Race Concept:

The Race Concept Michael Banton, Jonathan Harwood, 1975 The Concept of Race in Natural and Social Science E. Nathaniel Gates, 2014-05-01 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject *Rethinking Race* Michael O. Hardimon, 2017-06-12 Many scholars and activists seek to eliminate race the word and the concept from our vocabulary Their claim is clear because science has shown that racial essentialism is false and because the idea of race has proved virulent we should do away with the concept entirely Michael O Hardimon criticizes this line of thinking arguing that we must recognize the real ways in which race exists in order to revise our understanding of its significance *Rethinking Race* provides a novel answer to the question What is race Pernicious traditional racialism maintains that people can be judged and ranked according to innate racial features Hardimon points out that those who would eliminate race make the mistake of associating the word only with this view He agrees that this concept should be jettisoned but draws a distinction with three alternative ideas first a stripped down version of the ordinary concept of race that recognizes minimal physical differences between races but does not consider them significant second a scientific understanding of populations with shared lines of descent and third an acknowledgment of social race as a

separate construction Hardimon provides a language for understanding the ways in which races do and do not exist His account is realistic in recognizing the physical features of races as well as the existence of races in our social world But it is deflationary in rejecting the concept of hierarchical or defining racial characteristics Ultimately Rethinking Race offers a philosophical basis for repudiating racism without blinding ourselves to reality **The Race Illusion** Adam

Hochman,2025-05-28 In The Race Illusion Adam Hochman argues that there are no human races only racialized groups groups mistakenly believed to be races He meticulously critiques all of the major defenses of the view that races exist beginning with biological accounts While there is some human biological diversity it is not distributed in a way that would justify racial classification Hochman shows how modern attempts to revive race as a biological category either trivialize the category or change the topic entirely Many now believe race to be a social construct a phrase Hochman criticizes for its ambiguity The idea of race is a social invention racial classification is determined by social factors and racism is a social phenomenon However that does not mean that race itself is social Hochman argues that for social races to exist they would need to be definable in terms of social properties yet scholars have been unable to identify the social properties that plausibly make a group a race After examining ten biological and seven social accounts of race Hochman develops and defends the view in The Race Illusion that there are no races only racialized groups He argues that rejecting race as a category of analysis and replacing it with racialized group is not only the most theoretically sound approach but also the one best suited to fighting racism **The Rise and Fall of the Caucasian Race** Bruce Baum,2008-07-01 The term Caucasian is a curious

invention of the modern age Originating in 1795 the word identifies both the peoples of the Caucasus Mountains region as well as those thought to be Caucasian Bruce Baum explores the history of the term and the category of the Caucasian race more broadly in the light of the changing politics of racial theory and notions of racial identity With a comprehensive sweep that encompasses the understanding of race even before the use of the term Caucasian Baum traces the major trends in scientific and intellectual understandings of race from the Middle Ages to the present day Baum s conclusions make an unprecedented attempt to separate modern science and politics from a long history of racial classification He offers significant insights into our understanding of race and how the Caucasian race has been authoritatively invented embraced displaced and recovered throughout our history **The Concept of Race and Psychotherapy** Jefferson M.

Fish,2010-11-05 Is our society color blind Trans racial Post racial And what if anything should this mean to professionals in clinical practice with diverse clients The ambitious volume The Concept of Race and Psychotherapy probes these questions compelling readers to look differently at their clients and themselves and offering a practical framework for more effective therapy By tracing the racial folk taxonomies of eight cultures in the Americas and the Caribbean the author elegantly defines race as a fluid construct dependent on local social political and historical context for meaning but meaningless in the face of science This innovative perspective informs the rest of the book which addresses commonly held assumptions about

problem behavior and the desire to change and presents a social science based therapy model applicable to a wide range of current approaches that emphasizes both cultural patterns and client uniqueness Among the highlights of the coverage Common elements in therapy and healing across cultures The psychological appeal of racial concepts despite scientific evidence to the contrary Lessons psychology can learn from anthropology Three types of therapeutic relationships with strategies for working effectively in each The phenomenon of discontinuous change in brief therapy Solution focused therapy from a cross cultural perspective Thought provoking reading for psychologists psychiatrists clinical social workers and other mental health professionals as well as graduate students in these fields The Concept of Race and Psychotherapy affirms the individuality and the interconnectedness of every client

Concepts in Action ,2017-11-06 Rather than treating concepts and their application in a static and iconic manner Concepts in Action provides us with examples of the active and creative use of concepts for constructing and generating new knowledge Examples of theoretic constructions and topics discussed refers to the function of theory in main stream sociology concepts enabling us to expand the range of interpretations a critical view and approach to general concepts of culture nature and consumption concepts dealing with organization institutions and actors and examples of travelling concepts such as class gender race and social recognition Concepts in Action follows on the earlier Theory in Action 2016 as part of a three volume project broadening our understanding of the interplay of theory and methods The forthcoming third volume will focus on the strategy of constructing and analyzing the object in social science This volume is highly relevant for researchers and students interested in theoretical construction in the social sciences Contributors are G ran Ahrne Mette Andersson Harriet Bjerrum Nielsen Anne Britt Flemmen Antje Gimmmler Willy Guneriussen Roar Hagen Raimund Hasse H kon Leiulfsrud Willy Martinussen John Scott Peter Sohlberg P l Strandbakken Richard Swedberg and Erik Olin Wright

Shifting Concepts Teresa Marques,Åsa Wikforss,2020 This volume brings together leading philosophers and psychologists to present novel accounts of concepts communication and conceptual change and variability with the aim to advance the interdisciplinary debate on the role of concepts in categorizing reasoning and social interaction

Critical Social Theory in the Interests of Black Folks Lucius T. Outlaw Jr.,2005-09-15 Examining the situations of African Americans in the U S A Lucius Outlaw s essays illustrate over twenty years of work dedicated to articulating a critical theory of society that would account for issues and limiting factors affecting African descended peoples in the U S Attempting to put politics aside Outlaw writes from a non partisan standpoint in the hopes that the issues he raises in his essays will inspire improvement for the well bring of African Americans and will also strengthen America s democracy Outlaw envisions a democratic order that is not built upon racist projections of the past Instead he seeks in these essays a transformative social theory that would help create a truly democratic social order

Race and Human Diversity Robert L. Anemone,2019-02-18 Race and Human Diversity is an introduction to the study of human diversity in both its biological and cultural dimensions Robert L Anemone examines the biological basis of human difference and how humans have biologically

and culturally adapted to life in different environments The book discusses the history of the race concept evolutionary theory human genetics and the connections between racial classifications and racism It invites students to question the existence of race as biology but to recognize race as a social construction with significant implications for the lived experience of individuals and populations This second edition has been thoroughly revised with new material on human genetic diversity developmental plasticity and epigenetics There is additional coverage of the history of eugenics race in US history citizenship and migration affirmative action and white privilege and the burden of race Fully accessible for undergraduate students with no prior knowledge of genetics or statistics this is a key text for any student taking an introductory class on race or human diversity Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Philosophy of Race Albert Atkin, 2014-10-14 Race is so highly charged and loaded a concept it often hampers critical thinking about racial practice and policy A philosophical approach allows us to isolate and analyse the key questions What is race Can we do without race What is racism and why is it wrong What should our policies on race and racism be The Philosophy of Race presents a concise and up to date overview of the central philosophical debates about race It then builds on this philosophical foundation to analyse the sociopolitical questions of racism and race relevant policy Throughout the discussion is illustrated with a wide range of examples Afro American blackness British Asian racial formation Aboriginal identity in Australia the racial grouping of Romany Gypsies and Jews in Europe categories of race in Brazil and the concept of model minorities in the US and UK

Race and IQ Ashley Montagu, 1999-04-08 Ashley Montagu who first attacked the term race as a usable concept in his acclaimed work *Man's Most Dangerous Myth* offers here a devastating rebuttal to those who would claim any link between race and intelligence In now classic essays this thought provoking volume critically examines the terms race and IQ and their applications in scientific discourse The twenty four contributors including such eminent thinkers as Stephen Jay Gould Richard Lewontin Urie Bronfenbrenner W F Bodmer and Jerome Kagan draw on fields that range from biology and genetics to psychology anthropology and education What emerges in piece after piece is a deep skepticism about the scientific validity of intelligence tests especially as applied to evaluating innate intelligence if only because scientists still cannot distinguish between genetic and environmental contributions to the development of the human mind Five new essays have been included that specifically address the claims made in the recent highly controversial book *The Bell Curve* Must reading for anyone interested in racism and education in America *Race and IQ* is a brilliantly lucid exploration of the boundary line between race and intelligence

Race Unmasked Michael Yudell, 2014-09-09 Race while drawn from the visual cues of human diversity is an idea with a measurable past an identifiable present and an uncertain future The concept of race has been at the center of both triumphs and tragedies in American history and has had a profound effect on the human experience *Race Unmasked* revisits the origins of commonly held beliefs

about the scientific nature of racial differences examines the roots of the modern idea of race and explains why race continues to generate controversy as a tool of classification even in our genomic age Surveying the work of some of the twentieth century s most notable scientists *Race Unmasked* reveals how genetics and related biological disciplines formed and preserved ideas of race and at times racism A gripping history of science and scientists *Race Unmasked* elucidates the limitations of a racial worldview and throws the contours of our current and evolving understanding of human diversity into sharp relief
