that misdemeanour and provides students of archaeology and history with an essential resource in the study of this fascinating historical event

Fire Mountains of the Islands R. Wally Johnson, 2013-12-18 Volcanic eruptions have killed thousands of people and damaged homes villages infrastructure subsistence gardens and hunting and fishing grounds in Papua New Guinea and the Solomon Islands The central business district of a town was destroyed by a volcanic eruption in the case of Rabaul in 1994 Volcanic disasters litter not only the recent written history of both countries particularly Papua New Guinea but are recorded in traditional stories as well Furthermore evidence for disastrous volcanic eruptions many times greater than any witnessed in historical times is to be found in the geological record Volcanic risk is greater today than at any time previously because of larger mainly sedentary populations on or near volcanoes in both countries An attempt is made in this book to review what is known about past volcanic eruptions and disasters with a view to determining how best volcanic risk can be reduced today in this tectonically complex and volcanically threatening region

The Death of the Big Men and the Rise of the Big Shots Keir Martin, 2013-03-01 In 1994 the Pacific island village of Matupit was partially destroyed by a volcanic eruption This study focuses on the subsequent reconstruction and contests over the morality of exchanges that are generative of new forms of social stratification Such new dynamics of stratification are central to contemporary processes of globalization in the Pacific and more widely Through detailed ethnography of the transactions that a displaced people entered into in seeking to rebuild their lives this book analyses how people re make sociality in an era of post colonial neoliberalism without taking either the transformative power of globalization or the resilience of indigenous culture as its starting point It also contributes to the understanding of the problems of post disaster reconstruction and development

projects Pacific Places, Pacific Histories Brij V. Allison, 2004-12-31 Studies of Pompeian material culture have traditionally been dominated by art historical approaches but recently there has been a renewed and burgeoning interest in Pompeian houses for studies of Roman domestic behavior This book is concerned with contextualized Pompeian household artifacts and their role in deepening our understanding of household behavior at Pompeii It consists of a study of the contents of thirty so called atrium houses in Pompeii to investigate the spatial distribution of household activities

both within each architectural room type and across the house It also uses this material to investigate the state of occupancy of these houses at the time of the eruption of Mt Vesuvius in AD 79 It thus examines artifact assemblages within their spatial and decorative contexts for a more material cultural approach to these remains and for the information which they provide on living conditions in Pompeii during the last decades In this it takes a critical perspective the textual nomenclature which is traditionally applied to Pompeian room types
