In the foreground, a dense patch of red and yellow wildflowers is in full bloom, adding a splash of color to the scene. The overall atmosphere is one of hope and renewal.

**Re-Reading English** Peter Widdowson, 2013-10-08 First Published in 2002 It is easy to see that we are living in a time of rapid and radical social change It is much less easy to grasp the fact that such change will inevitably affect the nature of those disciplines that both reflect our society and help to shape it Yet this is nowhere more apparent than in the central field of what may in general terms be called literary studies New Accents is intended as a positive response to the initiative offered by such a situation Each volume in the series will seek to encourage rather than resist the process of change To stretch rather than reinforce the boundaries that currently define literature and its academic study **Reading Country**

of gender in the production and consumption of texts during this expansion of female readership Drawing together historians and literary scholars the essays share a concern with local specificity and material culture Removing women from the historically inaccurate frame of exclusively solitary silent reading the authors collectively return their subjects to the activities that so often coincided with reading shopping sewing talking writing performing and collecting With chapters on samplers storytelling testimony and translation the volume expands notions of reading and literacy and it insists upon a rich and varied narrative that crosses disciplinary boundaries and national borders

Charles Dickens James E. Marlow, 1994 Charles Dickens The Uses of Time clarifies the antinomies that appear in Dickens's attitudes toward the past present and future To do this author James E Marlow follows Dickens's personal and literary development through all his novels and many of his letters and journalistic pieces For example toward the past Dickens reveals diametrically opposing attitudes A part of his own childhood was so painful a memory to him that he could not bring himself to tell his wife about it after twenty years of marriage In his novels he developed a number of ways of dealing with the awful pasts both personal and national From denial to anger to acceptance Dickens tried one method after another As each failed to relieve his anguish and even failed to rescue human feelings he formulated another This is what Marlow calls Dickens's dialectic of the past Yet Dickens was also nostalgic about much of the past He emphasized its softening quality even while trying to disarm its dehumanizing quality With his characters Dickens discovered the necessity of an engagement with the past that entails accepting the pain as well as the joy This is its use The past is abused when the pain or joy is disentangled from the whole and held up as meaning in itself This act orphans the feelings petrifying the soul What is true of the past is true of the present and future as well Just as one chapter of the book is devoted to the abuse of the past and another to its uses a further chapter shows the way Dickens worked through the terrors of the present dominated by an ideology that the author calls English cannibalism Another chapter shows the threat of moral sclerosis through dealing with the future as merely great expectations These chapters are paired with chapters that show the joys of the present and future With each time period there is a dialectical process Dickens had to work through a stance discover its deficiencies and then move on to another stance that promised to provide more human gain both social and personal from the past present and future Ultimately the very existence of three dimensions of time is the solace of man because while the past for example can be used for relief of the present the present can modify and

soften the past All is fluid and nothing is ever finished in the process between mind and human events In the last chapter Marlow established the kind of material world that Dickens s dialectic of time presupposed It is a world with moral foundations and Dickens like many other Victorians discovered a plausible scientific explanation for such a world in Charles Babbage s Ninth Bridgewater Treatise a book that seeks to harmonize scientific knowledge with moral imperatives This satisfies Dickens s own project perfectly for Dickens wished to demonstrate the possibilities of engagements with each dimension of time within the requirements of social life that do not annihilate the moral properties necessary for the soul to harmonize with God s universe itself BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Girls' Reading-Book** Henry Sandford,2024-01-31 Reprint of the original first published in 1875 The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve these books and make them available to the public so that they do not get lost

**Masterly Fictions** Lauren Watson,2020-05-22 This book establishes deconstructive dialogues between texts which are generically chronologically and stylistically very different Each chapter aligns one of Dickens s later novels with a work of contemporary literature and a post structuralist theoretical text Working from the premise of Derrida s contre the relationship developed between these texts is not so much intertextual as countertextual each text re enacts the procedures of its counterparts simultaneously rearticulating and interrogating their status In this triangular mode of reading the contact zone between countertexts becomes the site on which new readings are generated readings that use the ambivalent relationship between writings to mark an analogous self difference within writing itself This productive self difference is described as a negotiation of the contradictory drives of signification a strategic management of the masterly and the contingent This book argues that Dickens s texts perform their negotiations in an acutely strenuous manner amplifying instability and exposing the means of literary production This lack of discipline proves contagious as the reader re enacts the text s spasmodic shifts between mastery and contingency As surrogate Dickensian readers in the countertextual economy the contemporary novel and post structuralist theory also display this instability an effect which allows this study to develop not only a theory of poetics but a poetics of theory This dramatic self difference is not simply restricted to writing however In later chapters this study examines how racial and gender identities are also marked by ambivalence and how their instability

is exacerbated after contact with a Dickensian centre. In conclusion, the work is itself submitted to a Dickensian reading. The author examines how the study's own manoeuvres have been exposed through contact with many of the texts analysed within it and how this dialogue deconstructs the ideal of academic writing.
