Race with the Wind : How Air Racing Advanced Aviation Birch Matthews,2001 *Race with the Wind* Birch Matthews,2001 In the decades leading up to World War II air races were often the proving grounds for radical new aviation principles and designs The people and machines of air racing during this period made tremendous strides and contributed incredible new technologies aerodynamics powerplants and airframes This unique look at the key players and aircraft of the early 20th century s great air races examines and explains how innovative racing technologies found their way into future fighter and passenger aircraft Coverage of exciting races like the Schneider Trophy Pulitzer Trophy Race and the National Air Races an in depth look at their contributions to aeronautics exclusive line drawings illustrating the technologies and archival photography make this a must for air racing fans and aviation enthusiasts The Pulitzer Air Races Michael Gough,2013-05-17 Three years after American raceplanes failed dismally in the most important air race of 1920 a French magazine lamented that American pilots have broken the records which we here in France considered as our own for so long The Pulitzer Trophy Air Races 1920 through 1925 endowed by the sons of publisher Joseph Pulitzer in his memory brought about this remarkable turnaround Pulitzer winning speeds increased from 157 to 249 mph and Pulitzer racers mounted on floats twice won the most prestigious international air race the Schneider Trophy Race for seaplanes Airplanes engines propellers and other equipment developed for the Pulitzers were sold domestically and internationally More than a million spectators saw the Pulitzers millions more read about them and watched them in newsreels This the first book about the Pulitzers tells the story of businessmen generals and admirals who saw racing as a way to drive aviation progress designers and manufacturers who produced record breaking racers and dashing pilots who gave the races their public face It emphasizes the roles played by the communities that hosted the races Garden City Long Island Omaha Detroit and Mt Clemens Michigan St Louis and Dayton The book concludes with an analysis of the Pulitzers importance and why they have languished in obscurity for so long *Billy Mitchell's War with the Navy* Thomas Wildenberg,2014-02-15 In the years following WWI the U S Congress was more interested in disarmament than in funding national defense For the military services this meant lean budgets and skeleton operating forces Billy Mitchell s War recounts the struggle between the Army and Navy air arms for the resources needed to define and establish the role of aviation within their respective services in the period between the two world wars When Billy Mitchell returned from WW I he brought with him the deep seated belief that air power had made armies and navies obsolete When Congress rejected the concept of a unified air service in 1920 Mitchell and his supporters turned on the Navy seeking to substitute the Air Service as the nation s first line of defense While Mitchell proved that aircraft could sink a battleship with the bombing of the Ostfriesland in 1921 he was unable to convince the General Staff of the Army the General Board of the Navy the Secretary of War the Secretary of the Navy or Congress of the need for an independent air force When Mitchell turned to the pen to discredit the Navy he was convicted by his own words

and actions in a court martial that captivated the nation and was forced to resign in 1925 Rather than ending the rivalry for air power Mitchell's resignation set the stage for the ongoing dispute between the two services in the years immediately before WWII

In Their Own Words Fred Erisman, 2021-01-15 Amelia Earhart's prominence in American aviation during the 1930s obscures a crucial point she was but one of a closely knit community of women pilots Although the women were well known in the profession and widely publicized in the press at the time they are largely overlooked today Like Earhart they wrote extensively about aviation and women's causes producing an absorbing record of the life of women fliers during the emergence and peak of the Golden Age of Aviation 1925-1940 Earhart and her contemporaries however were only the most recent in a long line of women pilots whose activities reached back to the earliest days of aviation These women too wrote about aviation speaking out for new and progressive technology and its potential for the advancement of the status of women With those of their more recent counterparts their writings form a long sustained text that documents the maturation of the airplane aviation and women's growing desire for equality in American society In Their Own Words takes up the writings of eight women pilots as evidence of the ties between the growth of American aviation and the changing role of women Harriet Quimby 1875-1912 Ruth Law 1887-1970 and the sisters Katherine and Marjorie Stinson 1893-1977 1896-1975 came to prominence in the years between the Wright brothers and World War I Earhart 1897-1937 Louise Thaden 1905-1979 and Ruth Nichols 1901-1960 were the voices of women in aviation during the Golden Age of Aviation Anne Morrow Lindbergh 1906-2001 the only one of the eight who legitimately can be called an artist bridges the time from her husband's 1927 flight through the World War II years and the coming of the Space Age Each of them confronts issues relating to the developing technology and possibilities of aviation Each speaks to the importance of assimilating aviation into daily life Each details the part that women might and should play in advancing aviation Each talks about how aviation may enhance women's participation in contemporary American society making their works significant documents in the history of American culture

and for aviators and their training Curtiss helped meet the special requirements of the service for aircraft particularly those with the potential for operating with naval vessels at sea or in conducting long distance flights over water He also was instrumental in training the first naval aviators Curtiss and the Navy continued their collaboration through World War I reaching a climax in 1919 with the first transatlantic flight of the famed Navy Curtiss NC flying boat This book addresses the broader implications of the Curtiss Navy collaboration in the context of the longstanding trend of government private cooperation in the introduction and development of new technologies It also explores the interactive dynamics of weapons procurement and technological change within a large and entrenched bureaucracy and helps lay to rest the persistent myth that the Navy resisted the introduction of aviation
