

The background of the slide is a dark, textured surface. On the left side, there is a vertical strip of an old, sepia-toned map. The map shows a coastline with various labels, including "New York", "New Jersey", "Delaware", "Maryland", "Virginia", "North Carolina", "South Carolina", "Georgia", "Florida", "Alabama", "Mississippi", "Louisiana", "Arkansas", "Tennessee", "Kentucky", "Indiana", "Ohio", "Pennsylvania", "New England", "Canada", "Mexico", "Central America", "Caribbean", "South America", "Africa", "Europe", "Asia", "Australia", "Oceania", "Antarctica". The map is partially obscured by a dark, semi-transparent overlay that covers the right side of the slide.

A Review of Hoffman's Race Traits and Tendencies of the American Negro - The American Negro Academy. Occasional Papers No. 1 Kelly

Miller,2018-02-21 Dr Kelly Miller wrote this text in reply to Frederick Ludwig Hoffman debunking many of the author s points regarding the characteristics and behaviors of black American people Hoffman s treatise contained a number of incorrect assertions regarding the black American peoples and their condition Its central tenet is that the black American race is decaying both physically and morally due to a number of innate race traits Contrasting this opinion Miller attributes said criticisms not to biological defects but inferior environmental and social conditions endured by black Americans in the Reconstruction era Point by point Miller tackles Hoffman s assertions on black population levels rates of birth and death the notion that black Americans are on a trend to become extinct physical morphology and characteristics and the social conditions that most reside in An eloquent and concise counter thesis is built by Miller who offers readers a compelling picture of life for African Americans with the powerful argument backed by facts that the prime cause of any decline is the degraded and impoverished social conditions that many blacks live under Kelly Miller was a famed author in the early 20th century who did much to advance African American tutoring in the American education system His greatest fame was in the field of mathematics which he taught in academia for decades An early proponent of civil rights for black Americans Dr Miller was outraged by the reticence and lack of action by the U S government as lynchings became commoner in the 1910s and 1920s terming the lack of state support a disgrace of democracy

A Review of Hoffman's Race Traits and Tendencies of the American Negro Kelly Miller,2015-05-08 11 93 If we begin with 1810 the first census year after the constitutional suppression of the slave trade we see from this table that the growth of the Negro element followed the ordinary law of population viz a gradual decline in the rate of increase In 70 years the decennial rate of increase declined from about 30 per cent to 22 per cent But from 1880 to 1890 there was a per saltum decrease from 22 to 13 per cent that is the decline in ten years was equal to that of the previous seventy And all this has happened during an era of profound peace and prosperity when the Negro population was subject to no great perturbing influences When a number of

Reluctant Race Men Joan L. Bryant, 2024-02-13 Activists in the earliest Black antebellum reform endeavors contested and deprecated the concept of race Attacks on the logic and ethics of dividing grouping and ranking humans into races became commonplace facets of activism in anti colonization and emigration campaigns suffrage and civil rights initiatives moral reform projects abolitionist struggles independent church development and confrontations with scientific thought on human origins Denunciations persisted even as later generations of reformers felt compelled by theories of progress and American custom to promote race as a basis of a Black collective consciousness Reluctant Race Men traces a history of the disparate challenges Black American reformers lodged against race across the long nineteenth century It

factors their opposition into the nation's history of race and reconstructs a reform tradition largely ignored in accounts of Black activism Black controlled newspapers societies churches and conventions provided the principal loci and resources for questioning race In these contexts people of African descent generated a lexicon for refuting race debated its logic and ultimately reinterpreted it Reformers challenges call into question the notion that race is a self evident site of identity among Black people Their ideas instead spotlight legal political religious social and scientific practices that configured human difference sameness hierarchy and consciousness They show how a diverse set of actions constituted multi faceted American phenomena dubbed race

The Condemnation of Blackness Khalil Gibran Muhammad,2019-07-22 Chronicling the emergence of deeply embedded notions of black people as a dangerous race of criminals by explicit contrast to working class whites and European immigrants this fascinating book reveals the influence such ideas have had on urban development and social policies

The Bounds of Race Dominick LaCapra,2018-08-06 The concept of race is central to one of the most powerful ideological formations in history Dominick LaCapra argues in his introduction to this volume and understanding the effects of that ideology and its intricate relations with issues of class and gender is one of the most pressing challenges to contemporary modes of thought The eleven essays comprising The Bounds of Race confront this challenge with insight rigor and imagination The authors take on questions of language genre and politics with reference to African American Anglo American African South African Francophone North African British and Afro Hispanic texts Individual chapters discuss writings from an array of genres including homily autobiography the novel children's literature and political and scientific discourse Taken together the essays argue persuasively that the existing canon must be expanded that the protocols of interpretation must be transformed to make a prominent place for such issues as race and that the problem of interpretation cannot be posed in the absence of theoretically informed modes of historical investigation The Bounds of Race provides a subtle analysis of the variable role of racial ideologies and traces the interplay between hegemonic constraints and the strategies of resistance to them

Critical Philosophy of Race Robert Bernasconi,2023 The fifteen essays by distinguished philosopher of race Robert Bernasconi that are collected here demonstrate why the critical philosophy of race needs to take a historical turn Genealogies of the concepts of both race and racism clarify why some of the dominant strategies for combatting racism tend to be ineffective For example the Boasian UNESCO strategy that highlights biology's rejection of race neglects cultural racism Drawing on the work of Frantz Fanon the late Sartre and Michel Foucault Robert Bernasconi argues for a holistic approach that integrates the concrete experience of racism faced by individuals into the study of institutional structural and systemic racism His philosophical studies of such Black philosophers as Ottobah Cugoana Ant nor Firmin and W E B Du Bois contribute to challenging the dominant philosophical canon This volume will be an essential resource for scholars and students interested in this resurgent topic
