Anderson, Douglas Massey, 2001-07-19 In 1899 the great African American scholar W E B DuBois published *The Philadelphia Negro* the first systematic case study of an African American community and one of the foundations of American sociology DuBois prophesied that the color line would be the problem of the twentieth century One hundred years later *Problem of the Century* reflects upon his prophecy exploring the ways in which the color line is still visible in the labor market the housing market education family structure and many other aspects of life at the turn of a new century The book opens with a theoretical discussion of the way racial identity is constructed and institutionalized When the government classifies races and confers group rights upon them is it subtly reenforcing damaging racial divisions or redressing the group privileges that whites monopolized for so long The book also delineates the social dynamics that underpin racial inequality The contributors explore the causes and consequences of high rates of mortality and low rates of marriage in black communities as well as the way race affects a person's chances of economic success African Americans may soon lose their historical position as America's majority minority and the book also examines how race plays out in the sometimes fractious relations between blacks and immigrants The final part of the book shows how the color line manifests itself at work and in schools Contributors find racial issues at play on both ends of the occupational ladder among absentee fathers paying child support from their meager earnings and among black executives prospering in the corporate world In the schools the book explores how race defines a student's peer group and how peer pressure affects a student's grades *Problem of the Century* draws upon the distinguished faculty of sociologists at the University of Pennsylvania where DuBois conducted his research for *The Philadelphia Negro* The contributors combine a scrupulous commitment to empirical inquiry with an eclectic openness to different methods and approaches *Problem of the Century* blends ethnographies and surveys statistics and content analyses census data and historical records to provide a far reaching examination of racial inequality in all its contemporary manifestations

Problem of the Century Elijah Anderson, Douglas Massey, 2001-07-19 In 1899 the great African American scholar W E B DuBois published *The Philadelphia Negro* the first systematic case study of an African American community and one of the foundations of American sociology DuBois prophesied that the color line would be the problem of the twentieth century One hundred years later *Problem of the Century* reflects upon his prophecy exploring the ways in which the color line is still visible in the labor market the housing market education family structure and many other aspects of life at the turn of a new century The book opens with a theoretical discussion of the way racial identity is constructed and institutionalized When the government classifies races and confers group rights upon them is it subtly reenforcing damaging racial divisions or redressing the group privileges that whites monopolized for so long The book also delineates the social dynamics that underpin racial inequality The contributors explore the causes and consequences of high rates of mortality and

low rates of marriage in black communities as well as the way race affects a person's chances of economic success. African Americans may soon lose their historical position as America's majority minority and the book also examines how race plays out in the sometimes fractious relations between blacks and immigrants. The final part of the book shows how the color line manifests itself at work and in schools. Contributors find racial issues at play on both ends of the occupational ladder among absentee fathers paying child support from their meager earnings and among black executives prospering in the corporate world. In the schools, the book explores how race defines a student's peer group and how peer pressure affects a student's grades. *Problem of the Century* draws upon the distinguished faculty of sociologists at the University of Pennsylvania where DuBois conducted his research for *The Philadelphia Negro*. The contributors combine a scrupulous commitment to empirical inquiry with an eclectic openness to different methods and approaches. *Problem of the Century* blends ethnographies and surveys, statistics and content analyses, census data and historical records to provide a far-reaching examination of racial inequality in all its contemporary manifestations.

Categorically Unequal Douglas S. Massey, 2007-04-02 The United States holds the dubious distinction of having the most unequal income distribution of any advanced industrialized nation. While other developed countries face similar challenges from globalization and technological change, none rivals America's singularly poor record for equitably distributing the benefits and burdens of recent economic shifts. In *Categorically Unequal*, Douglas Massey weaves together history, political economy, and even neuropsychology to provide a comprehensive explanation of how America's culture and political system perpetuates inequalities between different segments of the population. *Categorically Unequal* is striking both for its theoretical originality and for the breadth of topics it covers. Massey argues that social inequalities arise from the universal human tendency to place others into social categories. In America, ethnic minorities, women, and the poor have consistently been the targets of stereotyping, and as a result, they have been exploited and discriminated against throughout the nation's history. African Americans continue to face discrimination in markets for jobs, housing, and credit. Meanwhile, the militarization of the U.S.-Mexican border has discouraged Mexican migrants from leaving the United States, creating a pool of exploitable workers who lack the legal rights of citizens. Massey also shows that women's advances in the labor market have been concentrated among the affluent and well-educated, while low-skilled female workers have been relegated to occupations that offer few chances for earnings mobility. At the same time as the wages of low-income men have fallen, more working-class women are remaining unmarried and raising children on their own. Even as minorities and women continue to face these obstacles, the progressive legacy of the New Deal has come under frontal assault. The government has passed anti-union legislation, made taxes more regressive, allowed the real value of the federal minimum wage to decline, and drastically cut social welfare spending. As a result, the income gap between the richest and poorest has dramatically widened since 1980. Massey attributes these anti-poor policies in part to the increasing segregation of neighborhoods by income, which has insulated the affluent from the social consequences of poverty and to the

disenfranchisement of the poor as the population of immigrants prisoners and ex felons swells America's unrivaled disparities are not simply the inevitable result of globalization and technological change As Massey shows privileged groups have systematically exploited and excluded many of their fellow Americans By delving into the root causes of inequality in America Categorical Unequal provides a compelling argument for the creation of a more equitable society A Volume in the Russell Sage Foundation's Centennial Series *Class, Race, and Gender in American Education* Lois Weis, 1988-01-01 Most educators might agree that the hidden agendas on class race and gender to a large extent condition and determine the form and the content of schooling But how much of this situation is due to school factors and how much to social background factors is heatedly discussed and debated by scholars working within both the mainstream and critical traditions in the field of education *Class Race and Gender in American Education* represents a groundbreaking overview of current issues and contemporary approaches involved in the areas of class race and gender in American education In this book the first to combine a consideration of these issues and to investigate the manner in which they connect in the school experience authors consider the particular situations of males and females of divergent racial and class backgrounds from their earliest childhood experiences through the adult university years While providing valuable original in depth ethnographic and statistical analyses the volume also incorporates some of the important current theoretical debates the debate between structuralists and culturalists is highlighted for example *Racial Attitudes and Asian Pacific Americans* Karen Kurotsuchi Inkelas, 2006 This study examines the complex sources and implications of the racial attitudes of Asian Pacific American APA college students who as one of the fastest growing demographics in higher education enrollments play an increasingly significant role in campus race relations *Race, Money, and the American Welfare State* Michael E. Brown, 2018-10-18 The American welfare state is often blamed for exacerbating social problems confronting African Americans while failing to improve their economic lot Michael K Brown contends that our welfare system has in fact denied them the social provision it gives white citizens while stigmatizing them as recipients of government benefits for low income citizens In his provocative history of America's safety net from its origins in the New Deal through much of its dismantling in the 1990s Brown explains how the forces of fiscal conservatism and racism combined to shape a welfare state in which blacks are disproportionately excluded from mainstream programs Brown describes how business and middle class opposition to taxes and spending limited the scope of the Social Security Act and work relief programs of the 1930s and the Great Society in the 1960s These decisions produced a welfare state that relies heavily on privately provided health and pension programs and cash benefits for the poor In a society characterized by pervasive racial discrimination this outcome Michael Brown makes clear has led to a racially stratified welfare system by denying African Americans work whites limited their access to private benefits as well as to social security and other forms of social insurance making welfare their main occupation In his conclusion Brown addresses the implications of his argument for both conservative and liberal critiques of the Great Society and for policies

Racism in the 21st Century Ronald E. Hall, 2008-08-06 In the post Civil Rights era there is a temptation to assume that racism is no longer the pressing social concern in the United States that it once was The contributors show that racism has not fallen from the forefront of American society but is manifest in a different way According to the authors in this volume in 21st century skin color has come to replace race as an important cause of discrimination This is evidenced in the increasing usage of the term people of color to encompass people of a variety of racial and ethnic backgrounds The editor has compiled a diverse group of contributors to examine racism from an interdisciplinary perspective Contributions range from the science of racism from its perceived biological basis at the end of the 19th century to sociological studies its new forms in the 21st century The result is a work that will be invaluable to understanding the challenges of confronting Racism in the 21st Century

outcomes exposure to discrimination interactions with the criminal justice system and one's sense of ethnoracial group belonging But do these disparate experiences affect the relationship between skin color and political views In *Skin Color Power and Politics in America* political scientists Mara Ostfeld and Nicole Yadon explore the relationship between skin color and political views in the U S among Latino Black and White Americans They examine how skin color influences an individual's politics and whether a person's political views influence how they assess their own skin color Ostfeld and Yadon surveyed over 1 300 people about their political views including party affiliation their opinions on welfare and the importance of speaking English in the U S The authors created a matrix grounded in their Roots of Race framework which predicts the relationship between skin color and political attitudes for each ethnoracial group based on the blurriness of the group's boundaries and historical levels of privilege They draw upon three distinct measures of skin color to conceptualize the relationship between skin color and political views Machine Rated Skin Color measured with a light reflectance meter Self Assessed Skin Color using the Yadon Ostfeld Skin Color Scale and Skin Color Discrepancy the difference between one's Machine Rated and Self Assessed Skin Color Ostfeld and Yadon examine patterns that emerge among these measures and their relationships with life experiences and political stances Among Latinos a group with relatively blurry group boundaries and low levels of historical privilege the authors find a robust relationship between political views and Self Assessed Skin Color Latinos who overestimate the lightness of their skin color are more likely to hold conservative views on current racialized political issues such as policing Latinos who overestimate the darkness of their skin color on the other hand are more likely to hold liberal political views As America's major political parties remain divided on issues of race this suggests that for Latinos self-reported skin color is used as a means of aligning oneself with valued political coalitions African Americans another group with low levels of historical privilege but with more clearly defined group boundaries demonstrated no significant relationship between skin color and political attitudes Thus the lived experiences associated with being African American appeared to supersede the differences in life experiences due to skin color Whites a group with more historical privilege and increasingly blurry group boundaries showed a clear relationship between machine assessed skin color and attitudes on political issues Those with darker Machine Rated Skin Color are more likely to hold conservative views suggesting that they are responding to the threat of losing their privilege in a multicultural society At a time when the U S is both more diverse and politically divided *Skin Color Power and Politics in America* is a timely account of the ways in which skin color and politics are intertwined
