*Gods in the Global Village* Lester R. Kurtz, 2012 In an era plagued by religious conflict the Third Edition of *Gods in the Global Village* directly responds to issues of social problems prevalent in the world today Using an engaging thought provoking style author Lester R Kurtz focuses on the relationship among the major faith traditions that inform the thinking and ethical standards of most people in the emerging global social order This book focuses on a central aspect of that common crisis A major assumption of this book is that all knowledge is shaped by the social context of the knower therefore both religious traditions and our studies of them are shaped by the context in which we construct them The author argues that religious pluralism will be a necessary precondition of the global village for the foreseeable future The question that faces us as a human community is not Which religious tradition is true or even Is any religious tradition true but rather How can we enable the various religious and secular traditions to coexist peacefully on the planet The text supports the belief that the sociology of religion itself a pluralistic discipline can provide invaluable insight into the most pressing problems of our time *Extreme Deviance* Erich Goode, D. Angus Vail, 2008 This book takes a look at normative violations that earn the violators a deviant identity in the eyes of the members of mainstream society And so serious likewise that the lives of

violators do revolve around the actions the beliefs or the characteristics as well as the consequences such violations have mainly with respect to the social reactions they generate in others When others really don't like what you do believe or are they usually let you know that in no uncertain terms and this is likely to drastically alter your life     *The SAGE Handbook of Race and Ethnic Studies* John Solomos, Patricia Hill Collins, 2010-06-15 What is the state of Race and Ethnic Studies today How has the field emerged What are the core concepts debates and issues The SAGE Handbook of Race and Ethnic Studies is a vital resource for researchers and students with a panoramic critical survey of the field A rigorous focused examination of the central questions in the field today the text examines The roots of the field of race and ethnic studies The distinction between race and ethnicity Methodological issues facing researchers The relationship between the field and more established disciplines Intersections between race and ethnicity and questions sexuality gender nation and social transformation The challenge of multiculturalism Race ethnicity and globalization Race and the family Race and education Race and religion Issues for the 21st Century     **Key Ideas in Sociology** Peter Kivisto, 2004 Key Ideas in Sociology is the only compact and portable book for undergraduate readers that links issues regarding post modern society to the ideas and individuals that gave rise to sociological thinking in the late 19th century This is the ideal text for idea and history oriented introductory sociology courses     **Sociology** David M. Comaroff, 2016-12-05 In this book renowned anthropologists Jean and John L Comaroff make a startling but absolutely convincing claim about our modern era it is not by our arts our politics or our science that we understand ourselves it is by our crimes Surveying an astonishing range of forms of crime and policing from petty thefts to the multibillion dollar scams of too big to fail financial institutions to the collateral damage of war they take readers into the disorder of the late modern world Looking at recent transformations in the triangulation of capital the state and governance that have led to an era where crime and policing are ever more complicit

they offer a powerful meditation on the new forms of sovereignty citizenship class race law and political economy of representation that have arisen To do so the Comaroffs draw on their vast knowledge of South Africa especially and its struggle to build a democracy founded on the rule of law out of the wreckage of long years of violence and oppression There they explore everything from the fascination with the supernatural in policing to the extreme measures people take to prevent home invasion drawing illuminating comparisons to the United States and United Kingdom Going beyond South Africa they offer a global criminal anthropology that attests to criminality as the constitutive fact of contemporary life the vernacular by which politics are conducted moral panics voiced and populations ruled The result is a disturbing but necessary portrait of the modern era one that asks critical new questions about how we see ourselves how we think about morality and how we are going to proceed as a global society
