Kirchwey,1928 Nonprofit Neighborhoods Claire Dunning,2022-06-23 An exploration of how and why American city governments delegated the responsibility for solving urban inequality to the nonprofit sector Nonprofits serving a range of municipal and cultural needs are now so ubiquitous in US cities it can be difficult to envision a time when they were more limited in number size and influence Turning back the clock however uncovers both an illuminating story of how the nonprofit sector became such a dominant force in American society as well as a troubling one of why this growth occurred alongside persistent poverty and widening inequality Claire Dunning s book connects these two stories in histories of race democracy and capitalism revealing how the federal government funded and deputized nonprofits to help individuals in need and in so doing avoided addressing the structural inequities that necessitated such action in the first place Nonprofit Neighborhoods begins after World War II when suburbanization segregation and deindustrialization inaugurated an era of urban policymaking that applied private solutions to public problems Dunning introduces readers to the activists corporate executives and politicians who advocated addressing poverty and racial exclusion through local organizations while also raising provocative questions about the politics and possibilities of social change The lessons of Nonprofit Neighborhoods exceed the bounds of Boston where the story unfolds providing a timely history of the shift from urban crisis to urban
