*The Hindu Index* ,2004 **National Races** Richard McMahon,2019-08-01 *National Races* explores how politics interacted with transnational science in the nineteenth and early twentieth centuries This interaction produced powerful racialized national identity discourses whose influence continues to resonate in today s culture and politics Ethnologists

anthropologists and raciologists compared modern physical types with ancient skeletal finds to unearth the deep prehistoric past and true nature of nations These scientists understood certain physical types to be what Richard McMahon calls national races or the ageless biological essences of nations Contributors to this volume address a central tension in anthropological race classification On one hand classifiers were nationalists who explicitly or implicitly used race narratives to promote political agendas Their accounts of prehistoric geopolitics treated national races as the proxies of nations in order to legitimize present day geopolitical positions On the other hand the transnational community of race scholars resisted the centrifugal forces of nationalism Their interdisciplinary project was a vital episode in the development of the social sciences using biological race classification to explain the history geography relationships and psychologies of nations National Races goes to the heart of tensions between nationalism and transnationalism politics and science by examining transnational science from the perspective of its peripheries Contributors to the book supplement the traditional focus of historians on France Britain and Germany with myriad case studies and examples of nineteenth and early twentieth century racial and national identities in countries such as Russia Italy Poland Greece and Yugoslavia and among Jewish anthropologists
