*Reconstructing Contexts* Robert D. Hume, 1999 This book attempts to justify and theorize old historicism defining archaeo historicism as a method by which scholars can reconstruct past context in order to apply it to the interpretation of works and events of that time If such reconstruction is to be more than wildly impressionistic it must be grounded in hard evidence handled according to clear rules In this intriguing and rigorous analysis Robert Hume identifies legitimate objects for reconstruction and proposes procedures and principles by which such interpretation may be pursued He then examines the failures of the same method which works only when adequate evidence can be found In particular Hume flatly denies the intellectual legitimacy of literary history as it is commonly practised and attempts to disentangle such history from the practice of historicism The final chapter is devoted to a cogent discussion of how archaeo historicism relates to various forms of contemporary theory Hume offers a profusion of examples of good and bad historicist reconstruction and interpretation drawing largely on English literature but also on American and other world literatures theatre history and music theory Although addressed primarily to literary critics this wide ranging and bold work will be of interest to historians and cultural critics as well

Rhine Crossings Aminia M. Brueggemann, Peter Schulman, 2006-06-01. Rhine Crossings explores the conflicts and resolutions that have characterized the relationship between France and Germany over the past two centuries. Despite their varying outlooks on life and style, the French *esprit* and the German *wesen* and despite three bloody wars, the Franco-Prussian and the two world wars, there has always been and still is a vital intellectual, political and cultural exchange between these former archenemies. The essays in this book detail the admiration and antagonism in French and German attempts to seek each other out while keeping their individual senses of self. Focusing on representative works of literature, film and philosophy, the contributors identify the problems vexing these countries: war, economic competition as well as possible solutions, the Maastricht treaty, increasing youth exchange. From the literary salons of the eighteenth century to the trenches of the twentieth, from a love-hate relationship to one of cooperation and peace, this book investigates the unique and volatile dialectic between these two nations and cultures.

**Monet, Narcissus, and Self-Reflection** Steven Zalman Levine, 1994. Steven Z. Levine provides a new understanding of the life and work of Claude Monet and the myth of the modern artist. Levine analyzes the extensive critical reception of Monet and the artist's own prolific writings in the context of the story of Narcissus, popular in late nineteenth century France. Through a careful blending of psychoanalytical theory and historical study, Levine identifies narcissism and obsession as driving forces in Monet's art and demonstrates how we derive

meaning from the accumulated verbal responses to an artist's work

ph scale acids bases ph and buffers article khan academy - Dec 15 2022

buffers typically consist of an acid base pair with the acid and base differing by the presence or absence of a proton a  
conjugate acid base pair for instance one of the buffers that maintain the ph of human blood involves carbonic acid  $\text{H}_2\text{CO}_3$   
and its conjugate base the bicarbonate ion  $\text{HCO}_3^-$

**acid base reaction wikipedia** - Oct 13 2022

an acid and a base react not to produce a salt and a solvent but to form a new acid and a new base the concept of  
neutralization is thus absent brønsted lowry acid base behavior is formally independent of any solvent making it more all  
encompassing than the arrhenius model

14 3 relative strengths of acids and bases chemistry libretexts - Jul 10 2022

oct 4 2023 brønsted lowry acid base chemistry is the transfer of protons thus logic suggests a relation between the relative  
strengths of conjugate acid base pairs the strength of an acid or base is quantified in its ionization constant  $K_a$  or  $K_b$  which  
represents the extent of the acid or base ionization reaction

**overview of acids and bases chemistry libretexts** - Jan 16 2023

jan 30 2023 acetic acid is a weak acid  $K_a = 1.8 \times 10^{-5}$  and acetate is a weak base  $K_b = K_w / K_a = 5.6 \times 10^{-10}$  like acids strong and  
weak bases are classified by the extent of their ionization strong bases disassociate almost or entirely to completion in  
aqueous solution

jun 20 2023 the hard soft acid base principle hsb principle stems from the recognition that some lewis acids and bases  
seem to have a natural affinity for one another consider the following some metals are commonly found in nature as salts of  
chloride or as oxide ores while others are found in combination with sulfur
