**Readings in Historical and Contemporary Economic Issues** Bernard M. Klass,1987 *Readings in Historical and Contemporary Economic Issues* Bernard M. Klass (ed),1982 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1976 **Economic Problems of Modern Life** S. Howard Patterson,Karl William Henry Scholz,1927 **Economics: Modern economic problems** Frank Albert Fetter,1923 **Modern Economic Problems** Frank Albert Fetter,1922 *Economics, Volume 2: Modern Economic Problems* Frank A. Fetter,2020 Professor Fetter s Economic Principles is the second half of a two volume treatise on economics The first half Economic Principles deals with the basics The author of this volume is one of the great American economists His contributions to economic literature have been notable and while it would of course be too much to say that they have won universal acceptance it can safely be affirmed that they have quite generally been accorded respectful and sympathetic attention Professor Fetter occupies a place of distinction not only as a thinker and writer in the field of economics but also as a university teacher Several years ago he served also as President of the American Economic Association Few are better qualified therefore to prepare a general treatise on economics This volume constitutes the second part of a work dealing with the principles of economics which in some respects may be regarded as a revision of Professor Fetter s Principles of Economics published as a single volume But the treatment of the principles of value and distribution in volume I of the new work differs materially if not radically from that in the earlier text and at the same time as Professor Fetter himself remarks the years since have been so replete with interesting happenings in the field of practical problems that volume II represents more than a mere revision of the corresponding chapters in the earlier book Hence the present volumes taken together must be regarded as an essentially new contribution Considering the variety of economic problems that Professor Fetter discusses it seems extraordinary that he has been able to compress his treatment within the limits of a comparatively small book His success in this direction however has been due to his method of treatment While essential facts have not been neglected he has not attempted to give an encyclopedic description of all the elements involved in the several problems but he has confined himself rather to a setting forth of the points of principle involved in them suggesting in this connection the solutions which sound analysis and a healthy for as a writer it will appear superfluous to speak of style But for those who may not know let it be said that Professor Fetter writes with a nicety and clearness of expression and with a delicacy of touch and of humor that stamp him as a writer of the first class *Economic Problems of Modern Life, by S. **Privatization and Foreign Investments in Nigeria** Lawrence Okechukwu Azubuike, 2009 Nigeria's political economy has straddled the ideological divide between socialism and capitalism. The country produces oil and at some point in its existence it embarked on robust state involvement in the economy. This was marked by the acquisition or establishment of numerous state enterprises. Over the years the performance of these enterprises was found to be dismal and as part of the overall reform of the economy Nigeria has joined the global trend toward reduction in direct state ownership of enterprises. Indeed it has embarked on massive divestment of state interests in once publicly owned firms. Besides the universal rationale of efficiency one of the objectives of the privatization exercise in Nigeria is the attraction and retention of foreign investments. This work examines the direct and indirect linkage between the government's divestiture of its interests in firms on the one hand and foreign investments in the country on the other hand. The book is divided into seven chapters. Chapter 1 reviews the political and economic history of Nigeria to set the background and context that necessitated the introduction of the reform package of which privatization is just an aspect. Chapter 2 is a discussion of various natures of state involvement in an economy. This ranges from mere regulation to active participation. The chapter discusses the competing conceptual and ideological theories and tries to situate the Nigerian experience within the broader conceptual dichotomies of capitalism, socialism and the via media of mixed economy. Chapter 3 is an examination of the meaning and rationales for privatization of state owned enterprises generally and the Nigerian attempts in particular. Nigeria's privatization program is an ongoing exercise. Yet two distinct attempts are identifiable: one which started in 1988 and the reinvigoration of the exercise albeit with new constitutive frameworks in 1999. Thus Chapters 4 and 5 review the legal and institutional frameworks for these two exercises. Chapter 6 deals with foreign investments in Nigeria. The discussion encapsulates the pros and cons of foreign investments especially in Nigeria. Chapter 7 explores the direct and indirect linkages between the privatization program in Nigeria and foreign investments in the country. This is particularly apposite because one of the touted objectives of the privatization exercise is the attraction of foreign investments. A conclusion follows. The work finds that although foreign investments appear to have been indirectly boosted by the privatization exercise, foreign investors initially did not show interest in direct acquisition of the shares and other interests being relinquished by the government but that that attitude has been changing gradually.

*Modern Political Thought* Gary Browning, 2016-10-27 How are we to understand past political thinkers Is it a matter simply of reading their texts again and again Do we have to relate past texts of political thought to the contexts in which ideas were composed and in which the aims of past thinkers were formulated Or should past political theories be deconstructed so as to uncover not what their authors maintain but what the texts reveal In this book theories of interpreting past political thinkers are examined and the interpretive methods of a range of theories are reviewed including those of Hegel Marx Oakeshott Collingwood the Cambridge School Foucault Derrida and Gadamer The application of these theories of interpretation to notable modern political theorists Machiavelli Hobbes Locke Rousseau Kant Hegel Marx Bentham Mill Nietzsche and Beauvoir is then used as a way of understanding modern political thought and of assessing interpretive theories of past political thought The result is a book which sees the history of modern political thought as more than a procession of political theories but rather as a reflection on the meaning of past political thought and its interpretation It provides a way of reading the history of modern political thought in which the question of interpretation matters both for understanding how we interpret the past but also for considering what it means to undertake political thinking
