Colonial Cities R.J. Ross, Gerard J. Telkamp, 2012-12-06 by ROBERT ROSS and GERARD J TELKAMP I In a sense cities were superfluous to the purposes of colonists The Europeans who founded empires outside their own continent were primarily concerned with extracting those products which they could not acquire within Europe These goods were largely agricultural and grown most often in a climate not found within Europe Even when as in India before 1800 the major exports were manufactures in general they were still made in the countryside rather than in the great cities It was only on rare occasion when great mineral wealth was discovered that giant metropolises grew up around the site of extraction Since their location was determined by geology not economics they might be in the most inaccessible and in convenient areas but they too would draw labour off from the agricultural pursuits of the colony as a whole From the point of view of the colonists the cities were therefore in some respects necessary evils as they were parasites on the rural producers competing with the colonists in the process of surplus extraction Nevertheless the colonists could not do without cities The requirements of colonisation demanded many unequivocally urban functions Pre eminent among these was of course the need for a port to allow the export of colonial wares and the import of goods from Europe or from other parts of the non European world in the country trade as it was known around India

Sustainable Intercultural Urbanism at the Service of the African City of Tomorrow Esoh Elamé, 2022-06-03 Most African cities are human settlements that lack the systems needed for effective land use planning In fact the disorganization that prevails has become so complex that the concept of urbanism itself has been called into question This book highlights the need to restore urban planning in African cities through sustainable development and interculturality Furthermore it addresses the balance of power between urban planning and sustainable development and explores the historical and postcolonial aspects of urban planning in African cities A case study focusing on the development of sustainable cities and neighborhoods in the M Zab Valley is also included as well as topics such as urban greening climatic threats and the problem of state agro industrial land transactions which compete with sustainable urban planning

Blacks in Colonial Veracruz Patrick J. Carroll, 2010-06-28. Beginning with the Spanish conquest, Mexico has become a racially complex society intermixing Indian, Spanish, and African populations. Questions of race and ethnicity have fueled much political and scholarly debate, sometimes obscuring the experiences of particular groups, especially blacks. *Blacks in Colonial Veracruz* seeks to remedy this omission by studying the black experience in central Veracruz during virtually the entire colonial period. The book probes the conditions that shaped the lives of inhabitants in Veracruz from the first European contact through the early formative period, colonial years, independence era, and the postindependence decade. While the primary focus is on blacks, Carroll relates their experience to that of Indians, Spaniards, and castas, racially hybrid people, to present a full picture of the interplay between local populations, the physical setting, and technological advances in the development of this important but little-studied region.

Structures and Transformations in Modern British History David Feldman, Jon Lawrence, 2011-01-20. This major collection of essays challenges many of our preconceptions about British political and social history from the late eighteenth century to the present. Inspired by the work of Gareth Stedman Jones, twelve leading scholars explore both the long-term structures, social, political, and intellectual, of modern British history and the forces that have transformed those structures at key moments. The result is a series of insightful, original essays presenting new research within a broad historical context. Subjects covered include the consequences of rapid demographic change in the eighteenth and nineteenth centuries; the forces shaping transnational networks, especially those between Britain and its empire; and the recurrent problem of how we connect cultural politics to social change. An introductory essay situates Stedman Jones's work within the broader historiographical trends of the past thirty years, drawing important conclusions about new directions for scholarship in the twenty-first century.

Géneros de Gente in Early Colonial Mexico Robert C. Schwaller, 2016-10-20. On December 19, 1554, the members of Tenochtitlan's indigenous cabildo, or city council, petitioned Emperor Charles V of Spain for administrative changes to save us from any Spaniard, mestizo, black, or mulatto afflicting us in the marketplace, on the roads, in the canal, or in our homes. Within thirty years of the conquest, the presence of these groups in New Spain was large enough to threaten the social, economic, and cultural order of the indigenous elite. In *Géneros de Gente in Early Colonial Mexico*, an ambitious rereading of colonial history, Robert C. Schwaller proposes using the Spanish term *géneros de gente*, types or categories of people, as part of a more nuanced perspective on what these categories of difference meant and how they evolved. His work revises our understanding of racial hierarchy in Mexico, the repercussions of which reach into the present.

Schwaller traces the connections between medieval Iberian ideas of difference and the unique societies forged in the Americas. He analyzes the ideological and legal development of *gneros de gente* into a system that began to resemble modern notions of race. He then examines the lives of early colonial mestizos and mulatos to show how individuals of mixed ancestry experienced the colonial order. By pairing an analysis of legal codes with a social history of mixed race individuals, his work reveals the disjunction between the establishment of a common colonial language of what would become race and the ability of the colonial Spanish state to enforce such distinctions. Even as the colonial order established a system of governance that entrenched racial differences, colonial subjects continued to mediate their racial identities through social networks, cultural affinities, occupation, and residence. Presenting a more complex picture of the ways difference came to be defined in colonial Mexico, this book exposes important tensions within Spanish colonialism and the developing social order. It affords a significant new view of the development and social experience of race in early colonial Mexico and afterward.

From Subjects to Citizens Sarah C. Chambers, 2010-11-01. Offering a corrective to previous views of Spanish American independence, this book shows how political culture in Peru was dramatically transformed in this period of transition and how the popular classes as well as elites played crucial roles in this process. Honor underpinning the legitimacy of Spanish rule and a social hierarchy based on race and class during the colonial era came to be an important source of resistance by ordinary citizens to repressive action by republican authorities fearful of disorder. Claiming the protection of their civil liberties as guaranteed by the constitution, these honorable citizens cited their hard work and respectable conduct in justification of their rights in this way, contributing to the shaping of republican discourse. Prominent politicians from Arequipa familiar with these arguments made in courtrooms where they served as jurists promoted at the national level a form of liberalism that emphasized not only discipline but also individual liberties and praise for the honest working man. But the protection of men's public reputations and their patriarchal authority, the author argues, came at the expense of women who suffered further oppression from increasing public scrutiny of their sexual behavior through the definition of female virtue as private morality, which also justified their exclusion from politics. The advent of political liberalism was thus not associated with greater freedom, social or political, for women.

European cities Noa K. Ha, Giovanni Picker, 2022-06-28. *European cities: Modernity, race, and colonialism* is a multidisciplinary collection of scholarly studies which rethink European urban modernity from a race-conscious perspective, being aware of postcolonial entanglements. The twelve original contributions empirically focus on such various cities as Barcelona, Buenos Aires, Cottbus, Genoa, Hamburg, Madrid, Mitrovica, Naples, Paris, Sheffield, and Thessaloniki, engaging multiple combinations of global urban studies from various historical perspectives with postcolonial, decolonial, and critical race studies. Primarily inspired by the notion of Provincializing Europe, Dipesh Chakrabarty, the collection interrogates dominant Eurocentric theories, representations, and models of European cities across the East-West divide, offering the reader alternative perspectives to understand and imagine urban life and politics.

With its focus on Europe this book ultimately contributes to decades of rigorous critical race scholarship on varied global urban regions European cities is a vital reading for anyone interested in the complex interactions between colonial legacies and constructions of modernity in view of catering to social change and urban justice **Gentrification Is Inevitable and Other Lies** Leslie Kern, 2022-09-06 From the author of the best selling *Feminist City* this urbanite's guide to gentrification knocks down the myths and exposes the forces behind the most urgent housing crisis of our time Gentrification is no longer a phenomenon to be debated by geographers or downplayed by urban planners it's an experience lived and felt by working class people everywhere Leslie Kern travels to Toronto Vancouver New York London and Paris to look beyond the familiar and false stories we tell ourselves about class money and taste What she brings back is an accessible radical guide on the often invisible forces that shape urban neighbourhoods settler colonialism racism sexism ageism ableism and more Gentrification is not inevitable if city lovers work together to turn the tide Kern examines resistance strategies from around the world and calls for everyday actions that empower everyone from displaced peoples to long time settlers We can mobilize demand reparations and rewrite the story from the ground up *Encyclopedia of Urban Studies* Ray Hutchison, 2010 An encyclopedia about various topics relating to urban studies
