Tall: the design and construction of high-rise architecture Guy Marriage, 2019-09-10 This is a guide to both the basics and the details of tall building design delving into the rudimentary aspects of design that an architect of a tall office building must consider as well as looking at the rationale for why and how a building must be built the way it is Liberally illustrated with clear simple black and white illustrations showing how the building structure and details can be built this book greatly assists the reader in their understanding of the building process for a modern office tower It breaks down the building into three main components the structure the core and the facade writing about them and illustrating them in a simple to understand manner By focusing on the nuts and bolts of real life design and construction it provides a practical guide and desk reference to any architect or architecture student embarking on a tall building project

Profitable Partnering for Lean Construction Clive Thomas Cain, 2008-04-15 The lean procurement techniques given in this practical guide could save clients up to 40% of total design and construction costs case history evidence is included to prove that the techniques really work The guide goes on to explain in equal depth the lean construction techniques that supply side design and construction firms including trades contractors need to adopt to

deliver the savings while boosting their profit margins. Written in an accessible style it explains why lean construction techniques will only deliver this high level of savings if they are underpinned by long term strategic supply side partnering relationships between consultants, construction contractors, trades contractors and manufacturers. This is a how to book written in terms everyone can understand without the need for an expert interpreter or costly training. *Resources in Education*, 2000

Construction Planning R. H. Neale, David E. Neale, 1989. Dealing with construction planning, this book describes good planning practice that can be applied without effort. It explains the principal planning techniques with case studies supported by diagrams. It also shows how planning fits into the overall management of construction work. Warp Knitted Fabrics Construction Yordan Kyosev, 2019-07-30. The aim of this book is to provide the background of the warp knitting patterning with a large amount of simulated 3D images of the structures corresponding to the modern available tools for this. The warp knitted structures can have very complex architectures and very limited understanding exists on how they are built. Storytelling: Beyond the Academic Article - Using Fiction, Art and Literary Techniques to Communicate Malcolm McIntosh, Nick Barter, Helen Tregidga, 2020-11-29. How can we tell our stories differently? How can we go beyond the academic article or sustainability report? All reports and all scholarly pieces are narratives of a sort, each choosing which evidence suits and each having some sense of beginning, middle and end. Through their use of fiction, art and poetry, the seven papers in this Special Issue of *The Journal of Corporate Citizenship* are challenging what might typically be expected as the form of an academic article. These challenges include identifying silent voices, linking of our hands, hearts and heads via art, a poem, a napkin to communicate the life of an average academic, stories of gladiatorial combat for promotion and a man's day in a non-specific future. This mix of challenge in both form and message contributes to the ability of the papers to advance understanding and reinforces how an innovative approach to conveying the message can advance debate. Advances in Engineering Structures, Mechanics & Construction M. Pandey, Wei-Chau Xie, Lei Xu, 2007-02-10. This book presents the proceedings of an International Conference on Advances in Engineering Structures, Mechanics, Construction held in Waterloo, Ontario, Canada, May 14-17, 2006. The contents include the texts of all three plenary presentations and all seventy-three technical papers by more than 153 authors presenting the latest advances in engineering structures, mechanics and construction research and practice.
