Cantor, 2020 Drawing on decades of professional practice and teaching experience Steven L Cantor s Professional and Practical Considerations for Landscape Design explains the field of landscape architecture outlining with authority how to

turn drawings of designs into creative purposeful and striking landscapes and landforms in today's world. This comprehensive guide consists of everything a young professional might encounter from conception through final project archiving, ensuring readers have both the tools necessary to keep up with advancements in the field and the practical business knowledge to build life-long partnerships. Each of the book's concise chapters emphasizes a specific aspect of landscape architecture practice from the administration of designs for contracts, areas of practice, human resources, marketing, construction materials, sustainability, and ethics. Each chapter is written in a style that best suits the material. Alongside detailed definitions and practical do's and don'ts are 30 complex sample problems ranging in difficulty for both individuals and groups. An array of original photographs and clear examples in both black and white and color articulate standards and inspire future possibilities featuring the work of Vicky Chan, founder of Avoid Obvious Architects, and Richard Alomar, Associate Professor of Landscape Architecture at Rutgers and co-founder of New York Urban Sketchers. By combining the author's unique depth of knowledge with real-world case studies from America, Asia, and Europe, *Professional and Practical Considerations for Landscape Design* is an up-to-date resource for every level of reader from students in landscape architecture programs to professionals working in public or private practice, engineering, consulting, or contracting.

Nature-Based Design in Landscape Architecture Bruce Sharky, 2024-02-28. *Nature Based Design in Landscape Architecture* showcases a range of built works designed by landscape architects from many countries of the world, representing diverse environmental regions and uses. These projects demonstrate the transformative potential of a nature-based approach to landscape architecture. The nature-based design approach supports and encourages natural regeneration with a view to promoting sustainable environments, preserving natural resources, and mitigating the impacts of climate change and development. The projects selected for this book demonstrate the potential of nature-based landscape design to support healthy natural and managed ecosystems, sequester carbon, and support the recovery of biodiversity. In addition to examples of design-led environmental interventions, *Nature Based Design in Landscape Architecture* the book also demonstrates the potential for nature-based design to improve people's relationship with their surroundings by encouraging them to be active participants in their communities. As such, each project featured in the book promotes a discussion around future scenarios in which landscape architects can and will be engaged from minimizing environmental impact through sustainable design to fostering social justice through community engagement. This book will be a welcome supplement for undergraduate landscape architecture survey or design studio courses and may also be used at the master's degree level either as part of a landscape architecture survey seminar or early design studio.
