Systems Development Methods for Databases, Enterprise Modeling, and Workflow Management Wita Wojtkowski, W. Gregory Wojtkowski, Stanislaw Wrycza, Jozse Zupancic, 2012-12-06 This book is a result of the ISD 99 Eight International Conference on Information Systems Development Methods and Tools Theory and Practice held August 11-13 1999 in Boise Idaho USA. The purpose of this conference was to address the issues facing academia and industry when specifying, developing, managing, and improving information systems. ISD 99 consisted not only of the technical program represented in these Proceedings but also of plenary sessions on product support and content management systems for the Internet environment, workshop on a new paradigm for successful acquisition of information systems, and a panel discussion on current pedagogical issues in systems analysis and design. The selection of papers for ISD 99 was carried out by the International Program Committee. Papers presented during the conference and printed in this volume have been selected from submissions after formal double-blind reviewing process and have been revised by their authors based on the recommendations of reviewers. Papers were judged according to their originality, relevance, and presentation quality. All papers were judged purely on their own merits independently of other submissions. We would like to thank the authors of papers accepted for ISD 99 who all made gallant efforts to provide us with electronic copies of their manuscripts conforming to common guidelines. We thank them for thoughtfully responding to reviewers' comments and carefully preparing their final contributions. We thank Daryl Jones, provost of Boise State University, and William Lathen, dean College of Business and Economics, for their support and encouragement.

Implementing Systems for Supporting Management Decisions Patrick Humphreys, Liam Bannon, Andrew McCosh, Piero Migliarese, Jean-Charles Pomerol, 2013-06-29 The motivation for this book is to provide in a concise format an account of the explorations and integration of the lessons learned from experimental decision support system implementation. This book considers the various aspects of developing decision support systems in a way which is accessible to the full range of participants in the process.
